

24 DEC 07

Hail Daniel! Thanks for yours of 19 DEC 07. Yes, my rascal relatives have also occupied this land of ZOG. Several Thomsons were brought here as slaves, along with the White majority who were slaves before the expensive Blacks were imported. Charles Thomson was secretary at the signing of the phony Freemasonic Declaration of Independence (from the King of England, not the Bank of England of which the King was an employee). Charles T. was also the one who drew up the satanic-masonic Great Seal of the USA. Whether Thomson was a former White slave himself, or the child of White slaves, I don't know. I doubt that he was a White Nationalist, just another Judeo-American opportunist, working for the jew banksters, like all the Founding Felons, most of whom were Freemasons.

In your writings, what seems to be lacking is a reason for doing anything which you describe & suggest. Form should follow function. How can that be if we do not know who we are & what we want? I am a White Nationalist. That means that I believe Whites should have their identity as a Nation & their White-run state for White self-government. Can you name one other you know who wants to achieve that goal? I can think of no one. The blightwing is not White Nationalist. Many of its members are obviously non-Whites &/or have a fuzzy idea of White in terms of biology, as revealed by DNA. If we don't know who we are, we do not know what is good or bad for us. Anyone who flies a U.S. or Confederate flag is not a White Nationalist. Anyone who does not use ORION! the White Nationalist credo, is not a White Nationalist. Anyone who is not White is not a White Nationalist, although he may be of benefit in The Anti-Zionist Alliance, as are righteous jews, & other Nationalists.

Most so-called leaders live OFF their touted cause. You know who they are. Few live FOR any cause, least of all the cause of White Nationalism. Without any agreement on who we are & what we want, there can be no "state within a state" of the sort other peoples have created in the USA, & are creating, while Whitey snoozes in his illusions.

White Rhodesians did not have decades to experience Black Misrule, & then, maybe, decide to defend White interests. I doubt we shall have any such length of time in which to decide on our act & then get our act together, for we are too busy competing against one another for reasons of ego & income. Once again, you are concerned with means, when there is no agreement as to ends. Events tend not to await the ever so slow preparations we might achieve, for even if we were to achieve them, the context may be so different that our preparations are irrelevant. I saw that in Rhodesia, too. The demographic situation in Rhodesia got so bad, so soon, that poor slow Whitey had barely time to rush away, into the night. If people will not fight when they have the means, how can we expect them to fight when they lack even food for the next day? Poverty does not usually confer higher aspirations. On the contrary. As Rothschild agent Morgan declared of the poor: "I'll just hire ½ to shoot the other ½." Consider Blackwater Security in this regard. The formula that "worse is better" does not usually bear results beneficial for the people, as the Bolsheviks knew. White Rhodesians & South Africans suddenly had it bad, but they did not make things better for themselves. As you say, what purpose would be served if Whites had a 'revolutionary shadow government,' form without function? None that I can see, either! How do we achieve harmony without purpose? I previously mentioned the experience of a Rev. Hughes of Louisville, KY, who led a Christian Comitatus group in protest of forced housing & school Africanization in the 1970s. He had a full-size Greyhound bus with his group's name neatly painted thereon. I said that it would be great to take his group to demonstrations. He said that it would, but someone had sugared the gasoline or diesel fuel, so it no longer ran. I asked him what happened to their protest. Hughes said that he gave the group its instructions to assemble at a certain time & place for their demonstration, & the group split up into 3 separate bunches, who went in 3 different directions & never made it to the assembly point. This is what the blightwing has always done. Hughes had done what you recommend: start a group, only to see it self-destruct when its purpose was to be fulfilled. Of course, with different people, different results would have been achieved, but how was he to know his people were unsuitable? ZOG loves to infiltrate all pro-White organizations, as it should, for that is ZOG's job. If people know who they are & what should be done, no organization is necessary. Physical proximity cannot substitute for common purpose & common identity. The blightwing proves that, as it has for over 50 years in the USA. J.B. Campbell allegedly wrote that his militia group was largely FBI informants & operatives.

In reality, there was a leader in post-World War I Germany. He was a former lumberjack & sailor. People recognized him as a natural leader. Some men came to him with the news

2)

that their children were starving because the Reds & jews were guarding the food warehouses. Noske replied, "So let's go kill the Reds & the jews." The men followed him & got their food, for themselves & their families. Other Germans heard about Noske's 'miracle', & wanted him to do the same magic in their towns & cities. Hence the birth of The Free Corps movement, around 1919, before Hitler. So where was Noske's organization, planning & preparation? It wasn't. The Germans agreed on the goal & form followed function. Politics does not take rocket science, although do-nothing blighters think it does.

As I said in "What We Can Do," networking is about all we can do initially. It took me 5 years to find 5 interested people in Rhodesia, who purported to recognize the Whites' plight. So far, I've lived in the USA since 1992, & all I do is carry on correspondence with people outside Brownest Yakima. I suppose I could do the same if I lived on Devil's Island in the Caribbean.

You may buy as much land as you wish, but if you do not have a White Nationalist leadership & organization, you will gain nothing. Please stop putting the cart before the horse. You might as well buy a car, without knowing where you want to go, or even how you'd get to another continent with it. People first; politics next, & land, possibly; ends before means. The Whites need to know that they are White. Then they can think in terms of White interests just like the jews, who ask, "Is it good for us?" Whitey needs to think of 'we' instead of 'me.' If he can't do that, he will cease to exist. I don't think pro-White thinking would be difficult nor complicated. Telling people to eat food instead of rocks is not any different. Why do you think a pro-White message is so hard for Whites to understand? If they don't care, that's up to them. You can lead a mob to knowledge but you cannot make it think.

Whites have NEVER thought of themselves as a Folk or Nation, so what I'm proposing is new. It has never been tried. We have an opportunity in imperial America, for Whites of any particular tribe are not predominant, as are Whites of many tribes. Hence, White Unity = White Nationalism. I am appalled that Whites should be educated that they are White, & that they therefore should think in terms of White interests, beyond their own immediate interests. If Blacks & Yellows can do it, why can't Whites? If Whites refuse to behave as a Nation because they refuse to believe they are a Nation, then we can do little or nothing. Consider how Noske would have fared if he'd approached the starving Germans with his idea of obtaining food, only to hear the Germans say: "Food? Why do we need food?" Duh.

Infrastructure is dealt with in engineering books, including civil engineering books. Infrastructure includes the MEANS of production & distribution. Consider grain: it is produced on farms, stored in grain elevators; transported to cities for processing into flour & baked goods, thence it is transported to retail outlets. A loaf of bread requires land, machinery, fuel & silos; freightcars, railroads & locomotives, electrical energy for milling & baking; trucks, fuel; warehouses & grocery stores. Infrastructure is what gets the grain to our tables, where it arrives in edible fashion. Distribution is done with all types of transport which requires vehicles, fuel, roads, rails, seaports & airports, plus electrical transmission lines & pipelines. Water transport requires rivers, canals & ports. The present low watertable in The Great Lakes causes ships to be grounded. The size of ships has been reduced & cargoes in ships of proper size have been reduced to avoid their running aground. Bad rails reduce train speeds; as do bad roads for trucks, & defective bridges. Pipelines & electric transmission lines can fail, as happens frequently, due to overloading & lack of maintenance. Airway crowding creates difficulties for air transport. Such subjects used to be taught routinely in U.S. public schools, when we were citizens, instead of slaves. Now, our ZOG treats us as potential terrorists, rather than productive citizens. I've seen this change within my lifetime. Some teachers have witnessed it ⁱⁿ theirs, as well. A deceased friend of mine, Robert Frens, said that his junior high chemistry textbook had pages listing explosives & poisons, so if the student saw such formulas, he knew that the items were dangerous. ZOG doesn't even disclose if a tank truck carries gasoline or kerosene, which are quite different. Kerosene has a higher ignition point, so its vapors are not so dangerous as those of gasoline. An informed citizen would know better what to do if he knew the cargo of a tank truck in a collision, just as he'd know what to do if it contained an acid or base. Robert reported an announcement of a "chemical spill" which blocked a NY highway: the chemical was milk. Yup.

The only substantial thing I have in regard to Covington is from my own firsthand experience. In Rhodesia, his monkey-antics had me hauled into court where I testified in his defense, that he'd written a "threatening letter" to the local jews when he was drunk. I said that he could type well in that condition, but he could not think very well. I find it hard to tell if one is a blightwinger or a ZOG agent, for the results are the same. ORION!
E.T.
