

29 DEC 07

Dear Phil: Thanks for your note of 26 DEC 07 & the outstanding enclosures! The Owl Book Mark is almost too pretty to hide inside a book, so it's a real holocaust dilemma. Still, it's much better to have it than not. Speaking of 'holocausts,' it appears that our latest hebe Holohoaxer has added some sado-masochist twists to the story, such as the touted injection of infants with "fennel," which a dictionary defines as "a fragrant yellow-flowered herb used for flavoring." The original term was "phenol," alias carbolic acid. This substance was prevalent in hospitals as an antiseptic, & gave hospitals of the period a characteristic aroma, as I recall from my childhood. Hilberg's book came out when the Big Jump occurred, in which all kosher 'gassees' jumped from Germany & Austria into the 6 so-called 'death camps' in Poland, under Communist rule. Previously, Allied liars deemed all German camps as gassing centers for jews. Jew film-director George Stevens built a phony gas chamber in Dachau, to make an anti-German propaganda film, which I've seen several times. The narrator claims that thousands went in for a shower, but "succumbed to the deadly smoke." Now, the sign thereon says it was "never used as a gas chamber." The miraculous 'leap' of "6 million" gassed victims into Poland was never questioned by the Goyim, to my knowledge. It is the jews who "destroy language," & then accuse others of so doing. Hitler wrote that jews use The Big Lie Tactic, so jews accused Hitler of "advocating The Big Lie." Goyim need to beware of such 'jew-jitsu,' but Goy parents teach their children to be sheep, not men, according to their Christinsanity, as my own parents tried to teach me, but I was born old, as they said, so they were not able to turn me into a sheep. I was just kept dumb & ill-informed, until I could read & think for myself. Christianity is a disease which cripples our immune systems to jewish poison. That's why the jews invented the cult. Baaah, baaah.

The former K-K-Kook who publicly confessed to murder during his Klan career is very dumb, for ZOG recognizes no statute of limitations in KKK matters, to my knowledge. We'll see what happens to the fool.

The article on China's pollution-production & domination of world trade includes the usual jew-spin that loss of U.S. jobs does not mean loss of U.S. jobs, which are 'replaced' by other jobs. The spinners neglect to state that the jobs lost paid much more than do the 'service industry' jobs, which usually pay minimum-wage. China's pollution is also exported to the world, with prevailing winds, so China's problems are also our problems, despite the silly writer's sheenie spin thereon.

I appreciate "The International Forecaster," as always. I just heard Greenspan deny that he or the Federal Reserve Racket had any responsibility for the Housing Bubble, & he stayed away from discussing its role in inflation. He knows he is talking to a herd of dumb Goyim. As with the savings & loans robbery, the guarantors for the Bubble Bailout will be the U.S. tax-payers. That is not surprising, for we are captive milkcows for the jews & their rackets.

Chapman writes of a likely U.S. default on international payments, which rings a bell: Clive Cussler wrote a novel entitled "Night Probe." Aside from some major technical bloopers, he has President Wilson buying Canada from the British Empire. The transaction is concluded, but the signed documents disappear. The current U.S. president says that if the documents are not recovered, the USA must declare bankruptcy. The book has a 'happy' ending when he can finally announce the creation of "The United States of Canada." Now, the goal is the creation of Canada, USA & Mexico into The North American Union, with Central America to be added in due course, under CAFTA. We can predict the future when we know "Cui bono!" In this matter, the bankers may increase their control of the North American continent's land & natural resources, which China is already buying up. It is interesting that Chapman describes Bush as altering the terms of contracts, so as to rob the tax-payers, so as to let unscrupulous borrowers & lenders off the hook of abiding by their mortgage contracts. Such a deal! It appears that inflation is getting ready to pounce on us poor, consuming sheeple. My Gestalt on the economic circus, er crisis, is that our ZOG has given big criminals free rein, as they did in the savings & loan scandal. The big victims are the defenseless tax-payers, as always. In Weimar Germany, I gathered that state budgets were tapped out by welfare payments to unemployed & pensioners. Then came banker inflation which wiped out the Goy savings & reduced the real worth of pensions to nil, when pennies are compared to billions. The winners were jews who had gold or other currencies. As I say, Inflation is theft. I know I am wasting my time trying to talk to Goyim, so I may as well tell the flowers in the field. They are better company. One observer styled our judeo-capitalist economy as "Socialism for the rich & capitalism for the poor." Such a deal! History repeats because we refuse to learn.

2)

The Law of the Contrary is manifest in our society, in which people are concerned primarily with money, but refuse to learn anything about it. The majority behave like lemmings: If everyone is in debt, then let's jump right in, too.

Many thanks, indeed, for the fascist flier. So what's in a name? Fascism has been variously defined: A dictatorship of the Right; Nationalist dictatorship, &c., but its main characteristic, in practice, is corporate statism, the rule of a country or empire according to a consensus of an oligarchy, such as board members of a company, whose shareholders bear the benefits or burdens of the board members' decisions. Fascism of the sort promoted by Mussolini included imperialism, on the multi-national Roman pattern, so it is erroneous to characterize fascism as "nationalistic". Mussolini had been an International Socialist who believed in "class warfare," but he saw "workingclass solidarity" crumble in World War I. He'd fought for Italy, not for socialism, as did most of the so-called socialists, so he realized that his original ideals were bankrupt. Post World War I Italy was in a state of political/economic gridlock, with groups against groups. This conflict had everything to do with economic interests, & virtually nothing to do with area constituencies, as I point out to Goyim: Truckers have more in common than they do with non-truckers, wherever they may live. The same applies to ranchers, farmers, miners & university professors. In Italy, peasants fought with landowners; workers with manufacturers, i.e. factory owners; unions with managers, Church with Freemasons. Hence, the election of Tweedle Dee or Tweedle Dum to political office was irrelevant to realpolitik of economic interest groups. Mussolini's skill was in his recognition of such real powers in society, & in his ability to bring them to a bargaining table, where they were to hammer out binding agreements to get society running again. Mussolini's error was his expansionist imperialism, which got Italy into the Balkans Debacle, thereby requiring rescue from their German Axis ally, which also cost Germany any possible victory over the Soviet Jewnion. With Mussolini as an ally, Germany never needed an enemy. This disaster tends to obscure the practical nature of the corporate state, as well as obscuring the existence of such de facto corporate states as current globalism, which uses the USA as its patsy & its 'enforcer.' Yes, Goyim, the Mafia is a corporation, like Exxon et al. Fascism subordinated the people to the state, just as Rome subordinated everyone to its empire. Communists like to lump German National Socialism with fascism, but that is wrong, as it is to ignore the existence of Jewish National Socialism alias Zionism. Hitler declared that the state protected the race & the race protected the individual member thereof. Fascism made no mention of race, & the job of the individual was to protect the state by obeying its leader.

Orwell said that "Tyranny begins with the abuse of language," & "who defines controls." This is why we must see beneath labels which serve to eliminate thinking. Victims of the former Soviet Jewnion saw the reality underneath the illusion of the "workers' paradise." They called it "state capitalism," for the USSR was run as a single corporation by Jew (mis)managers. In this era of global judeo-capitalism, we now have forms of "capitalist statism," in which countries & their populations are subject to global corporate interests, not vice versa, as in National Socialist Germany.

Jews played major roles in Italian Fascism. Gabriele D'Annunzio introduced the Black-shirts before Mussolini came on the scene, & I understand that the reasurer of The Fascist Grand Council was the Rabbi of Rome. There was a separate Jew Fascist organization which morphed into Zionism.

In the USA of the Depression (1929-1939) Communism & Fascism were attracting attention. Major business interests thought Fascism was the way to keep control of the U.S. economy, so they tried to recruit former Marine Corps General Smedley Butler, twice winner of The Congressional Medal of Honor, as their 'Mussolini,' but Butler denounced the plotters. I understood from my U.S. history professors that Huey Long was a "proto-Fascist," who FDR hated out of jealousy, & since FDR was committed to supporting the Soviet Jewnion, Long was murdered & U.S. Fascism was deemed 'unfashionable'. Corporate statism remains alive & well, even as the state is now a mere branch of the corporations.

I see 3 possibilities in the advent of "The United Fascist Union." (1) The author is being satirical. (2) The author is nuts. (3) The UFU is a trial balloon from ZOG to test possible public sentiment for or against a Mussolini-style Fascism in the USA &/or the North American Union. Stay tuned! DOWZ! ORION!
