

9 JAN 08.

Hail Daniel! Thanks for the JAN 08 Issue #12 of Separate Living & your letter of 27 DEC 07. As you say, "Aryan values" seem most compatible with Germany's National Socialism, so I don't see NS as "bitter medicine," like Covington.

Once again, you put the cart before the horse. Biopolitics comes first. Then we may obtain land for Our Nation. You currently feature a South African report on who lost South Africa for the Whites. The Whites did, for they called themselves "South Africans." South Africa is a location, not a Nation, so the Whites saw themselves as residents in a territory, AS DO ALL WHITES. You do not have self-government because you occupy a place. You have a place because you have self-government. If your assumption were correct, Whites would still occupy & rule Rhodesia & South Africa. They lost the land because they didn't see themselves as a Nation. If they'd seen themselves as a Nation, instead of dwellers at a location, thereby confusing place with Nation, they would have behaved differently.

Let's break it down, so you will finally understand: I know who I am. Hence, I know that someone else is not me. I dwell in an apartment. I know that the apartment is not me, for I am the one who rents it. Suppose an 'immigrant' were to occupy my apartment. Out he would go! Not so, however, in the case of countries whose denizens do not see themselves as Nations. That is why alien invasions are not repelled by the denizens under Judeo-Global Capitalism. How can you fail to see that formerly White-ruled lands are lost because their White residents did not identify themselves as nations? Nationhood is not a sense of place. It is a sense of self. There is no point in placing 'edjewcated' Whites anywhere, & then attempting to educate them. Education must come first. Only then may we find a place & defend it.

The Chinese captors of U.S. P.O.W.s in Korea learned that fewer than 1 out of 20 men in their custody had ANY leader potential. Potential leaders were identified by guards who were instructed to look for a man with a sense of humor; a man to whom other men listened, & a man who had courage in the face of an armed enemy. The rest were sheeple. One third of the U.S. sheeple died, because there was no one to tell them to get out of bed & eat. I heard this series of Pentagon tapes when I was in U.S. Air Force ROTC in college. The sheeple were deprived of their leaders, so they had to learn for themselves. Most did not. When young men die, basically for loss of the will to live, we can deem the Chinese prisoner program a remarkable success, for the Chinese! The Chinese evaluation of the typical U.S. soldier was not flattering: Individualistic, i.e. selfish & anarchistic, was one point I remember. I took the course in 1956, so it's been a while. U.S. sheeple worship team sports, but they cannot or will not function as a team in their society. They worship money, but they refuse to learn what it is. Let's imagine that we have concentrated a bunch of pale jewsmedia products in one location. With their 'edjewcation,' could we expect them to sit down & listen, or (gasp!) read a book of more than 2 pages? I know my sheeple. It may be possible when they are confined in ZOG's gulags, but not on the outside. The will to learn must come first. No place can guarantee a desire to learn; not even universities, which I've attended. As one professor told us: "This university cannot teach you anything. You must learn yourselves. In the end, we are all self-educated." In junior high school, those who did not want to learn could spoil otherwise interesting classes, in which I did want to learn. Please don't keep putting the cart before the horse. If Whites want a White state, they will have one. If they don't want to govern themselves, then we could hand them a state, & they'd ignore it, as the Blacks did the modern economy the Whites handed them in Zimbabwe. Why can't you understand that the DESIRE must come before an achievement? If the End is wanted, the Means will fall into place, but not vice versa. Menachem Begin, one of Israel's founding felons, wrote in his book, "The Revolt," that first comes the desire to revolt (against British rule), & then the weapons to achieve that revolt will follow. In the USA, weapons are abundant, but there is no desire to revolt. Do you finally understand? How can we build an Aryan state, if we do not desire to have one? Only when sufficient Whites want self-rule can we build an Aryan State.

Your slogan is good, but why do you distinguish your Folk from your Race? Why can't they be treated as one, on behalf of White Unity & White Nationhood? Why not unify, instead of separate? Dr. Goebbels stated that a worldview is best expressed as a slogan, & a slogan is best kept strong & brief. Thanks for using the White Nationalist slogan, as I do: ORION!

P.S.: It's trite, but true that when there's no will, it's "no

*Erie*

"When there's a will there's a way," & way, Jose." Hitler's "Triumph of the Will" refers.
