

21 JAN 08

Hail Daniel: Many thanks for your letter & article of 7 JAN 08. No, I do not misunderstand you, for my command of the so-called English language is probably as good as yours, but we should avoid the distortion of meaning promoted by Franz Boas that "nation = place!" Nation = People = DNA, but there is one more component of absolute importance which Whites lack: Consciousness of being a Nation. When there is no National Consciousness, there can be no defence of one's livingspace. Nationstates are portable, just as people move around the planet. Nation is part of our personality or not, in the case of schizos. If I were of The Yakima Nation, I'd be a Yakama wherever I chose to live, just as I remain White & conscious of that fact, wherever I live. I cannot imagine Whites not knowing who they are, but I have encountered so many unconscious Whites &/or anti-White Whites, that I see lack of self-awareness to be our primary problem in establishing ourselves as a Nation, then as a self-governing State, & then in a place of our own, our Homeland. As I see it, there is no escape from this order of priorities. First must come National Consciousness, then National Government, then National Homeland. These priorities cannot be achieved in reverse order, in terms of practice, nor in terms of history.

Jews & Gypsies prove that I am right, for they bring their nations & their states with them, as they achieve control over their livingspace & their host-peoples. Our advantage is that we do not require host-peoples. Our disadvantage is that we are partially to totally unconscious as to who we are, so we lack knowledge of what is good or bad for us.

My only suggestion to you is that you write with sufficient clarity to eradicate your readers' Boasian distortion of Nationhood. It was Boas who promoted the delusion that "Nation= Place." Unfortunately, Whites usually speak & think in Boasian terms, i.e. falsehoods.

The truth is that one must first know one's Nationality before he is capable of defending his place or livingspace. The Danes seem to have such a National Consciousness, as you mention. Perhaps this is so because Danes live in such a TINY place, although the demented Dutch also live in a small country: Note, I say "country," not "nation," in reference to one's place of residence. But the Dutch in their dementia let in aliens to take up their taxes & livingspace. This is National Suicide. How strange of the Dutch to give away their country, of which every square inch has been wrestled from the sea. What was obtained at such great effort is now given away, as being of no value. But this is what Whites in this land of North America do, also. Perhaps our stupidity is reinforced by our vast livingspace, in which we may still avoid bumping into aliens on our former streets, as do the demented Dutch. I've been in these TINY countries of Western Europe, which remind me of finding a place on a crowded bus. What these examples serve to illustrate, as if further illustration were necessary, is that we cannot defend our country if we lack a National Consciousness of US & THEM.

Again, I thank you for stating your requirements for a White Nation, State & Homeland. I take care, out of my awareness of Boasian distortion, to distinguish these 3 separate entities, so Whites are not confused by thinking that they are the same, for they are not. Our Nation is the biological extension of ourselves as persons. If we live under ZOG, the state is not ours, & if the territory on which we live is inhabited by aliens, it is not our homeland. Most Whites appear to be enslaved & befuddled by ZOG's Boasian illusions, i.e. lies, so they foolishly identify alien interests as being Whites' interests, when they are not in our interests as White people.

Congratulations on your reaching out to other Nationalists, such as the Lakotahs. As I wrote in "Opportunity Knocks," the existence of non-White Nationalism may teach Whites that White Nationalism is both respectable & necessary, assuming Whitey can snap out of his jew-daze. I wish you lots of luck in your effort to build up a White State, BEFORE Whites achieve National Consciousness, but I hope you can understand my reservations on adopting means before our people agree upon ends or goals. So far, I know only leaders who lead on behalf of themselves or for the ZOG. This is another evil of our lack of National Consciousness. As you say, we need not be in a hurry, but I anticipate that our road will not be long & that our time is short. I've seen Whitey dim out &/or dither his time away in other countries, & our pale sheeple seem very similar, so we must accept our losses, hopefully as lessons to correct our National Behavior.

Many thanks & congratulations on your great essay, "What I Fight For: A Racial Homeland!" I agree. In future copies, I suggest you correct such typos as "Masonic" to Masonic & "Rothchild" to Rothschild (Roth = Red; schild = Shield). I wish you Strength through Joy in your worthy efforts. ORION!

*Eric*

OPPORTUNITY KNOCKS. CAN YOU HEAR IT, WHITEY? It is wisely said that the jew is no stronger than his host people. The jews are leaving their plundered and polluted crime scene in the former Soviet Bloc for the greener pastures and fatter Goyim of North America. Some of them are even looting North America in advance of their arrival, from their temporary bases in Italy, which shows us that jews are more efficient now than when they looted Egypt. The jews in North America have been doing what comes naturally to them for centuries, and anyone with the capacity to remember what they've seen from 12:00 o'clock to noon can observe the rapid acceleration of North America's decline. The jews' White host people in North America are in retreat and facing extinction as their aging population is not replaced, except by non-White peoples. How can this be an opportunity for Whites?

It all goes back to an originally White concept called "America", with which we identified, but which fell into the hands of the jew infiltrators, whose Zionist Occupation Government uses it against us. "White" and "American" were synonymous to those of us who still remember, ignoring the legal fact that Blacks, Asians and mestizos were also "Americans". American "Indians" were "Americans" to some and "Indians" to others. This is always the problem when we confuse geography with biology, for a nation is really biological, rather than political or geographical in nature. The peoples of the Indian subcontinent know who they are. If you go and ask them, you will find few who say they are Indians: they are Moslems, Sikhs, Hindoos of upper or lower castes, Parsees, B'nai Israel et al. They do not identify themselves with the geographical or political expression called "India". If we go to Africa, we will find the same intelligent distinction between a people and a place. Even the most isolated pygmy or bushman knows who he is; the most educated Zulu, Xhosa or Arab knows who he is. None of them see themselves as "Africans", for that is a place, not a people. The European colonial regimes lumped the residents of Africa under the geographical term, "African", for their own purposes. Whites born in Africa for generations were deemed "Europeans" by colonial governments as well as by non-White residents of the continent. Only a fool can identify his people or nation with a geographical entity. In Europe and elsewhere, a territory occupied by a people was named for that people; not vice versa, as we have done here in America. Denmark was named after its residents, as were England, Scotland, Ireland, Wales, France, Germany, Russia, China et al. In nations not totally dominated by the Zionists, a foreigner can be born among them and live his entire life, without ever being considered a member of the nation. This follows the rule of Nature, not the rule of the ZOG, and is as it should be. So how do these facts affect Whites living in North America? It affects us plenty!

Right now, it is obvious that once-White living space is being invaded and populated by foreign nations who are fully aware of their national identities, as have been the so-called "Indians" of this continent, whatever we wanted to call them. Nationalism is the enemy of Zionism, which seeks to dissolve and adulterate all peoples by first erasing their national identities. For some reason Zionists have been most effective at erasing Whites' identity, but our destruction and extinction have been the jews' foremost goal, so we may surmise that the jews have put more resources into that scheme. On the contrary, the jews have exerted themselves to establish and maintain the national identity of non-Whites on this continent, which can work to our advantage, if we, as White Nationalists choose to work in concert with non-White nationalists against the Zionist Occupation Government of this territory. As the White dupes who think they are "Americans" diminish in numbers, the evil that the ZOG can accomplish also diminishes. If we do nothing as White people to save ourselves, we will diminish to the point of extinction. The faster non-White nations act in their own national interests here on the North American continent, the faster Whitey may wake up to the fact that his identity is not "American", but White. That is our most important task. All Whites must learn, whether we like it or not, that OUR RACE IS OUR NATION!
