

## BOOK REVIEWS

**"HOMO AMERICANUS: Child of the Postmodern Age" by Tomislav Sunic, 2007 (ISBN 1-4196-5984-7)**

Former Croatian diplomat, Tomislav Sunic puts forward his views on the development of today's American. Whilst Croatian in origin, Sunic has had extensive experience in the United States having received a doctorate in political science at the University of California and also at one time holding an American professorship.

America is the least homogenous nation in the Western hemisphere both racially and in terms of the lifestyles of its citizens. This makes generalizations difficult although not impossible.

While political scientists and historians proclaim that racial or ethnic differences are not innate, and are the product of nurture and education, biologists and geneticists will reject this. Nevertheless the liberal dogma of equality has not yet lost its credibility and politicians and professors who question it can find their careers restricted or truncated.

This sets up a sort of functionalism whereby those who take an unconventional approach can be stigmatized as racists and fascists. American liberalism promotes democracy while at the same time it takes a repressive and undemocratic stance when its own orthodoxies are challenged.

To become masters of the modern Americanised discourse the liberals and leftists had to remove any authors from the library shelves who they considered too right, racist or otherwise opposed to their views. A true democrat would be expected to at least respect the right of all across the political spectrum to be heard.

Those who question the constant commemoration of the Jewish Holocaust are generally treated like heretics. In fact Professor Kevin MacDonald has described the "veneration of the

Holocaust as the central moral icon of the entire civilization". To a certain extent those who question multiracial or multicultural policies are also vilified.

Nevertheless do those who purport to accept or even support the current situation really accept it or just pretend to? Sunic makes a comparison with the old Soviet Union where those who in public supported, or even played a part in running the system, often laughed about its contradictions in private.

Similarly, although Americans have always stressed the notion of liberty and the principles of Jeffersonian democracy, certain historians have pointed out that the country's founding fathers were as much motivated by economic and capitalist motives. Sunic believes postmodern Americans are so focused on the amassment of commodities that they are becoming perishable commodities themselves.

In fact *Homo economicus* can be used as a synonym for *Homo Americanus*. As one writer pointed out some time ago "the dominant influence in the making of America has been overwhelmingly bourgeois, and the population has been selected by the requirements of the capitalist regime". Survival of the fittest in America applies not to the fittest in arts or politics, but the fittest in capitalist commerce.

What is the future of America? Sunic foresees the possibility of a return to segregation and the Balkanisation of America along ethnic and racial lines. In a market democracy Americans cannot be expected to develop an organic and fraternal relationship with each other. He sees such a relationship as feasible only in a racially homogenous society or a sharply segregated one with each group pursuing its own destiny. The omnipotent market in America strengthens the desire of citizens to act as free economic agents with no spiritual bonds to each other, nor any sense of the common good or historical community.

Americanism, like communism, may only function in the future as a basic form of survivalism in which inter-racial wars will be the norm.

Only change of mind can save Our Kind, so as to cause a change of behavior. Werner Sombart wrote in his study of Jews & capitalism that "The USA is the distilled essence of Judaism." The USA is a study in entropy. E.T.

5-5-08

Dear Wayne: Many thanks for your letter of 2 MAY 08, & the great enclosures! Can it be that Canada's Zionist Hate Establishment may be dismantled? Demographically, the jews' damage has long since been accomplished, whatever role the "Hate Laws" had to do with it. To me, it seems like sending a diver down to polish the brasswork on the Titanic, but where there's life, there's hope, & where there's life, there's struggle, in this case, for Truth, Freedom & Justice.

It strikes me that you have attempted valiantly to lead the proverbial horse to water, but he has no interest in drinking it. The enclosed book review of "Homo Americanus" pertains, for Sunic's observations coincide in large degree to my own. If I desire confirmation, all I need do is to look around me. Jefferson touted "the pursuit of happiness," & that's what the denizens of North America are devoted to: Their own immediate happiness. As Sunic observes, we are possessed by our possessions, & I note that we are consumed by our consumptions: Debt, drinking, drugs & overeating. I disagree that anti-entropy does not serve the individual. I am living proof that anti-entropy works, for I could have drowned myself in self-indulgence & wound up broke, in debt, sick & probably dead from over-consumption. What works for the individual can work for his society.

So you think money is essential for spreading the word, despite the existence of the Internet. That leads us in a circle, back to the need for a Singer who can best promote the Song. Why couldn't people comprehend your message on the Internet, rather than on cards? Remember: It takes a desire to read the text on a card, just as it takes a desire to search the Internet for new ideas. Most people I encounter positively do not want to read anything which may expand their minds with new thoughts. For them, reading anything is an imposition.

The reason for lack of success amongst the so-called racialists is that they are as much a part of the Judeo-American Consumer Culture as anybody else. You are asking them to lift their snouts from the feed-trough. "Tain't likely," as one agronomist would say. "You can call hogs to the swill, but you can't call them away from it." These hogs of ZOG have long since been called, & they don't want anything to interrupt their swilling, despite the oncoming economic, social & demographic tsunamies.

We must understand Hitler in context. The context was that the jew-banksters had arranged World War II to follow their profitable 'harvest' of World War I. As one delegate to the Versailles Conference after World War I observed: "We are setting up powder kegs all over Europe," in preparation for another conflict. Former German Chancellor Bruning wrote that Hitler was being financed by the same bankers as had financed Bruning's campaign, & that those same bankers were the ones who'd financed Roosevelt, Churchill & Stalin. The bankers did not want a Communist Germany, for, if the USSR & Germany were to go Communist, there mightn't be the war the bankers sought. Even in the Weimar period, Germany was 'illegally' testing new tanks & aircraft in the USSR, which was forbidden by the Versailles Treaty. Germany had to be strong enough to participate in World War II, but not strong enough to win it. Even so, it was a near thing for the banksters. Hitler was supposed to invade England, so the Red Army could roll over all of Europe. But Hitler broke the banksters' rules by attacking the USSR before it launched its invasion of Europe. That's why the jews can never forgive Hitler. See "The Icebreaker" by Suvorov.

Hitler's eugenics program was not original. It originated in the USA, where it was already in practice, to the extent of sterilizing the unfit: Those dependent on public care, such as idiots & some insane people. Scandinavian countries of the 1930s restricted the reproduction of those on public assistance, but entropy now reigns supreme.

Most White Supremacists, as distinct from White Nationalists, desire to preserve any critter with White skin, regardless of defects. That is why they are not in favor of eugenics, in my experience. Yes, they are usually Christian, also.

As I see the situation, our chief enemies are entropy & inertia. When I got to drive a steam locomotive in Nicaragua, for a short distance, thanks to the indulgence of the crew, I noted that full pressure was required for the start, to overcome inertia. Once it got up to speed, the steam flow could be reduced, for that same inertia now sustained the speed of the locomotive & its train.

Whatever ideology we adopt must be the opposite of the present hedonistic culture, & it must serve the race, of which the individual is a part. All the best. ORION!
