

11 JUN 08

Hail Phil! Many thanks for your letter of 7 JUN 08 & the trenchant enclosures. Bob Chapman is certainly courageous, for he connects the evils we suffer with the evil-doers themselves. In my experience, jews know one is "anti-jew" if a Goy mentions even one jew in an evil role with no mention that he is a jew. This fools most Goyim, but never fools a jew, for he is alert to his identity & interests at all times. Most Goyim don't even know who they are, outside their role as consumption-excretion units.

Obviously, when money falters, commodities (things people need) not only maintain, but increase their value. A welfare woman told me I could double my cash income on S.S.I., but if I were to do so, my ration of REAL goods & services would be reduced considerably. Thus, I'd play with more zogbucks, but fewer things I really need, such as food, shelter & medical coverage. In other words, if I were to double my cash income, I'd be stupid, or more stupid than I already am.

In addition to his financial revelations, Chapman includes disclosures on ZOG's foreign gulag system & its arbitrary round ups of Goyim, which seem like a practice exercise, maybe to get Goyim used to the idea of being rounded up, seemingly at random, by our kosher DHS Cheka. It reminds me of public school as practice for later life in prison.

If we look at the demographics & economics of Mexico, our ZOG is doing everything to bring about its North American Union: Transfer Mexico's surplus population into the USA & even Canada, while curtailing Mexican development. With the advent of the NAU, I suspect that oil exploration in Mexico will take off, rather than remain on the runway, out of fuel, as it seems to be doing now. I find it useful always to ask "Cui bono?" If I see ZOG benefiting, then events are explicable. I agree with FDR that "things don't just happen the way they do. They are MADE to happen the way they do." This is because the powers that be strive to bring about changes in their interests, rather than changes per se. They'd be silly if they just let changes occur & rolled with the punches. Financial circumstances, wars, &c. are not happenstance. They are man-made, on behalf of certain men, even if such events are MADE to appear accidental.

I suspect that the jews will be true to their nature, as they advertise in their Old Testament: They will fleece their current host & infest another. The "BRIC" countries you mentioned are likely bases for a New Jew Screw, after the hebes dump their USA Goy slaves. The jews have no eternal friends, nor eternal enemies; only eternal interests: "Gull & gut the Goyim. Tell them what they want to hear, & take what we want." We are fools to let them into our living space & live OFF us, like the vampires they really are. Obviously, such abundance as we've so far enjoyed has made us fatheads, with considerable assistance from Christ-insanity. That's an illness we must cure before we can survive as White people, for Christians always serve the ZOG, against their own interests. As for Whites who want to be jews, I propose to have nothing further to do with them. At best, they may function as Anti-Zionist Alliance activists, like other non-Whites in mind or body. I do not tolerate those who hide their agendas under the cloak of White Nationalism, for they prove themselves to be false in most respects.

There are those whose views rest on their financial wellbeing, whereas my views have been hard-won in the school of adversity. Hence, I do not take my White Nationalism lightly, as some sort of fashion accessory, as do some.

The ethos of Consumer American Society will suffer traumatic reversals. I recall the era in which energy was to be expended, rather than 'saved,' for energy was 'cheap.' Income was spent in the acquisition of things, rather than in the doing thereof, for there was no free time in which to enjoy leisure. I caught onto that racket as soon as I joined the workforce. I soon discovered the wisdom in the Spanish saying: "Health, love, money, & TIME to enjoy them." Hence, I escaped the Judeo-American ratrace by going to Colombia, where I found their ongoing civil war to be relaxing, compared to the American Talmudic Treadmill to Oblivion. My escape was not a matter of intellect, but of instinct on my part. Hence, I have no regrets to mull over, only victories, which I can appreciate during this lull before the storm of disintegration & probable chaos in Zoglandia.

One approach to the increasing cost of living will be cut-backs, but the solution must be basic re-organization according to practical priorities. Freedom must be redefined as being something other than consuming fuel to flit back & forth like frenetic flying insects. We must consider an automobile-free lifestyle, similar to the previous era of public transportation & rational city planning, with short distances between supply & demand. Suburban spread must stop, for it devours both land & fuel. I'm sure you can think of more solutions. All the best. DOWZ! ORION!

*Phil*
