

11 JUN 08

Dear Claude: Many thanks for your letter of 2 JUN 08 & your outstanding enclosures! I congratulate you for your courageous efforts at reducing the kosher Krap Kontent of the so-called newsmedia. As you say, the truth needs to be told, & we who know the truth are obliged to tell it. You offer the sheeple a choice: Be men or cattle (Goyim). Those who heed the truth will lead the lives of men, but those who shun it will die like cattle, clueless as to the reasons why.

I appreciate your insights on the Zimbaboon invasion of South Africa & the violent reaction against it by Black South Africans, with obvious government involvement & perhaps instigation. The Zimbaboons are being herded, first out of Zim, then back in by Big Players such as China & the Commodity kikes of international finance. The prizes are power & wealth which are obtained by such tools as war & money-manipulation, in addition to simple theft & fraud, often promoted by shabez Goy politicians whose lies are coated with sweet bafflegab. Of course, such ruthless avarice is beyond a liberal's comprehension. They are the sort who dine on filet mignon while they denounce butchers: Ignorant hypocrites. Liberals really need to give up all they have to the poor, who are so 'noble' that the liberal should feel privileged to join their ranks. Usually, the liberal wants others to donate to his causes. This is why the rich favor 'foreign aid,' for it creates a market for their goods & services that the foreign aid recipients cannot buy for themselves, if they wanted them in the first place. Who buys the goods & services of foreign aid? The tax-payers of the donor countries, of course. Such a deal. Such a racket. In more honest times, "Foreign Aid" was called DUMPING.

For the Chinese, Blacks comprise an "overburden" which must be removed so they can get at the wealth beneath. Blacks are surplus to requirements in Africa & elsewhere, it appears. No, they were never 'cheap labor.' I read an article you sent which praises "subsistence farming." How romantic & how ridiculous! Subsistence farming does not & cannot produce the surpluses necessary to maintain commerce & industry, nor city populations. The only genocide plan for World War II was the Morgenthau Plan of the jews, aimed at exterminating all Germans after they surrendered on 8 MAY 1945. It was stated therein that the destruction of German industry would cause the death of two thirds of the German population. Germany was to be a strictly agricultural economy under Morgenthau, before being divided amongst its neighbors, after the mass die-off of the German people. This plan was being enacted as the war ended, & General Patton was apparently scandalized by seeing U.S. soldiers stopping farmers & making them dump their milk in roadside ditches before they reached the cities' starving people. For that, Patton was killed by FEDZOGUSA. He should not have spoken to reporters until he wrote his book exposing the genocidal occupation of Germany. The jews mitigated their Morgenthau Plan when they learned that the Germans would be their willing slaves, who could be destroyed by fattening & ^{by} introducing non-German "guest-workers", along with alien occupiers into the German population. As a rabbi would say, "There's more than one way to gut a Goy."

Under subsistence farming the territory of former Rhodesia could support some 300,000 Blacks around 1890, when the first White settlers arrived. When Traitor Smith handed over the country to Marxist Mugabe in 1980, I understand that the population had grown to over 7 million, by actual census. With the departure of the White farmers & their surplus food, Zimbabwe was back in the economy of 1890 with a surplus-dependent population of 1980: Six million seven hundred thousand surplus mouths to feed!

The jew "Lenin" was faced with starvation in Russian cities. It seems that the farmers were satisfied to live on their own production, without the manufactured products of the cities. As I recall, for "Lenin," Russia seemed to have two types of Goyim: "Useless eaters, & damned wantless people." The wantless were the farmers whom the Reds terrorized into producing surpluses. According to "Lenin," The Terror was essential for the success of Bolshevism. Eventually, The Red Terror became the Ukrainian Famine under "Stalin."

Black agriculture may not produce much food, but it certainly produces deserts, as I saw occurring in former Rhodesia. Black subsistence farming includes over-grazing & over-logging as well as over-population, so the land is less fit to feed Africa's post-1980 population than it was in 1890. I have no ill will toward other peoples, for they usually are their own worst enemies by their acts of omission or commission. Ignorance & folly are abundant & wisdom is exceedingly rare, so Nature is our judge & our executioner. And, by the way, Nature is Nazi. My impression is that a great culling is in store for featherless bipeds, whom the fat of the land has made into fatheads. Poverty & prosperity have produced an over-abundance of Problem-Makers, with whom the few Problem-Solvers can no longer cope. So, over to you, Mother Nature. All the best. ORION! 88!

Eric

2)

P.S.: When I tripped over The Cold War Hoax in 1968, in Peru, of all places, I was banned from the USA & the USSR simultaneously, including all Soviet Bloc countries. When I was enjoying my first weeks of exile, I checked with embassies in Mexico City. That's where I learned that I was banned from the USSR & Cuba. I confirmed this ban when I visited the DDR in 1969, after being banned from Sweden, where I'd been promised work by the Swedish Embassy in Lima, Peru, after I was banned from Peru. The total number of countries from which I was deported is 5: USA, Peru, Sweden, DDR & Rhodesia. In 1982 Canada tried to ban me from entry during a 2-week long immigration hearing, during which time I resided in the Toronto Don Jail. I must say it was better than the roominghouse infested with cockroaches where I lived. The food was better & the schedule was restful, as compared to the Zundel chaos. Since I was never in Cuba, I could not have been in jail there.

The blightwing & the jews have written a 'virtual' biography of me over the decades, which you may peruse on the Internet. I evolved from being "a fugitive FBI agent" to "a CIA/KGB agent" to "a pen name for Robert Frens" to "a committee of former Gestapo officers" to "a real person, a former CIA supervisor of Mossad hit-teams," as I last heard. Two revisionists were discussing me as such, as if any of it were true. One blighter wrote that I was in charge of a shipload of arms bound for Liberia from Colombia. The ship was intercepted by "international authorities," but I was "rescued by a CIA helicopter." I want the movie rights to this saga, of course. But I also want all the back-pay & pension accruing from my alleged career as "CIA supervisor of Mossad hit-teams," which must be quite a quantity of shekels & zogbucks. Ha! Compared with such stories, my real life is trivial & boring.

Poor Brian! In my last letter to him, I asked if he ever found a 'normal' Irish person in Ireland. My impression from him is that all the Irish are dysfunctionals, demented, druggies, drunks & dimwits. How could anyone work with such types, let alone wish to save them for a national future, if there is one?

The only thing which explains Bush's role in the Middle East is Israel. Former Mossadnik Victor Ostrovsky wrote in "By Way of Deception" that Saddam's Iraq was #1 on Israel's hit-list, followed by Syria & Iran, in no particular order. T.E. Lawrence promoted Arab Nationalism against the Turks. As British General Fuller wrote in his book on war, "democratic war" uses propaganda to get soldiers on the cheap. This began with Napoleon's use of newspapers to propagandize the French. Propaganda produced much larger armies than did princes' ability to pay their soldiers. But propaganda bears a price, for it leaves a residue of hate in the minds of those propagandized, which is why they fought in the first place. Consider the toxic residue of hatred fomented by anti-German propaganda, before, during & long after World Wars I & II. The volume of anti-German propaganda greatly exceeds that to which we were exposed before & during World War II. Its message is simple: Germans are indoctrinated to hate themselves & to love all non-Germans, while non-Germans are taught to hate the Germans, forever! As I warned some Goyim in Toronto: What is said of Germans now will be said of Whites later, & we didn't have to wait very long for that. The jewish message is: (1) Germans are bad, & (2) All Whites are like Germans. Too bad we are not.

But I digress: Arab Nationalism remains after the defeat of the Turkish Empire. Israel wants it to go away, by retribalizing the Arabs as they were under the Turks, a simple policy of "divide & rule," kosher style. Bush could have had all the oil he wanted from his puppet, Saddam, but Israel wanted Saddam, a SECULAR Arab Nationalist, gone. When jews command their Zionist puppets of the land, the Goyim obey, contrary to their own interests. Former Secretary of Defense Forrestal told President Truman that the existence of Israel would harm the USA in The Middle East, so Forrestal was "suicided."

The Zionist empire known as the USA is in poor shape to come out of its demographic/economic tailspin. Its Goyim are hypnotized by jew-lies that we are a "nation" & a "democracy," when we never were. Typically, Whites are the main victims of these illusions. The rich rascals who rule over us want non-Whites to lower our standard of living, just as they export jobs to China, so our incomes are being reduced from both top & bottom: I lose a good-paying industrial job, only to find that an illegal immigrant has taken the menial job I need for bare existence. Plus, my taxes go to support the alien invaders' families. That's why our fatcat felons & traitors who hire the illegals can say that they are 'cheap labor.' I learned in Africa that there is no such thing as "cheap labor." The mestizo invasion is a net loss to Whites, & their rapid multiplication at our expense increases the burdens on our welfare & our prison systems. Since their arrival, Yakima's budget is consumed by criminal justice costs. "Cheap labor" indeed!
