

23 AUG 08

Hail Daniel! Many thanks for your letter of 16 AUG 08. Let's hitch the horse before the cart, for a change. You mentioned the Amish, the Quakers & the Mormons. You will note, I hope, that they did not become Amish, Quakers & Mormons AFTER they settled in an area, but BEFORE they chose their area of settlement. That's how "homelands" are made, not by the opposite. Homelands DO NOT create Nations. Nations create Homelands, so National Consciousness must come first. We cannot 'sneak up' on fatcat refugees who drive out White workingclass people with high rents, as they have done in the NW & other rural places. A White Nationalist message would be lost on them, for I know such people. They have done all right in ZOG's empire, & they want to keep it that way, so the White Race can go jump in a lake, unless there's a drought, as far as they are concerned.

It will be interesting to learn how you intend to acquire land for a "homeland," for all land is subject to jurisdictions & existing ownership. Thus, you must buy land or squat on it, until the ZOG-approved owner comes along to turf you out.

I apologize for causing confusion in regard to the word, "mestizo." That Spanish word means Eurasian, just as mulatto means  $\frac{1}{2}$  Black- $\frac{1}{2}$  White, & sambo means  $\frac{1}{2}$  Asian- $\frac{1}{2}$  Black. It has nothing to do with being Mexican per se. What I tried to point out is the great number of Eurasians, Anglo-Eurasians, who are misclassified as "Whites" by ZOG. This is what I meant. My use of a common Spanish word does not mean that the subject is hispanic. If I use the word, "Gringo," to refer to myself, that does not mean that I'm hispanic. It is a word hispanics of the mestizo variety use to refer to me. I am also called "nuevo" or "blanco," which mean "White." In Mexico City, I received a lefthanded compliment from a Mexican shopkeeper who referred to me as a "gauchupin" or "spurred one," meaning Spaniard. After living in Spain for 2 years, my Spanish accent had become Spanish, rather than Mexican. If my accent had been English, I'd have been a Gringo, but since I'm White, I could never be a Mexican, regardless of my accent in Spanish. The same rule applies here in Brownest Yakima. So, how much asiatic blood can one have & still be deemed White? None. A pale Injun is still an Injun. The recent report on asiatic diseases' incidence among American "Whites" indicates the great percentage of Anglo-mestizos, that is Anglo-Eurasians in North America.

The programs you mention all require people. These people must be found, wherever they are, to provide the social infrastructure for the homeland, so the task is in finding people of good quality first, & then finding a location where they can work. I enclosed the tragic letter from "King" K. merely to show you what I mean. Would you want such types living in the homeland? That is what you will find if you choose land first & people second.

I am intrigued at your statistics, for they do not match any of mine, which come from 'mainstream' jewsmedia sources, as well as personal observations. I agree with a multimedia approach to disseminating information, but your idea of the Internet as a newsmedium is becoming obsolete. I note that Obama is informing his supporters by cellphone text-messaging, as to his choice for Vice President in the upcoming campaign. Wha happen to da nooz paypuhs? All Goyim can turn off features which make them uncomfortable. Some don't read newspapers, for fear they will encounter something unpleasant, so it is not only surfing the 'net which may cause dismay. Flipping through the pages of a jewspaper can produce the same response, as does channel-surfing on TV or radio. It is obvious from my sources that the Internet is gaining an ever-larger role in the dissemination of news, & cellphones now have the capability of making every user into his own newsroom, complete with TV coverage. The jewsmedia monopoly on information is broken, as never before.

I receive downloads from my international network of snail-mail correspondents, with which I break through ZOG's censorship zones. I just received downloads from Haaretz, an Israeli newspaper, about the role of jew arms merchants in Georgia & Russia. This news is only available on the Internet, unless one subscribes to Haaretz. Were I to subscribe to all print media sources that I use, my floor would collapse from the tonnage, aside from the fact that I'd be broke.

My information about the Chinese financing of Fannie & Freddie comes from Business Report, which is published in South Africa. You are wrong about the role of the exchange rate's influence on Chinese investments overseas. They have accumulated so many worthless zogbucks that they are desperate to spend them on real estate, commodities & takeovers of foreign companies. I look forward to your 'graduation' from the ZOG-gulag, for it's certainly exciting on the 'outside.' Then you can test your ideas in reality. ORION!

*End*
