

16 SEP 08

Hail Daniel! Many thanks for the latest issue of Separate Living. It appears that independence is busting out all over, at least from Montana to Hawaii. Previously, we would see vigorous U.S. government reaction to nip such proposals in the bud, along with allegations of treason. But now, the federal government or ZOG is going global. This is evident from job exports & alien imports, legal or not. The New (jew) World Order is taking shape, as desired by the Rothschild founders of the USA.

Essentially, the foundations of the NWO are interdependence, rather than self-sufficiency, which greatly enhances the power & profits to middlemen, such as traders, shippers & banksters. Former Rhodesia was under official U.N. blockade, yet our trade was thriving. Major commodities such as chromium & tobacco were sold to the USSR & Red China. As usual, the middlemen (jews) in these transactions made huge profits, which would have been far less, had there been no trade sanctions. It was no surprise that these same jewish interests imposed the blockade in the first place, as they did with Nazi Germany. First came the Zionist boycott, then The Transfer Agreement, which effectively put German trade in jewish hands.

History is sprinkled with countries lacking economic & hence political self-governance, such as ancient Athens, Germany's 2nd Reich, Cuba, Rhodesia/Zimbabwe et al. When Castro took over Cuba, the little jew Trotskyists of Red Berkeley University were ecstatic, without benefit of that Israeli manufactured drug. Since I was studying Latin American problems of development, I predicted that Cuba had been an economic colony of Spain, & then of the USA, without diversifying its economy toward self-sufficiency; thus Cuba would become a colony of the USSR. The ancient Spartans knew that there can be no political self-governance without economic self-sufficiency. This question was raised in the Hawaiian article. Those islands are populated by many non-Hawaiians, & I understand that their economy relies on foreign sources of commodities & income. Recent tourists have told me that Mexicans do much of the hotel-related work, & that there is a Spanish language radio station for the hispano-mestizo population of Hawaii. It appears that the native (Polynesian) people of Hawaii are in a similarly dependent position as are the 'sovereign' Indian nations of the mainland USA. Can they drive the 'foreigners' out of their chosen homeland? Can they live without foreign income & commodities? The Cubans could not.

Under the NWO, geopolitical states are obsolete. Economics & politics are now global, under the tribe of international banksters, a merchant money mafia. Military forces are becoming privatized & internationalized.

I understand that Montana is rich in untapped oil resources. Could the diverse people of that state live off their natural resources & produce their own goods therefrom? Without the labor & capital capable of economic self-sufficiency, de jure independence would be meaningless, for the facts would show otherwise. Without the means to utilize their natural resources, Montanans could sell or barter them to outsiders, thereby becoming dependent on those outsiders & vice versa.

And what if small political jurisdictions displeased the merchant-bankster mafia? I understand that they have the mercenaries of Blackwater Security at their call, which has all the trained killers & latest lethal technology at their disposal. We shall see in due course what becomes of these independence proponents, but under present circumstances their prospects don't look profitable.

Nationalists must adapt to 'the realm of the possible,' by tailoring their tactics accordingly. If we don't, our situation will become hopeless, as well as desperate. Only change of mind can save Our Kind. ORION!

*End*
