## HOUSE OF ORWELL

By

*Joseph G. Stano*

The lavish, highly emotional reporting by the news media on the opening of a new Holocaust Museum in New York City stands as a classic example of Orwellian "doublethink," defined by George Orwell as "... the power of holding two contradictory beliefs in one's mind simultaneously, and accepting both of them." In this case, while endlessly professing a passionate dedication to freedom of speech and freedom of the press, the whole of the news media has routinely censored any challenge to any part of that massive, undocumented, unproven, and in some cases scientifically impossible, collection of tall tales known as the Holocaust. Like the tyrannical "Party" in Orwell's "1984", the "Holocausters" can "...make the laws of nature." And do it with the full support of the entire media.

It is a tactical blunder to build another Holocaust Museum at this late date, when the Holocaust as presented to the American people by the media has been long abandoned by some of its most ardent supporters. Even the Yad Vashem Holocaust Museum in Israel has long abandoned the Holocaust that is fed to the American public daily—if not hourly—by the whole of the American media. A cowardly news media routinely censors well-documented history for "Hollywood History."

As with Orwell's "Minitrue" (Ministry of Truth), the American news media's "Memory Holes" are operating at full capacity. With each passing year there is an ever increasing amount of "not newsworthy" embarrassing truths to be shoved down media Memory Holes. Unfortunately, these truths keep on coming back up!

Some of the not newsworthy "unmentionables" that simply won't stay down:

Way back in 1960 the Yad Vashem was forced to acknowledge that there were no "death camps" or "gas chambers" in

all of Western Europe or all of the German Reich, since all of these camps had been open to inspection by scholars and scientists, and all of these camps were determined to have been "work camps."

This presented several problems:

First of all, the United States executed more than 450 Germans, "In the name of the United States and the American people." A great many of whom were executed for operating "Death Camps" and "Gas Chambers" in Western Europe and Germany—where they didn't exist! To put it mildly, this is a rather dishonorable page to add to the history of a nation that professes to believe in justice.

Second problem: Five of the fabulous six million had been parceled out to all the camps in Western Europe and Germany, with only one million allotted to camps behind the Iron Curtain in Poland.

Orwellian solution: Simply pick up the 5 million mythical victims and their mythical gas chambers and throw them over the Iron Curtain into Poland where noney scholars and scientists aren't allowed to go.

Or, in Orwellian arithmetic: Five from six equals six! Overnight, Auschwitz went from "almost a million" to "four and a half million." A rather astonishing fact that the whole of the American news media found "not newsworthy." As would a declaration by the Holocausters that the world was flat and the moon was a green cheese.

George Orwell called this Holocausters exercise "black-white," or "the ability to impudently claim that black is white in contradiction of the plain facts."

The news media's response was perfect Orwellian "doublethink": A groveling, servile acceptance of "the mutability of the past and the denial of objective reality." Broken on the Holocaust wheel, for the news media 6 minus 5 was now 6.

When execution expert Fred Leuchter went to Poland—believing in the Holocaust—to examine the alleged "gas chambers," he found them to be scientifically impossible. In

16 SEP 08

Dear Claude: Many thanks for your letter of 6 SEP 08, the outstanding stamp collection on your envelope & the great selection of information inside!

Wayne seems to be disappointed that his Martian Migration is not catching on, nor is his rational recipe for religion. He chides me for lack of success in promoting White Nationalism, but I am confident that White Nationalism is relevant to Whites, & will become moreso as events show us. I try to point out to Wayne that a Martian Migration without Whites will be irrelevant; that our enemies have all the money required to do it, so jews & their minions would likely be first to grab Mars, rather than we, who are jew-slaves. Apparently, Wayne believes that his ideas make jews irrelevant & therefore unimportant, even as no one heeds him, to my knowledge. If we cannot convince people to prepare to settle Mars, it is similarly futile to tell them that they should defend their "homeland" against alien invaders. Apparently, he thinks that deeds should come before thoughts, so a change of mind is unimportant, just as long as we find ourselves on Mars, or orbiting nearby, or living in a "homeland" which we have somehow obtained without a thought or a fight. None of this makes sense. Wayne seems already out in orbit, in terms of worldly affairs.

In regard to supernatural religions, Jefferson had the best observation: "One must be a fool or a fraud." Thanks for pointing out the destructive power of love, which is a form of energy, as is hate. Both can be used to build or to destroy.

As you say, human inequality translates into unequal distribution of the world's goods & services. How could it be otherwise, & why should it be otherwise? Those who can't get "their fair share" of the goodies need only blame themselves. When I told Wayne that jews have a strong sense of Nation, & they use other peoples like livestock & as natural resources, Wayne said that they are parasites. So are lions, tigers, eagles, hawks & other flesh-eaters. Man the Hunter preys upon lifeforms which prey upon plants. If I were a plant, I could accuse all non-plants as "parasites," except for the fact that some plants prey upon insects, & other plants, like ivy & mistletoe, prey upon plants for light & sap. Since lifeforms live off lifeforms, all may be accused of parasitism to one degree or another. Healthy lifeforms resist parasites which live off them. For us, the jews are parasites, just as we are parasites for the plants & animals which we eat.

Thanks for pointing out the propaganda trick in "Exodus," whereby the burning Arabs did not cry out in pain. This was clever, for it denied sympathy toward the jews' victims, as if they were so alien that they felt no pain from the flames. When the enemy is dehumanized, he is easier to kill. That's why jews call us "Goyim." I, too, am amazed at the biblical statements which 'believers' ignore. The mythical Jesus is a study of contradictions: A man of peace who "brings a sword," one who forgives & damns to "everlasting fire." Jesus was a peculiar "god," for he changed his mind in Mathew, from telling his disciples to proselytize only "the lost sheep of the House of Israel," & soon after, he tells them to proselytize "all nations." Obeying such a god would be dangerous, for he is apt to change his mind, thus making fools of his followers.

Socialism looks out for the people's welfare. If it doesn't, it is a racket, like jewish socialism for the Goyim of Russia. The German people thrived under National Socialism so much that the jew banksters' war was necessary to destroy them. Yet, the programs of N.S. remain valid. A man who is right may be killed, but he is still right. The jews believe in survival at all costs, as long as it is Goyim who die for jew goals, & not the jews. Jews are vampires, individually, & Israel is a vampire, collectively. Christinsanity tells us to "feed the vampires, & forgive them," just as the vampires have taught those frauds & fools who promote the cult of toxic theology. Religion is a good substitute for thinking, & its absurdities promote the uncritical acceptance of subsequent swindles, such as: "We fight for freedom in Iraq," as I've heard the hypnotized Goyim recite. Were they trying to prove it to me, or to themselves? Of course, proof is unnecessary. The subject of Hebrew Hypnosis need only repeat what he has been told.

The Georgia situation is intriguing. What will it lead to? The Kosher Kaleidoscope of politics can shift suddenly, with many surprises, as it did in 1941. As you say, will Georgia be the 2008 version of 1939 Poland? We shall see, whether we like it or not.

Hurricane Season is a great intelligence test of the U.S. sheeple. Hurricane Ike was heading for Texas, so evacuation orders were given to people living in areas likely to be most affected. Many remained. When the water & wind rose uncomfortably, they cried for rescue, only to discover that these effects of the hurricane prevented rescuers from coming to rescue them. Surprise! All the best. ORION! 88! *ERIC*
