

20 SEP 08

Dear Wayne: Many thanks for your cogent letter of 15 SEP 08. Yes, the riddle remains: Why are Whites so indifferent to the question, "To be or not to be?" One thing is certain: If Whites are paid to breed, they breed, so economic factors are important in White behavior. The former Soviet Union offered a stingy baby-bonus, but Whites like living space, so only Asiatics took advantage of the extra cash for extra crowded & squalid living conditions. The White population continued to dwindle.

The post-World War II White baby-boom in the USA was sparked by propaganda, cheap mortgage payments & social convention, in which the husband was supposed to earn enough to support a wife & kids at home. Merchants told me how they wanted people to marry & have lots of children, to enhance their profits, for "People with kids need all sorts of things," as a shopkeeper told me. When mothers had to work, in addition to their husbands, the boom began to bust. In the 1960s, the advent of the birth control pill most affected those who should have had children, rather than those who shouldn't. Welfare subsidized the breeding of the unfit, as it now subsidizes the breeding of alien invaders. Taxes impose an additional burden on Whites of childbearing age. "Affirmative action" hiring & scholarships favor non-Whites & females, so White males are less able to support families.

The role of religion is questionable in reproduction. Male supremacy existed in The Middle East & Black Africa, as well as Asia, long before the advent of pro-baby cults. As with other animals, males seek to fecundate as many females as possible, adding each one to their herds, as do polygamists, horses, lions, et al. In Latin America, mestizo machismo is demonstrated by how many children a man can father, regardless of his inability to feed them. The question is: Can a religion promote breeding, or does the religion merely approve that which is already going on? In the case of Semitic religions, I'd say religion places its stamp of approval on that which is already occurring.

A religion of reproduction for Whitey which appeals to reason seems not to motivate. We can convince him that his failure to reproduce will mean the extinction of his race, to which he yawns & says, "So what? Sex is for fun, not for reproduction." Positive & negative incentives are lacking. In Puritan America, a tax was levied on bachelors & spinsters, but I'm not sure if one were levied on childless couples as well. As a negative incentive, we could threaten childless Whites with eternal damnation in an afterlife.

As you say, a religion can contribute to the formation of a community, & community is supportive of reproduction. The Mormons believe in "communitarianism," which no doubt aids their reproduction. "Many hands make light work," & mothers appreciate community members who help them with household tasks, as did the female branch of the Hitler Youth in National Socialist Germany.

As you say, we may come to such a pass that any group of Whites will be subject to Zionist persecution. The recent polygamy 'scandal' was directed at Ostensible Whites. As I understand, the ZOG raid on the White community was instigated by a negress who falsely complained of "abuse" therein, although she was not a member of the community & had no contact with its members.

Motivation is the crux of the problem. How can Whites be motivated to seek other White people toward the formation of a community? Mutual agreement on a religion would certainly be helpful, but how many Whites crave community? We live very much in an individual consumer society in which ideas & information are also items for consumption, as entertainment. To this extent, lies & truths are irrelevant, so long as they are entertaining.

I agree that those who long for social/economic "collapse" are infantile fantasy mongers, for such a collapse is not the solution to our problems, but only the culmination thereof. This delusion is similar to "heading for the hills," as the "answer" to some major problem. "Collapse" is but the beginning of real problems, rather than their solution. Did White Rhodesia suffer a collapse? Not at all; merely the quiet, orderly handover to Black Marxist Misrule. Did White South Africa suffer a collapse? No, the Whites gave the whole country to the Blacks in a fit of liberal self-righteousness. Look at the numbers of Whites who want Obama in office. The whole country can go dark without the necessity of a "collapse."

The bankster depression of 1929 to 1939 did boost Communism in the USA, but the real reason was to produce willing recruits for the war which was planned at Versailles. For that reason, FDR's son in law, Col. Curtis B. Dall, told me the banksters refused to let FDR borrow enough money to get us out of the depression, until the war production orders came in from Britain. Hitler banished the depression by 1935 in impoverished Germany, but FDR could not do so in the wealth^YUSA, which was why FDR hated Hitler, according to Dall.

2)

In regard to lack of love for their own kind, including their children, I've heard Whites in Africa & America say of the dire future for their children: "That's their look-out." Such parents don't give a damn. Do I love the White children I never had, precisely because I never had any? Does parentage breed hate of one's offspring? In some cases, it appears so. Well, even radio pundits say that "Military recruitment goes up when the economy goes down," so some things never change: Goyim never seem to learn.

As you say, the O'Neil colonies could be used as bases for planetary colonization, but by whom? Do any Whites have the motivation & the money required to colonize 'off-planet' on behalf of Whites? I believe that is the big question.

Motivation is the key to survival, so our job is to find it. I suspect it will be 3-dimensional: The right person with the right idea at the right time. Assuming you have the right idea, the task is to broadcast it as widely as possible, in such a way that it appeals to the proper recipients. In this respect, it is never too soon to start, which you are doing presently. Then, at the right time, someone may remember that they'd heard a great idea, which would solve a major problem... We can only hope that they won't wait too long.

As you truly say, our battlefield is in the hearts & minds of our White people. Only change of mind can save Our Kind. In this regard, Whites must be convinced that they have something to offer The Universe: The fulfillment of our destiny as Whites, rather than pseudo-Semites. As I wrote in The White Power Manifesto: With White Power we shall create a great future. Without White Power, there is no future. Join us & make the future great! I wrote those words in 1977. Since then, I see no progress whatsoever. The blightwing shunned my words with fear & loathing, as is typical for them. My contribution to the White Cause was deemed to be insidious, subversive, & in the USA, "too American!" Amazing. My 'original sin,' as I learned, was that I did not kow-tow to the existing egos by prostrating myself before them & proclaiming, "Oh mighty omniscient Blighters, I am come to do thy will!" Even that would not please them, for each ego has his particular personality cult, which precludes any sort of blightwing unity.

I suspect that the ostensible disagreement about your ideas may actually stem from the egos who want others to heed them, rather than you, regardless of the validity of your statements. In the blightwing, it is not so much what is said, but who says it, that counts. If there were only the blightwing, you'd have your resistance aplenty, moreso than from the unconvinced & uninformed, who fortunately outnumber the blighters.

As you say, we must try to save whom we can from the masses of White asses. The present bankster depression is unlikely to herald a repeat of World War II for the USA, but its economic, demographic & political dissolution, in favor of the New (jew) World Order of globalist bankster rule. The USA may serve as launchingpad for the NWO; thereby going out of existence, to be replaced by The North American Union of Canada, USA & Mexico, as well as Central America.

Most sheeple have feminine traits: When they are fed, nothing could be better; when they are hungry, they believe the starvation to be temporary, until they starve to death, like the Ukrainians under jew rule in the 1930s. The rule seems to be that those with full bellies won't fight, & those with empty ones can't fight. Privatization = Globalization. U.S. government posts in intelligence & military service are now 25% private contractors in the former, & over 50% in the latter, according to various sources. Aliens who serve in the U.S. military thereby earn citizenship, like the non-Roman legionaries of ancient Rome. To globalism in government & industry, increasing demographic diversity is added to this bankster empire of Zionism, along with dual citizenship. Naturally, such mercenaries will be loyal to their paymaster, rather to any pratings of patriotism. In brief, we work from bases set in quicksand, for behind the facade of illusion, great changes are occurring that bode ill for Whites. These changes occur much faster than Whites can think, it would appear, so they will likely occur before Whites can act. To say that a collapse will solve our problems is similar to saying that the sinking of the Titanic 'solved' the passengers' problems.

The masses of asses may think that economic crises are temporary detours on our normal paths, but this never has been so in recorded history. The masses merely accept such change as the 'new permanent state of things,' as if they always existed in the way they do. As Orwell wrote of Winston Smith: "Was he the only one with a memory?" Stay tuned for exciting times. All the best. ORION!

Eric
