

3) P.S.:

9 OCT 08. Dear Wayne: Your letter & enclosures of 6 NOV 08 arrived before I could make a photocopy of the foregoing, so I can reply in one letter, rather than two separate ones, for better continuity.

I think that the jews are strong because we have become weak-minded, thanks largely to Christianity, which the jews even interpret for us. Liberalism is basically Christianity without a Sky Jew. No, having any ideological devotion is not the salvation of a civilization. It's having the right ideological devotion, as a guide for racial survival. Jews value race, for themselves, & they want all other races to mix themselves into Babel. What jews say to us is usually not what they do themselves. The Protocols of the Learned Elders of Zion lists the tactics of their double-talk. One passage states that "We shall lead all points of view, including those which we know to be wrong." That way, all groups will be led by a jew. As I said to a Christian preacher who complained about the jews: "If I were to wave a magic wand & say 'jews be gone,' what's the next thing you'd hear?" The preacher didn't know. I said, "You'd hear the thunder of Goy feet stampeding to fill the jews' empty shoes." As Jefferson wrote: "A Christian must either be a fool or a fraud." In my view, we would see lots of Goy frauds taking over from the absent jews.

In the meantime, the Christians long for their alleged afterlife, while the jews claim their rewards in this life. Some jews proclaim that their god is the jewish people. Why can't Whites think of that? To an extent, Ben Klassen of The Church of the Creator did, but not in so many words, if I recall correctly. The jews preach universalism on behalf of their tribalism. The real problem is that the jews are our masters, & they are jealous ones at that, for no herdsman wants to see his cattle wandering about on their own.

Jewish minions like the Freemasons are tasked with watching us, as "The all-seeing Eye," so any group of Whites who would like to escape jew rule in space would be betrayed by Whites in their pay. There is no place we can run to.

As to your questions, where & how? The place we must conquer is our own minds. Then we must not try to flee, but to fight our racial enemies with every means available. Only change of mind can save Our Kind. We must make do with the means we have, not the means we'd like to have, for Whites are light-years away from seeing the danger they are in, let alone wanting to do something about it, except to watch niggerball on talmud vision or hide their heads under their pillows. Of course, drugs are now the opiate of the masses, not religion, to make things worse. We could send such featherless bipeds off to some safe haven in space, & they would be no better off, for they are not suited for survival, mentally or physically.

As you say, our society is rotting & tottering toward collapse, but few if any want to escape. I know of nobody, aside from a couple of "head-for-the-hills" romantics, who even think of leaving town in a demographic crisis.

Let's imagine that you have your spaceship & your O'Neill space station in orbit, & you can advertise them in public. Do you know anyone who'd wish to leave Earth to become a space colonist? Would he be White? What about his wife & children?

I'm reminded about the old fable of belling the cat. The mice held a meeting to discuss a cat that was sneaking up on them & eating them. One mouse said that, if the cat wore a bell, it couldn't sneak up on the mice. That was agreed on by all mice present, but the next question: Who would bell the cat? met with no answer, nor any volunteers. You have suggested a means of survival, but are any Whites interested?

Let's imagine that you succeeded in placing The Worthy White Remnant on your O'Neill space station. As you have said, space travel is getting cheaper. The Chinese intend to have their own space program. Using U.S. missile guidance technology given them by the jew, Bernie Schwartz of Loral, they successfully destroyed one of their satellites in space. Would Whites confined in a space station be able to defend themselves from non-White attacks from Earth or from space? It would seem like putting all one's eggs in one basket.

In the meantime, good luck in finding potential White space colonists via Cosmos Theology. It would be wonderful if Whites could wish to survive as Whites, rather than individual hedonists. We are thus hoping for a miracle, in today's decadent context. Let me know if your efforts meet with any success.

In today's economic crisis or kosher business cycle, few mortals will see things continuing as they have been. Jews are gamblers, as well as schemers, so there is potential for revolutionary changes, like them or not. The Chinese character for "opportunity" is combined with "danger" to mean "crisis." This is how I see our present crisis: Danger + Opportunity, if we are able to take advantage of it. ORION!
