

23 NOV 08

Dear Tom: Thanks for your insightful & informative letter of 13 NOV 08. It looks like Obama comes with a parade of jews & jew-banksters in his train, so it looks like more of same. The "change" is that things will get worse for the majority sheeple. The continuation of free trade under global capitalism is a race to the bottom for U.S. wages & living standards, but "20% may do O.K.," as former Labor Secretary Reich giggled in his kosher way. Who says that American sheeple haven't given up their future? The Whites did so in former White-ruled Africa, & it sure can happen here; not that we ever had White Rule in America, for it was jew rule over White slaves, from our colonial period to the present.

I entirely agree that there are reasons why we are in our present mess, & if we don't know what they are, we shall never be able to get out of this mess, except by getting into another one. Yes, radical problems require radical solutions, which doesn't mean that we should grow goatees & act like Trotsky alias Bronstein. Only we can solve our problems, for they are of our own creation, with misguidance from our jew masters. They gave the orders & we did the work to dig ourselves into this mess. Our 'edjewcation' teaches us to feel guilty for being White. This has resulted in a two-way split: Whites who want to be jews & Whites who want to be niggers, while we remain White, & victims under our Zionist Occupation Government.

We have been smart in creating our civilization, but, as you observe, our civilization has out-smarted us with the availability of sedentary careers & pastimes. We know enough nerds who could better develop their minds, if they were also to develop their bodies. I knew such types in the academic world, who'd never done a lick of physical work in their page-turning lives; nor had they any experience of "The Real World" outside the ivory tower. I was more fortunate than I knew, when I had to work in the U.S. Forest Service every summer to help pay my college tuition. Hard physical labor puts one into perspective, in regard to useful tasks he can perform, & it tends to dispel jewish lies one encounters in 'higher ed-jewcation.' One myth is that those Nazis starved people & 'forced' them to do hard labor. This is an oxymoron, like claiming one can drive his car without filling the gastank. I know what I did, & I know how much I had to eat in order to do it. A whip can cause pain, but it can't provide energy, so tell us another fib, Hymie.

I've walked all my life, as my major means of transportation. Since I retired, much to my surprise, when my last job left for India, I do more walking. Since this is my major &/or only form of exercise, I notice that my energy & my vitality have improved, unlike most people I know who are my age & younger. So many sheeple are on medications which have negative side-effects, like fatigue & mental impairment, that they are ready to fall asleep. Not only are they physically tired, but they find life boring, or if not boring, threatening. Hence they take pills to increase their boredom. I'm quite contrary, for I find life interesting, regardless of future possibilities, such as "the rumble of distant drums."

China is behaving like the cutthroat capitalists of the 19th century: Exploit labor; sell poison as food; pollute the environment & deplete resources like there's no tomorrow, for the 'bottom line' is the only thing that counts in capitalist thinking. The closest thing to the crazy invention of "non-evaporating water" in the science fiction story is the jew Monsanto's "genetically-modified" food crops which have unpleasant side-effects which are toxic to soil, plants, animals & humans, but profitable for Mr. Monsanto. Such a deal! As you say, the dissemination of 'toxic' debt instruments throughout the world economy is par for the kosher course. Savitri Devi wrote that all things jewish are anti-Nature, so the increase of jewish creatures, the demons of jewish dementia, threaten life on the planet, much as Hitler predicted.

The bacteria which produce alcohol as their waste product die from making their environment toxic via their own multiplication & excretion. This could be the fate of mankind, under our present political, demographic & economic regime.

Re "The Sepoy Mutiny," I recall that the British wanted to demonstrate their trust in the wogs by giving them the best weapons. The pretext for the mutiny, as I read, was that a measured quantity of gunpowder was issued in a paper cartridge which was waterproofed with some sort of grease. To open the cartridge, the Sepoy had to bite the cartridge at one end, so the powder could be poured down the barrel of his musket. Hindus claimed the grease was of sacred cows; Moslems claimed it was pig fat. Solution: Kill Whites! I feared such a mutiny in Rhodesia, but it was Whitey who betrayed himself, thanks to Messrs. Ian Smith & Henry Kissinger, who agreed to hand over Rhodesia to Black Rule in 1976. DOWZ! ORION!

End
