

BOOK REVIEWS

"HOMO AMERICANUS: Child of the Postmodern Age" by Tomislav Sunic, 2007 (ISBN 1-4196-5984-7)

Former Croatian diplomat, Tomislav Sunic puts forward his views on the development of today's American. Whilst Croatian in origin, Sunic has had extensive experience in the United States having received a doctorate in political science at the University of California and also at one time holding an American professorship.

America is the least homogenous nation in the Western hemisphere both racially and in terms of the lifestyles of its citizens. This makes generalizations difficult although not impossible.

While political scientists and historians proclaim that racial or ethnic differences are not innate, and are the product of nurture and education, biologists and geneticists will reject this. Nevertheless the liberal dogma of equality has not yet lost its credibility and politicians and professors who question it can find their careers restricted or truncated.

This sets up a sort of functionalism whereby those who take an unconventional approach can be stigmatized as racists and fascists. American liberalism promotes democracy while at the same time it takes a repressive and undemocratic stance when its own orthodoxies are challenged.

To become masters of the modern Americanised discourse the liberals and leftists had to remove any authors from the library shelves who they considered too right, racist or otherwise opposed to their views. A true democrat would be expected to at least respect the right of all across the political spectrum to be heard.

Those who question the constant commemoration of the Jewish Holocaust are generally treated like heretics. In fact Professor Kevin MacDonald has described the "veneration of the White Guilt

/ Holocaust as the central moral icon of the entire civilization". To a certain extent those who question multiracial or multicultural policies are also vilified.

Nevertheless do those who purport to accept or even support the current situation really accept it or just pretend to? Sunic makes a comparison with the old Soviet Union where those who in public supported, or even played a part in running the system, often laughed about its contradictions in private.

Similarly, although Americans have always stressed the notion of liberty and the principles of Jeffersonian democracy, certain historians have pointed out that the country's founding fathers were as much motivated by economic and capitalist motives. Sunic believes postmodern Americans are so focused on the amassment of commodities that they are becoming perishable commodities themselves.

In fact *Homo economicus* can be used as a synonym for *Homo Americanus*. As one writer pointed out some time ago "the dominant influence in the making of America has been overwhelmingly bourgeois, and the population has been selected by the requirements of the capitalist regime". Survival of the fittest in America applies not to the fittest in arts or politics, but the fittest in capitalist commerce.

What is the future of America? Sunic foresees the possibility of a return to segregation and the Balkanisation of America along ethnic and racial lines. In a market democracy Americans cannot be expected to develop an organic and fraternal relationship with each other. He sees such a relationship as feasible only in a racially homogenous society or a sharply segregated one with each group pursuing its own destiny. The omnipotent market in America strengthens the desire of citizens to act as free economic agents with no spiritual bonds to each other, nor any sense of the common good or historical community.

Americanism, like communism, may only function in the future as a basic form of survivalism in which inter-racial wars will be the norm.

Only change of mind can save Our Kind, so as to cause a change of behavior. Werner Sombart wrote in his study of Jews & capitalism that "The USA is the distilled essence of Judaism." The USA is a study in entropy. E.T.

10 DEC 08

Dear Phil: Thanks for your letter of 6 DEC 08 & the amazing enclosures! The massive dislocations inflicted upon Goyim by speculation, & the resulting boom & bust economies is felt worldwide, it appears. Iceland's Zionist Prime Minister or Premier or President, who is married to an Israeli jewess has thrown caution & his country to the winds, it appears. Spain bought The Pill & had to import foreign workers, along with mud invaders, who swarm in to burden the Spanish economy. When I lived in Spain, from 1964 to 1966, tourism had already started a building boom along Spain's Costa Brava. Now, I suppose the tourist apartments run all around coastal Spain & Portugal, into the interior. That's just a guess. cus

I enclose another copy of a book review on Judeo-America's Homo Americanus/Economi/, which may account for the erosion of family life, on behalf of money, over biology. Sheeple see themselves as individual economic units for consumption & excretion, just as ZOG wants us to see ourselves. The jews call us Goyim (livestock), so we oblige by our sheeplike behavior.

On the Internet, I saw recently items about how ZOG is behaving in truly Orwellian fashion: Remolding its human subjects in radical ways by various means, toward manipulating our behavior. The projected Jew World Order will supposedly feature population-reduction, with the extermination of the last Whites; interdependence, so as to promote jew-rule, by concentrating manufacturing in one area, agriculture in another, & consumption in urban concentrations in which Orwellian conditions will apply: Total surveillance, behavior control, sparse living quarters & food rations, amid constant regime propaganda.

But out of cyberspace & its virtual imagery, I see the rise of a new feudalism in the form of drug mafias, & I see that China could pull itself out of the economic slump by following Say's Law, which says that a factory economy cannot sell its goods if it does not pay its workers sufficient to buy their own production. The Jewnited States did that after World War II, not by raising wages, but by lending workers money to buy their own products, which were never before as cheap to make, nor higher-priced. Such a deal! Even as a child, I could see the nature of that racket, for my parents worked like slaves, & never owned much of anything. As Thoreau noted: Most people of his time lived lives of "quiet desperation." I wonder what he'd say of people today.

Suppose the Chinese rulers were to raise Chinese wages, sufficient for them to consume their own production. China could trade its surplus manufactured goods to countries for the raw materials China needs, including oil. The USA is a crippled economy without its manufacturing sector, so writers deem the USA to be the food basket for the global gangsters of the Money Mafia. Service jobs via the Internet go to India, as mine did, which leaves most denizens of North America in the category of "useless eaters." Mechanized agriculture requires few workers to bring the food from its source to the table, as compared with traditional peasant economies. Suppliers of raw materials require few people to do those jobs with mechanization, which includes mining & logging. The main value is in manufacturing, in any economy.

The globalists must eventually consider how many consumers are required to provide them with profits, for their methods of production pollute & deplete the earth's resources, along with the population increases which accompany these factors of consumer-multiplication. One pessimist/realist advised for us not to worry about oil supplies, but water supplies. Water scarcity is already becoming apparent in the USA, as elsewhere.

Jew bankers have used their control of symbolic ^{wealth} to control real wealth, in their cycle of wars & depressions. One wonders if our Zionist rulers will do their monkey business as usual, after they achieve their goal of world-rule. If population & production can be controlled on a sustainable basis for life on Earth, then why would they require their old rackets of war & depressions, inflation & deflation? Or, are jews insane, as I suspect, so they will use their power on behalf of chaos & destruction, as always, even after they have achieved their desire of world-rule? We see what the Blacks have accomplished in Africa, after White colonists handed them the power to govern or misgovern their own peoples in their own countries. That is indeed scary. Enlightened self-interest includes an understanding of what is enough. But, "from the corruption of women proceeds the confusion of races; from the confusion of races, the loss of memory; from the loss of memory, the loss of understanding, & from this, all evil." Those words are thousands of years old, but they are no less true today. Another writer noted that "Strength without wisdom leads but to disaster." The lesson of America is that abundance breeds fatheads, & with scarcity, we must wise up, fast. In "Sex vs. Civilization," Pendell notes 2 types of humanoids, Problem-Makers & Problem-Solvers, who are out-bred by the former. Thus, when Nature is nasty, man improves, but when she is nice, Problem-Makers multiply beyond the abilities of the Problem-Solvers. If we don't solve our problems, Nature will, for she is Nazi. DOWZ! ORION!
