

26 JAN 09

Dear Tom: Many thanks for your cogent thoughts of NOV/DEC 08 & 4, 22 JAN 09! Your description of people who devote their lives to material pursuits, only to find unhappiness, even when they succeed is something I've also noticed in cases of people who were quite well off financially, although I believe that not all rich people are unhappy, since I've not met all rich people. In theory, a rich person should have more freedom than a poor person, & he should enjoy more & better things, along with his friends & family. But I also know it can be dangerous to be known as rich in certain places, quite a few of them, to my knowledge.

In his book on Scientific Revolutions, Kuhn states that the more rigorously a theory is applied, the more certain it will be exploded by undeniable facts which the theory cannot explain. The discovery of X-rays was the end of the contemporary atomic theory, as I recall. That theory claimed that there was nothing smaller than an atom, but X-rays were indeed smaller.

If we look at the rigorous application of greed by the jew banksters, we already see the erosion of value in the thing they love most: Money. In practice, money is trust. If trust is destroyed by dishonesty + greed, money loses its value. Oy veh! This does not necessarily mean that the jews have made a mistake, any more than they did in biblical mythology when they pulled their sheenie-skedaddle from the ruined economy of Egypt. Jews live to destroy their Goy hosts; after which, they swarm onto a new host. In our case, it looks as if China is "It," so I begin to feel sorry for the Chinese.

Like you, I do not envy Obama, the jews' latest frontman, for I see no possible solution to the problems created by the jews who surround him, as long as the jews continue to dominate him. It appears that anything Obama does will enslave generations of Goy tax-payers to the jew banksters, even worse than at present. Ahead, I can see only debt, poverty & war for the American sheeple, with no Big Sky-Jew Rescue for Whitey.

Unfortunately, too many sheeple "eat the cake of convention" without thinking, like those who bought into "The American Dream," which proved to be a nightmare in so many cases. As a correspondent recently wrote: "Only those who love rightly see rightly." I never loved the Judeo-American Ratrace on the Talmudic Treadmill to Oblivion, for I knew the folly of living above one's means: Debt-slavery. My love for freedom, at least freedom from such oppression, moved me away from this society. Truly, I've searched the planet for "my people," but I only found myself. I always think disillusionment is healthy, & desirable.

Savitri Devi wrote that all things jewish oppose man to nature. The jew hates nature. I believe Marx wrote "Nature is a wet place, with birds." He also wrote of "The idiocy of peasant life." Needless to say, Marx was a sick man, in short, a jew. Hebrewood's movie of a future of perpetual heat (global-warming), hunger & squalor entitled "Soylent Green" may have been prophetic, as so many works of 'fiction' are, such as "1984" & "Fahrenheit 451." Hence, jewish activities lead to the over-population, depletion & pollution of the planet. As David McCalden wrote in "Exiles from History," jews describe the Universe as a monster, & their Messiah, who gratifies the jews' desires is logically Death. Such a deal!

The Whites are in a hypnotic jew-daze, perhaps an evil cabalistic spell, assisted by Christinsanity, so unless they wake up, there is no hope for their survival. As some would say, "Our situation is hopeless, but not serious."

Yes, the jews brainwash us with the latest techniques & technology, on behalf of their power & profit, so we work to buy the poisons with which they kill us off. Yes, why not have a virtual heaven in the sky? The Goyim would think it was real, as long as no one told them it was a movie projection. Sheeple see what they want to see. When I worked as a parking attendant, drivers who parked in the mall garage would read the sign which said "FREE Parking," but they would usually ignore the second line that said, "with validation of the ticket." Either that was too much for their little Goy minds to comprehend, or their wishful-thinking omitted the second line. Many were the customer complaints that we'd offered them "free parking," period, & they'd get angry when I'd show them the second line, & tell them to get the store's validation stamp or pay for parking. It made me feel like Scrooge, or some movie villain, intent on foreclosing the heroine's humble house, even though I had no moustache which I could twirl. The second line was not in fine print, either, so we had no intent to defraud the public. They did that to themselves.

The kosher tax is definitely contrary to the 1st Amendment, for by allowing one religion to tax goods in interstate commerce, it effectively establishes that religion: Judaism. But, as King George Bush II declared, The Constitution is just "a damn' scrap of paper." We sure live in "interesting times," as the Chinese curse states. DOWZ! ORION!
