

Learn from the fall of Rome, US warned

The US government is on a "burning platform" of unsustainable policies and practices with fiscal deficits, chronic healthcare underfunding, immigration and overseas military commitments threatening a crisis if action is not taken soon, the country's top government inspector has warned.

David Walker, comptroller general of the US, issued the unusually downbeat assessment of his country's future in a report that lays out what he called "chilling long-term simulations".

These include "dramatic" tax rises, slashed government services and the large-scale dumping by foreign governments of holdings of US debt.

Drawing parallels with the end of the Roman empire, Mr Walker warned there were "striking similarities" between America's current situation and the factors that brought down Rome, including "declining moral values and political civility at home, an over-confident and over-extended military in foreign lands and fiscal irresponsibility by the central government".

"Sound familiar?" Mr Walker said. "In my view, it's time to learn from history and take steps to ensure the American Republic is the first to stand the test of time."

Mr Walker's views carry weight because he is a non-partisan figure in charge of the Government Accountability Office, often described as the investigative arm of the US Congress.

While most of its studies are commissioned by legislators, about 10 per cent – such as the one containing his latest warnings – are initiated by the comptroller general himself.

In an interview with the Financial Times, Mr Walker said he had mentioned some of the issues before but now wanted to "turn up the volume". Some of them were too sensitive for others in government to "have their name associated with".

"I'm trying to sound an alarm and issue a wake-up call," he said. "As comptroller general I've got an ability to look longer-range and take on issues that others may be hesitant, and in many cases may not be in a position, to take on."

"One of the concerns is obviously we are a great country but we face major sustainability challenges that we are not taking seriously enough," said Mr Walker, who was appointed during the Clinton administration to the post, which carries a 15-year term.

The fiscal imbalance meant the US was "on a path toward an explosion of debt".

"With the looming retirement of baby boomers, spiralling healthcare costs, plummeting savings rates and increasing reliance on foreign lenders, we face unprecedented fiscal risks," said Mr Walker, a former senior executive at PwC auditing firm.

Current US policy on education, energy, the environment, immigration and Iraq also was on an "unsustainable path".

"Our very prosperity is placing greater demands on our physical infrastructure. Billions of dollars will be needed to modernise everything from highways and airports to water and sewage systems. The recent bridge collapse in Minneapolis was a sobering wake-up call."

Mr Walker said he would offer to brief the would-be presidential candidates next spring.

24 FEB 09

Hail Tom! Thanks for your thoughtful letter of 18 FEB 09. As you say, changes in our means of living affect our entire society. This was the gist of my speech entitled "Here Comes the Revolution, Ready or Not!" Rome had an agrarian society which fell victim to Rome's imperial conquests, on behalf of more wealth & power for Rome's rich scum. Farm families were deprived of their menfolk by the legions. Rich scum bought the land, thus displacing the farming families into the slums, slavery &/or the welfare rolls of "bread & circuses." The landowners imported slaves to produce the food, until cheaper food arrived from North Africa, & put those slaves out of work. The "Corn Laws" did the same to the peasants of Britain, along with sheep-raising for the wool market. Landowners displaced the former agrarian population into cities, just in time for slavery in the colonies, & as slave-workers in the industrial revolution. The slave society of the South was agrarian, but not pro-White in any sense, no more than was the industrial North. Christinsanity was not pro-White before the industrial revolution in Europe, nor thereafter.

German National Socialism proved that Aryan values, culture & people can thrive in an industrial society. After all, industry was the result of White inventiveness. Naturally, our inventiveness & productivity are exploited by the jew parasites whom we all^{ow} into our midst, so they can corrupt us & dominate us, as they do with all their host peoples, throughout history. Whites love to tinker under the hood so much that they let the jews occupy the driver's seat. Such a deal! It appears that we are repeating Roman history, for we are no wiser, despite our high-tech artifacts. The jews obviously comprehend what we don't, since we don't even bother to look.

Yes, I've heard the liberal twaddle that "we mustn't stereotype." We can feed some of the piranhas all of the time; all of the piranhas some of the time; but we can't feed all the piranhas all of the time, as Lincoln might have said. However, it only takes one hungry piranha out of a school to bite us so that our blood attracts other piranhas who've suddenly discovered their appetites. My advice to such a liberal proponent of our jumping into a piranha-filled pool is: "After you!"

Your description of the liberal blaming the piranhas' victim for being bitten is exactly the arguments the anti-White liberals use. This is what they strive to indoctrinate us with, so that we will be 'properly edjewcated.' Imagine telling such things to Israeli jews, using "Arabs" instead of piranhas. The jews would give such a speaker their version of the piranha treatment. Yes, we are the heirs of all the talmudic twaddle accepted by our forebears, as we leave our land to make way for alien invaders, to kill others in their lands, on behalf of "democracy." Indeed, our sharing space with piranhas or jews guarantees that the space will be occupied only by piranhas or jews, for we shall be devoured as such predators & parasites multiply at our expense, in every respect.

The liberal piranha-lover omits the law of probabilities. Let's say that I give you 1000 to 1 odds on your winning a game of chance. This means you'd be able to lose 999 times for every time you won. Probabilities are why gamblers lose & why gambling casinos don't lose, especially when they have a large random sample, that is, lots of suckers, er customers. In Russian roulette, a 6-chambered revolver is loaded with one bullet. Your odds would be 1 out of 6 to have your brains blown out, assuming that the Russian roulette player has any brains to begin with. But if one plays the game with a pistol, with 'only' one round chambered, his odds will be 1 out of 1, unless the gun misfires. Let's say a friendly jew offers to pay you \$1000 to play Russian roulette with a loaded pistol, & you accept, 'cause you need the money. When the game concludes with your death, the jew has scored 1 dead Goy & a mitzvah or divine obligation fulfilled; \$1000 zogbucks & one pistol in need of reloading. If you were smart, you'd shoot the jew with the pistol & depart with the weapon & the money, knowing you'd done a good deed in the Boy Scout tradition.

In his second book, Hitler warns against exporting Aryan technology to such countries as China. He wrote that it was all right to sell the Chinese a ship, but not a shipyard, for Chinese labor + Aryan technology would deprive the Aryan creators of their jobs. If we study Hitler's prophecies, we see that our ZOG does everything exactly the opposite of Hitler's advice to preserve Our Race. History shows how Aryan technology has been used by our jew masters against us, the inventors. This should teach us to get our heads out from under the hood so we can see who's in the driver's seat of our vehicle. So let's hear the Goy Cheer, loud & clear: "DUUUH!" The Aryan is a creature of change, as he adapted to harsh climates. He is not a blind puppet of traditions, but he must be master of his changes, rather than victim of changes imposed by hostile aliens. DOWZ! ORION!

End
