

One in every 50 black American men has HIV, CDC reports

BOB HERBERT

Syndicated columnist

The warning sirens are wailing, but young black men who are gay don't seem to be listening. And so the march into self-destruction continues.

The AIDS virus is being detected in gay black men at stunning rates, comparable to some of the hardest-hit sections of Africa.

A study released last week by the Centers for Disease Control and Prevention showed an annual HIV infection rate of nearly 15 percent among young black men who were gay or bisexual.

The study, which focused on six cities (including Seattle), was conducted by researchers who reported in February that 30 percent of all young, gay black men were already infected with the virus that causes AIDS.

The researchers described the latest findings as "alarming," which was an understatement.

And yet there's been no tremendous outcry over these developments, from blacks or anyone else.

"Why aren't we outraged?" asked Phill Wilson, executive director of the African American AIDS Policy and Training Institute in Los Angeles. "Why aren't we marching in the streets? This is a major health catastrophe."

I am waiting for the so-called leaders of the black community – the politicians, the heads of civil rights organizations, the preachers – to step forward and say, in thundering tones, that it's time to bring an end to the relentlessly self-destructive behavior that has wrecked so many African American families and caused so much suffering and death.

I am waiting for the so-called leaders of the black community to step forward and say that it's time to bring an end to the relentlessly self-destructive behavior that has wrecked so many African American families and caused so much suffering and death.

Gay black men have been hit the hardest, but the problem goes much deeper. The AIDS virus is being spread through the black community by people who are having intercourse without condoms, by drug users who contract the virus by sharing needles and then pass it on to others through sexual contact, by men who have sex with men and women and by poor judgment in general about sexual behavior, including unprotected sex with multiple partners and the common practice of trading sex for drugs.

It is time to shatter the taboos that have prevented blacks from speaking plainly and constructively about homosexuality, about HIV and AIDS and about drugs and other destructive practices that have inflicted gruesome damage on one generation after another of young black Americans.

The messages delivered to date have obviously not worked. AIDS is the leading cause of death for African Americans between the ages of 25 and 44.

While blacks are just 13 percent of the U.S. population, more than half of all new HIV infections occur among blacks.

Blacks are 10 times more likely than whites to be diagnosed with AIDS, and 10 times more likely to die from it.

Those would seem to be good reasons for blacks to be significantly more careful than whites about avoiding the virus.

The Centers for Disease Control believes one in every 50 black American men is infected with HIV. One in 50!

It believes one in every 160 black women is infected. By comparison, one in every 250 white men is infected, and one in 3,000 white women.

One of the biggest obstacles to controlling the spread of the AIDS virus among

young blacks is denial. There is still a widespread belief among blacks that AIDS is a disease primarily of gay white men.

And there is the widespread belief that the disease is easily controlled, and perhaps even cured, by drugs.

Joe Pressley, an official with the New York AIDS Coalition, told me about a 15-year-old girl who said: "Don't tell me nothin' about no AIDS 'cause that won't impact me. And if I was to get it, all I'd have to do is take a pill in the morning and I'll be OK."

The denial runs so deep – and the stigma surrounding homosexuality is still so strong among blacks – that many black men who have sex with other men nevertheless think of themselves as heterosexual, not gay or bisexual.

These men, while attempting to present a heterosexual image to the outer world, frequently engage in compulsive, high-risk sex with men while engaged in ongoing sexual relationships with one or more women.

This is behavior that puts girlfriends and wives in grave danger.

A new and intense and creative effort – led by black Americans – will be required to reclaim the lives of the thousands upon thousands of young blacks succumbing to the ravages of destructive sexual behavior, drug use and (in so many cases) the emotional pain of self-loathing, depression and despair.

If ever there was a need for tough love, this is it.

CDC-JEW LANDAU LAMENTED THAT "1 OUT OF 100 WHITES" IS IMMUNE TO THE AIDS VIRUS. NO RACE-MIXED PERSONS HAVE THIS IMMUNITY, INCLUDING DR. LANDAU. GOD AND/OR NATURE MADE THE RULES, LIKE IT OR NOT.

18 MAY 09

Hail Leif! Thanks for your letter & great enclosures of 13 MAY 09, with copies included, as you requested. I'm glad you appreciated my essay on Technology & Tyranny, since I see it every day, in every way. Goyim make choices without knowing it. If we try to see everything, we focus on nothing, so we will miss things which are important, like that 18-wheeler bearing down on us, as we turn our attention to our cellphone. Splat!

Congratulations on your taming of the jewsmedia, but since TV is the jewsmedia, every message you receive is jew-serving to one degree or another, even if it merely occupies your time & your thoughts. "History Channel" is really "Propaganda Channel." If we know the jewsmedia's racket, to gull the Goyim, then we can 'read between the lines.' I use it for details, which may or may not be true, & which occur within the kosher context of the jewsmedia, which can magnify events or reduce them, as they choose, reality to the contrary. When I listen to the "news," I do so as a propaganda analyst with the question, "Cui bono?" (Who benefits?) in mind. It is impossible to cover all events, if only for lack of time, but it is important to know WHO selects events or falsehoods for media coverage & WHY. Naturally, I depend on others, ZOG included, for my information/disinformation, so if I mistake lies for truth, it's "garbage in, garbage out." I want valid information for governing myself & for aiding Our Kind.

I spoke with & corresponded with Bob Miles who adopted the title of "Pastor," i.e. Shepherd for unknown reasons. I understand he was set up by ZOG for incarceration by a ZOG agent who burned some school buses intended for school Africanization. The zoggie did the crime & Miles did the time. Such a deal!

I suspect that Hitler would have handled AIDS similar to Castro Cuba, which, I understand quarantines AIDS-carriers in special camps, as soon as they are diagnosed with the disease. I would be somewhat harsher, for I see AIDS-carriers as biowarfare agents. We dispose of biowarfare agents by means such as incineration, after isolation. Goyim think, if I use the word loosely, that AIDS is not a problem because the jewsmedia ignore it. AIDS is likely a man-made disease, following Allied WW II projects to mutate deadly animal viruses to make them deadly to humans. Drs. Strecker, Cantwell & Douglass say or said (Strecker was killed) that AIDS is a mutation of the ovine visna virus, which was purposely inoculated in to the Black population of Africa & the homo population of USA by the jew, Szmunness, who was plugged into the New York Health Authority by ZOG from Communist Poland. HIV or AIDS was inoculated into Africa by the "World Health Organization" via contaminated smallpox vaccine. It is written in The Protocols of the Learned Elders of Zion: "...so as to utterly exhaust humanity...by the use of torture, by starvation, by the inoculation of diseases, by want, so that the goyim see no other issue than to take refuge in our complete sovereignty in money and in all else." Your AIDS solution is correct, as long as you take care in disposal of the bodies. Warden Bill Armontrout of Missouri State Pen told me that "race & AIDS are the main problems, & AIDS is catching up fast!" Along with AIDS comes highly-infectious, drug-resistant TB. I saw no reports on AIDS deaths in Africa. When HIV/AIDS attacks the immune system, the carrier is quickly killed by other diseases, such as malaria, cholera, typhoid, TB, &c. which thrive in African (Black African) conditions. in Black Africa

A jew doctor was asked by a reporter if AIDS could not be stopped/by education. The jew laughed. He said that you are dealing with a population which has a median I.Q. of 70. "If you tell them that sexual activity is the vector for AIDS, which may occur within 3 years of infection, you may as well say 'in 3 thousand years,' for such specimens can barely think in terms longer than a week, let alone 3 years." According to the jew, Landau, of the Centers for Disease Control, 1 out of 100 Whites is immune to the AIDS virus, & I read in my African correspondence that some Blacks are also immune to HIV/AIDS, although I don't know what proportion. Hence, if AIDS goes its course, 99 out of every 100 Whites could die, as well as great proportions of the 2 other races (Blacks & Yellows), & mixtures thereof. In Florida, reports indicate that AIDS may be transmitted by mosquitoes, like West Nile Virus, but CDC refuses to research that, or tell the Goyim its findings.

Hey, get used to the fact that Whites are not self-governing & that the rulers of the USA make this enemy territory for the exploitation & eventual extermination of Whites. USA was created by the Rothschilds & their Freemasonic Goy agents, including our Founding Fellows. Isn't reality exciting?

All the best. DOWZ! ORION!

P.S.: Thanks for the envelopes. I can always use them, since I'm not on the Internet.
