

1 JUNE 09

Hail Joe! Many thanks for your great letter & shortstory! As I say, the Aryan imagination is a mighty instinct which must be enlisted in the struggle for Aryan Survival. The Jew-ess "Ayn Rand" alias Rosenbaum of Odessa (Jew City) tried to exemplify her neo-Marxist or reverse Marxist doctrine in her fiction, such as "Atlas Shrugged," et al., but her characters impressed me as 2-dimensional cardboard caricatures. As I recall, none of her heroes had children, for they don't earn their own money, & must be supported by their parents without working, in their infancy. Oops! Her glorification of selfish materialism in contradiction to Marxist 'altruism' required only such examples as fit her beliefs, so reality was left behind. No altruistic parents need apply.

Your shortstory's character depiction seemed 3-dimensional, even in the brief text you provided. It also had the ingredient of suspense, which keeps the reader's interest. If the author 'telegraphs' the outcome, the reader tends to drift away, or even put the book down. Not so with your text. Keep up the good work.

As I recall, The Leader said that, if he could do his work without an organization, he would prefer it, but his work required an organization, whether he liked it or not. Most sheeple 'think' that Hitler lived OFF the NSDAP, when he actually lived FOR it. As Savitri Devi wrote, "The NSDAP was a temporal expression of cosmic truth."

I've worked in various organizations which failed in combination with circumstances, but most often because of personal flaws of members & leaders. Were I the leader of an organization, my first job would be in choosing my successor, for leaders don't live forever, but their organization should exist as long as its goals exist. I see my role as leader in the Chinese sense: "There is the leader who coerces & the leader who inspires, but the best leader is one who teaches, for his followers can say, 'See, we did it ourselves!'"

As you say, we need to network, inlieu of adding our own Party of One to the existing Babel of competing letterhead grouplets & individuals. Eventually, a co-ordinated, coherent body of doctrine must evolve from this Babel, or we shall continue to flounder as individual 'all-stars' against our enemy team of experts. Politics is a team 'sport,' & the best team wins.

I caution White activists about borrowing plumage from the past. National Socialism in Hitler's time was about GERMAN UNITY. Since Judeo-America is not 1920 Germany, our goal must be WHITE UNITY. If Whites see our movement as one of German unity, they, who are not Germans, tend to respond in Pavlovian fashion to their anti-German ZOG indoctrination.

Unfortunately, I have broken off contact with Daniel Deville, who appears to be organizing a land-scam from prison, in connection with Hasidic Harold Covington, who advocates "terrorism" in terms of ZOG official statements. Hence, networking with possible agents provocateurs is dangerous, since ZOG extends its wide definition of "terrorist" to include those in contact with those ZOG deems as "terrorists." Advocacy of violence, as Covington has done, is both unnecessary & stupid. Advocacy of a "homeland" based on real estate, rather than race & ideology indicates more scam than good sense. It is natural for like-minded people to live together, but it is nonsense to expect that living together can make them like-minded. The American Experience proves the contrary, under Judeo-bankster imperialism, rather than White Nationalism. No change of place can save Our Race. Only change of mind can save Our Kind.

Those who erroneously equate ZOG with the USA fail to realize that ZOG existed long before its agent, the USA, which was a planned stage en route to the Jew World Ordure, as it states in the USA's Great Seal: Novus Ordo Seclorum (New World Order). It is likely that the USA will be dissolved into The North American Union of Canada, USA, Mexico & Central America. Therefore, we must ask ourselves: Are we fighting a rearguard action to save decaying remnants of the past, or are we defending a blueprint for the future? The USA & Canada have betrayed Our People, & our enemies seek to dissolve them on behalf of their New World Order, so may we use our enemies' strength against them?

The Chinese character for "crisis" I understand includes the characters for "danger" & "opportunity," so we should seize the opportunities which arise from our ongoing crises, on behalf of Our Nation. ORION!
