

Sam". It needs to be understood that opposition to US globalism is not a prerogative of the Left. US conservative syndicated columnist Joe Sobran has written:

"Anti-Americanism is no longer a fad of Marxist university students; it's a profound reaction of traditional societies against corrupt and corrupting modernisation, that is being imposed upon them, by both violence and seduction."

Turia - second thoughts on immigration

When the Maori Party was established a few years ago, party co-leader Tariana Turia had a grand vision of Polynesian and Asian immigrants uniting with Maoris into a voting bloc to dispossess the whites. Now that the Government campaign to enrol sufficient Maoris on the Maori electoral roll to justify the creation of another Maori MP has failed, this vision has soured. Turia has lambasted successive immigration policies as a deliberate plot to further reduce the number of Maoris to minimise their influence, and has demanded that Maoris be consulted on immigration levels. *"I think that it's quite deliberate to ensure that Maori numbers don't grow at a faster rate than the rest of the NZ population"*, she said. (Dom. Post, Feb. 3, 07).

Yet in 2004 Turia was optimistically saying that Maoris combined with Polynesians and Asians would comprise up to 60% of the voters by 2050. (Kapiti Observer, June 28, 04).

Scientist affirms "race"

Dr Bob Brockie, Dominion Post science columnist and research associate at the School of Biology, Victoria University, Wellington, has questioned the dismissal of the concept of "race" in favour of "ethnicity". Stating that "race" is a reality based on gene clusters, he contends that despite the PC trend even among scientists to claim that "race" has no validity, he questions whether the 1% DNA difference among races is of no consequence. Citing the prestigious New England Journal of Medicine, Prof. Neil

Risch, head of a 'high powered medical research team' at Stanford, writes that 'the scientific journals have got it wrong'. Brockie explains:

"Prof. Risch's team concur on the genetic conformity of the human race. We can all interbreed with each other, and we all share about 99% of our genes. But whether typing by proteins, chromosomes or dna, the genetic features cluster round and the deepest genetic differences lie between the five continental races - the Africans, Caucasians, Asian, Pacific Islanders and Native Americans."

Brockie states that Risch et al say "it's misleading to assume that the only genetic differences between races are genes for skin colour..." Risch thinks that these racial categories are scientifically meaningful and "medically very useful." He points out that some diseases are race specific, as are some treatments, ordinary anaesthetics being dangerous to Black S. Africans, for e.g. *"Prof. Risch and co say that it's important that doctors, epidemiologists, drug companies and public policy-makers acknowledge these genetic racial differences. The Stanford researchers think that race blind or race neutral medical approaches are neither equitable nor advantageous and that ignoring racial differences will ultimately lead to disservice to racial minorities."*

"Call me old fashioned but I think we are muddying the English language by supplanting the precise scientifically justified word race with the woolly polysyllabic euphemism ethnicity," Brockie writes. (Dominion Post, Jan 29, 07).

National Democrats

The National Democrats Party, formed in 1999 by long time activist Anton Foljambe, have re-formed. www.nationaldemocrats.org P.O. Box 13-939, Christchurch 8141, New Zealand

Hail Thomas! Your evaluation & response to the political psychology of Dr. Peak is spot on. His real name must be "Nadir," which is the downward opposite of peak or zenith. His mental deficiency stems from the psychopolitics of the former Soviet Jewnion, which was defined as "the workers' paradise." If one were not happy in the Judeo-Commie Paradise, he was defined as "insane," & thus he would be subjected to coercive "therapy," which would definitely make him dysfunctional, i.e. crazy. The use of medications has a similar effect. If you were not "angry" at such oppression, then you'd be insane.

The insanity of "Dr. Nadir" is obvious if one reads Zionist propaganda, of which he is a promoter, against Whites. Were he faced with a Black, Asian or Jew, he'd have nothing to say about their racial memory nor ethnic identity. All he'd have to say to a non-White is to blame Whites for any dissatisfaction he might have.

Naturally, "Nadir" is paid to say what he says, so he is a psycho-prostitute, & not a bona fide psychiatrist. What he is saying violates The Genocide Treaty alias Convention in regard to defaming people racially, even if they are White. I understand that the USA has signed & ratified that convention, so it has the same authority as the U.S. Constitution, according to Article VI, Section 2 of the U.S. Constitution. If Dr. Peak is a U.S. citizen, he is guilty of treason. He is also guilty of denying you your civil rights on grounds of race. Bad zoggie! So much for "equality under the law" of this hypocrisy.

In his "The Mysterious Stranger," Mark Twain pointed out the power of humor to pop tyrannies' noxious bubbles. It is important to point out absurdities to thinking Goyim alias Gentiles, as in "The Emperor's New Clothes." Orwell wrote absurdities as Big Brother's patriotic slogans: "War is Peace." "Freedom is Slavery." "Ignorance is Strength." Our current ZOG says: "Freedom is not free," which means that slavery is not oppressive. Since when is "freedom" & "democracy" imposed by bayonets? The absurdity is that USA was never a democracy, so what business do we have seeking to impose it upon others, who apparently want it no more than we do?

In Sunday School we were told that "If it comes from a Jew, it must be true." Jesus allegedly said that those Jews who did not heed him were "children of the Father of Lies," i.e. Satan. Since Jesus was a devoutly circumcised Jew, are we to believe him, rather than the majority of his tribesmen? As in Orwell's "1984," Goyim are taught to believe absurdities without question. This is known in brainwashing as "cognitive dissonance." If we may believe absurdities, then we are vulnerable to Big Lies on a massive basis. Consider the wars we've been lied into, just as we are now.

When lies don't work, then drugs will do. The Jew movie, "Midnight Express," was about a Jew confined in a Turkish prison on drug charges. When he gets antsy, he is given tranks by guards who wear white lab coats as they dole out pills to the prisoners. When the Jew's girlfriend is allowed to visit him in the prison, but not touch him, the Jew realizes that the medication is making him into a zombie, so he stops taking the pills. He gives them to other prisoners, who are delighted to plunge deeper into their zombie states. As Hebrewood decrees, the Jew escapes the prison & leaves Turkey, but a knowledgeable Goy would say that he did not escape himself, for "It's hard to be a Jew." Oy veh! Yes, it must be hard to sit around & watch those Goyim working hard to produce for the sheenie 'master race.' But "somebody's got to do it."

Were political power in your hands, you & Dr. Peak could switch roles, for his authority depends entirely on ZOG's guns, chains & bars, not morality nor scientific veracity. If he has a conscience, then he may be in need of therapy, as Franz Fanon wrote of French imperialists in his book, "The Wretched of the Earth," during the Algerian War of Independence.

Yes, Jews, Blacks & other non-Whites tout their ethnocentrism, as do our hispanic invaders who call themselves "La Raza" (the race). By ZOG definition, they are not racists, for "Only Whites can be racist," as one Jew announced.

Just as you observe, our enemies include ourselves when we subscribe to Jewish values of "me-me-me" & "gimme-gimme-gimme," to the detriment of Our Race. As Jew economist, Werner Sombart, wrote: "America is the distilled essence of Judaism," & as I've noted: "Our Race we slew for the inner Jew." Nature supposedly invests us with a survival instinct, but I see this perverted via brainwashing into belief in an "afterlife," which denigrates our physical existence & that of our children. Belief in absurdity can pervert our instincts into self-destructive actions, including racial extinction. But the Jewess, "Ayn Rand" alias Rosenbaum touted selfishness as the paramount virtue of mankind. Dr. Peak is a liar &/ or an ignoramus for hire. Keep up your brave & good work. ORION!
