

9-9-09. Hail Thomas! It was great to get your letter of 4 SEP 09. You are certainly right in refusing ZOG's wishes to 'institutionalize' you. Such brainwashing ill-suits one to live outside the gulag, which greatly contributes to recidivism, since one's values & skills are prison skills & values. One acquaintance saw his imprisonment with a Black mentality: That imprisonment was a 'rite of passage' from childhood into true adulthood. His evaluation of prison life was not exactly "paradise," but for him, it was "real life," unlike the "b.s." of life outside the gulag walls. Being a full-fledged criminal with 'diploma' was the person he aspired to be. Maybe he'd watched judeo-American gangster movies too often.

Are we who we wish to be? I am the product of my own, largely chosen, experience, allowing for elements of surprise. I could have foreseen my involvement in some Latin American revolutionary movement, but never as a British colonial civil servant in Africa. I guess I was becoming accustomed to little surprises by that time, after being kicked out of 4 countries in 1969. I remained as I was, but I had to adapt to different fronts in life's struggle, as you have done. Indeed, I strive to do on the outside what you have done inside: To teach Our Folk survival skills & wisdom. Knowledge without wisdom is like an idle & dangerous tool, ill-used by fools to their own cost. The ZOG imparts certain amounts of knowledge on behalf of mind-manipulation, i.e. sheeple-control, in addition to lots of misleading disinformation.

Oh, the prison-loving character wound up shot dead on the steps of his apartment building by an irate drug-customer. As Orwell wrote: "Who defines controls." If we accept ZOG's definitions of who we are, then guess who controls us. The late prison-lover worked for the ZOG in partnership with a paid agent provocateur who founded, funded & misled an allegedly pro-White group known as Heritage Front in Judeo-Canada alias China-duh. He'd been imprisoned in the USA for participation in The Dominica Caper, an alleged "White Supremacist" plot to take over the tiny Caribbean island of Dominica on behalf of the Jewish Mafia, for the purpose of issuing passports & refining cocaine. Before he went on his dubious adventure, I warned him that all real estate is "owned" by the powers that be, & if one thinks he can snatch an island in the Caribbean, he might practice by taking someone's house in Toronto, to see how long he could hold onto it. The speedy conclusion was the arrest of all involved at the dock in New Orleans, from whence the filibusters were to take ship to Dominica for their intended coup. Their captain for the chartered vessel was not only a Coast Guard officer but a ZOG informant, so the FBI was awaiting their surprise send off, not to Dominica, but to federal prison. I'd also warned the lover of prison life that the Dominica Caper had been well-publicized throughout the blightwing & its in house informants, so ZOG would be pleasantly surprised if someone were so dumb as to try it. This was similar to Mountbatten's idiotic commando assault on Dieppe, which the Germans had learned about so as to prepare a fine welcome for the largely Canadian invaders. "Bad show, that," as Brits say. Mountbatten was a fag-favorite of war criminal Winston Churchill. Royal Navy types told me that the motto for advancement in that service was "bend over for Mountbatten," whose naval accomplishments included the near-capsizing of a destroyer under his command.

German National Socialists wanted a meritocracy, rather than a society based on class privilege. Useful work was honorable, rather than demeaning. My parents were workingclass, & I saw nothing wrong with hard work & dirty hands, for the hands that repaired engines could perform other skills, after washing up. The Jewnited States makes a pretense of being "a classless society," (wink wink, nudge nudge), except for those who have money & pretenses to match. I was surprised when my two arresting FBI agents, whose business cards I still have, commented that my father "was just a mechanic." I responded that Abe Lincoln was just a rail-splitter who grew up in a log cabin. So much for "classless" pretenses. That year of 1969 was a wonderful learning experience in terms of ridding myself of ZOG b.s. & acquiring useful information. Afterwards, I realized how lucky I am to be alive.

Germans treated their workers like nobility in terms of job conditions & recreation, health care, housing & education. We can only admire their example, whereas judeo-capitalism treats workers like dirt &/or disposable tissues, while scheming to lower their wages & standards of living. Society survives as a team effort, rather than swindled & coerced individual anarchists. Goyim need to know!

Yes, we must have tough-love for Our Race & for ourselves. ORION!

*Eric*
