China 'building cyberwarfare capability' US report claims

China is building its cyberwarfare capabilities and appears to be using the growing technical abilities to collect US intelligence through a sophisticated and long-term computer attack campaign, according to an independent report.

Published: 7:00AM BST 22 Oct 2009

The study, released by a congressional advisory panel, found cases suggesting that China's elite hacker community has ties to the Beijing government, although there is little hard evidence.

The commission report details a cyberattack against a US company several years ago that appeared to either originate in or come through China and was similar to other incidents also believed to be connected to the country.

China's global cyber-espionage network GhostNet penetrates 103 countries

According to the analysis, the company noticed that over several days, data from its network was being sent to multiple computers in the US and overseas.

While the report does not identify the company, it contends that the attackers targeted specific data, suggesting a very coordinated and sophisticated operation by people who had the expertise to use the high-tech information.

An internet protocol (IP) address located in China was used at times during the episode.

Barring proof, the study by the US-China Economic and Security Review Commission warns that the sort of expansive and sophisticated computer resources that have been seen in cyberattacks on the US and other countries "is difficult at best without some type of state sponsorship."

The study contends that the Chinese, long reported to be stoking a massive military build up, has also made computer warfare a priority.

The Chinese government is said to view such cyberprowess as critical for victory in future conflicts - similar to the priority on offensive cyber abilities stressed by some U.S. officials.

Dear Claude: Many thanks for your latest mailing of most informative items! GUnter also sent me some super sources which confirm & amplify information about the machinations of the jew money mafia of ZOG. Thanks especially for your travelogue through Europe & Courier du Continent No. 510 & 512. Why is it that so many Whites want to die off & be displaced by muds? Will Jesus offer them a pie in the sky for committing racial suicide? Charity should begin with one's folk & family. Charity toward muds simply means: The more we feed the more they breed. They have proved that they can ruin their lands, so now we admit them to ruin ours, or what was ours, under jew rule. Jews are indeed clever, for with usury they have learned to rob the future, as well as the present, as the debts of the past grind us on & on.

I see the Chinese are discovering nigger behavior in China's "Chocolate City." Perhaps the Chinese will learn that some "foreign devils" are "more equal" than others. I think I'll give Nigeria a miss, as I did on my previous world tour.

It is clear to me that this planet needs population reduction & control on behalf of reducing the Problem-Makers who breed like rats or cockroaches. Elmer Pendell, who wrote "Sex versus Civilization," coined the terms, "Problem-Solvers" & "Problem-Makers." He included a sane, humane program for paying Problem-Makers not to breed, rather than the reverse, as we do in our dysgenic society. Eventually, we must understand that population should serve different purposes, that is, social purposes, than as cannon fodder & consumers. But I'm being utopian, of course. We must first defend ourselves from the Problem-makers, the foremost of whom are the jews, who believe that infinite profit may be obtained on this finite planet, with or without the bogeyman of "global-warming."

During the phony Cold War, the world was apparently divided into spheres of influence & client states, although I recall a Bandung Conference (?) of "non-aligned states" which were under bankster rule, as were the USA-USSR blocs. World politics has long been ruled by way of deception (the slogan of the Mossad). As the jew Disraeli wrote: "The world is ruled by different persons than one would think," or words to that effect. He even mentioned that those persons were jews, if I recall correctly, since his words made an impression on me.

A correspondent sent me a download from www.telegraph.co.uk/news that China is building cyberwarfare capability, according to a U.S. report. I understand that the jews control the access code for the entire Internet, so this 'civilization' may be shut off by a flick of the proper switch. How vulnerable we are!

I certainly appreciate the work you & our friends are doing via text messaging with E-mail. I wonder how the enemy will counter that approach, for 'snail-mail' is apparently no longer respectable. That's why I call it "instant hardcopy," which I produce on this 20th century typewriter. Nowadays, young sheeple ask me, "What's a typewriter?" & they aren't kidding. Technology certainly becomes obsolete, with increasing speed.

So Blocher of Switzerland is a Bilderberger with ties to Israel. People need to know that Bilderberger = Traitor. Full stop. I was disappointed when the Swiss caved in to jew demands that their banks pay "reparations" i.e. extortion money to Israel for the Holohoax, when the Swiss Red Cross has all the data on it, to fling in the kikes' ugly faces. What a missed opportunity! It is well-noted that when one first pays blackmail, it never stops. Perhaps Swiss neutrality is another myth, like Judeo-American "democracy."

It appears that others, like myself, recognize National Socialism as the solution to our judeo-capitalist/communist syndrome, & that White Unity is necessary to achieve it, worldwide. Since Nation = Folk, it is wrong to think that Nation = Land, with racial aliens thereon. The detractors of White Nationalism I call "regional chauvinists." Irish niggers are 'fine,' as long as they speak Gaelic. Although niggers are relatively few here in this part of Northern Mexico, there are too many for me. Everyone is welcome to take my 'share' of these obnoxious apes, free of charge, & no need to ask.

As always, your letters to Blacks who blame the ills they cause in the present on the apartheid of the past are spot on. Blacks need to grow up & take responsibility for their own mistakes. Maybe Whites in the USA could start blaming the Indians for our current difficulties, with as little justification for doing so as Blacks have for blaming Whites, for EVERYTHING bad. Problem-Makers never grow up, which is another reason they are Problem-Makers.

All the best. ORION! 88! *END*

P.S.: Your mailing arrived in dry condition. The water levels of the Limpopo & Zambezi Rivers must be low, since you are getting into summer. Thanks also for the bible-debunking booklet. Goyim read the jewbook in such a state of unconsciousness that its immorality is not seen as immorality. That says more about Goyim than it does about the jewbook.
