

20 JAN 10

Hail Chris! Thanks for your letter of 17 JAN 10 with the news of your March 'graduation.' This is a tough time to be White, male & starting in the job market, as you may discover, for our Zionist (jew-supremacist) bankster rulers have planned for this economic crisis, which will make the 1929-1939 Depression seem easy by comparison. And we're only getting started. Gentiles alias Goyim parrot the line that "It took World War II to get us out of the Depression." That's because the Zionist banksters & their stooges wanted the war alias the "Jewish harvest" to follow the First World War which had given them so much profit & power. So, if a war gets us out of a depression, then how come we have at least 2 wars going on, one in Iraq & one in Afghanistan, in this depression? ZOG knows, that is, our Zionist Occupation Government knows!

Sometimes a college professor has something of importance to pass onto the students. The prof. who welcomed my freshman class told us that a school or university is like a super market of facts & ideas. The instructors' job is to show us around the aisles so that we can find the knowledge we want. He denied that any school can magically confer knowledge, for the student must learn it for himself. "In the end," he said, "we are all self-educated." I remember hearing groans of disappointment, including my own, that a college was not like a gas station, where we could open the top of our skulls & say, "Fill 'er up!" Yes, we had to work at it, but eventually, we got used to reading, analyzing, memorizing, assimilating & then creating, based on what we had learned. My aim was to discover where my interests & aptitudes (if any) intersected, for that intersection would be my best basis for a career. As a child, I wanted to know what was going on in the world, & I wanted to explore The Amazon & visit foreign countries. These interests & my unexpected language skills directed my concentration on a field known as International Relations. If I'd been born Black, I might be U.S. president, for I understand that Obama studied in this field & even attended Occidental College in California, where I began my post high school studies.

I recommend these books for an Aryan's education: "Sex versus Civilization" by Pendell; "The Decline & Fall of the Roman Empire" by Gibbon; "The Agricola & the Germania" by Tacitus; "A Century of War" by Engdahl, & "Hitler's Secret Book" by Hitler.

If I had it all to do over again, I would necessarily do it all over again, for we must play the cards we are dealt. Had I met different people in different circumstances, I'd be a different person, with different experiences & different accomplishments, but I'd still be myself, for my tastes & interests in people, music, knowledge & literature were set at birth, & likely coded into my genes. Hence, our main job is to adapt to the people & the times we experience.

I'm not a "White Supremacist." That is enemy language. I am a White Nationalist, for I believe in a government of Whites, by Whites & for Whites. "White Supremacy" means that Whites will live with, & boss non-Whites around. That was my job in Africa, where I learned that I prefer to be among my own people. The USA alias Judeo-America is a multi-national empire run by Jews, for Jews, so we must work toward the establishment of a White Community within this Empire of ZOG, in order to break out of the Zionist yoke of tyranny. This will mean lots of Kampf (struggle) with lots of Geist (spirit).

Sorry, but I know of no Odinist nor White Power organization in the northwest, so we must build our own, by networking.

The knowledge I've acquired has not made me wealthy, but it has saved me lots of wasted time, labor & money, by allowing me to avoid Jew-scams, which have caused otherwise well off Goyim to lose their hard-earned investments, homes & savings. I understand that there is no place for me in this anti-White Zionist society, so I survive^d by doing menial 'coolie' jobs on a part-time, minimum-wage basis, since my return to Judeo-America in 1992. In other words, our first priority must be survival. Our quest for knowledge should be carried on, despite these economic & social limitations, for knowledge is good preparation for future events, & helps us understand & evaluate current events, so we can best organize our lives.

When I worked as a fire fighter for the U.S. Forest Service in summer fire seasons in California, fires were expected, most often in specific areas where there was lots of dry brush. When the brush burned, the soil was bare, & we knew that the subsequent rains would cause mudslides. That's why I knew that I wouldn't want to live amid such fuel, nor remain for the muddy consequences. But most sheeple ignore these recurrent facts, so I hear on Jewradio that the heavy rains over the previously burned areas are indeed causing mudslides & home evacuations. Nor did I wish to live near an earthquake fault, but earthquakes are less predictable than fires & mudslides. All the best. ORION!

Eric
