

Sam". It needs to be understood that opposition to US globalism is not a prerogative of the Left. US conservative syndicated columnist Joe Sobran has written:

"Anti-Americanism is no longer a fad of Marxist university students; it's a profound reaction of traditional societies against corrupt and corrupting modernisation, that is being imposed upon them, by both violence and seduction."

Turia - second thoughts on immigration

When the Maori Party was established a few years ago, party co-leader Tariana Turia had a grand vision of Polynesian and Asian immigrants uniting with Maoris into a voting bloc to dispossess the whites. Now that the Government campaign to enrol sufficient Maoris on the Maori electoral roll to justify the creation of another Maori MP has failed, this vision has soured. Turia has lambasted successive immigration policies as a deliberate plot to further reduce the number of Maoris to minimise their influence, and has demanded that Maoris be consulted on immigration levels. *"I think that it's quite deliberate to ensure that Maori numbers don't grow at a faster rate than the rest of the NZ population"*, she said. (Dom. Post, Feb. 3, 07).

Yet in 2004 Turia was optimistically saying that Maoris combined with Polynesians and Asians would comprise up to 60% of the voters by 2050. (Kapiti Observer, June 28, 04).

Scientist affirms "race"

Dr Bob Brockie, Dominion Post science columnist and research associate at the School of Biology, Victoria University, Wellington, has questioned the dismissal of the concept of "race" in favour of "ethnicity". Stating that "race" is a reality based on gene clusters, he contends that despite the PC trend even among scientists to claim that "race" has no validity, he questions whether the 1% DNA difference among races is of no consequence. Citing the prestigious New England Journal of Medicine, Prof. Neil

Risch, head of a 'high powered medical research team' at Stanford, writes that 'the scientific journals have got it wrong'. Brockie explains:

"Prof. Risch's team concur on the genetic conformity of the human race. We can all interbreed with each other, and we all share about 99% of our genes. But whether typing by proteins, chromosomes or dna, the genetic features cluster round and the deepest genetic differences lie between the five continental races - the Africans, Caucasians, Asian, Pacific Islanders and Native Americans."

Brockie states that Risch et al say "it's misleading to assume that the only genetic differences between races are genes for skin colour..." Risch thinks that these racial categories are scientifically meaningful and "medically very useful." He points out that some diseases are race specific, as are some treatments, ordinary anaesthetics being dangerous to Black S. Africans, for e.g. *"Prof. Risch and co say that it's important that doctors, epidemiologists, drug companies and public policy-makers acknowledge these genetic racial differences. The Stanford researchers think that race blind or race neutral medical approaches are neither equitable nor advantageous and that ignoring racial differences will ultimately lead to disservice to racial minorities."*

"Call me old fashioned but I think we are muddying the English language by supplanting the precise scientifically justified word race with the woolly polysyllabic euphemism ethnicity," Brockie writes. (Dominion Post, Jan 29, 07).

National Democrats

The National Democrats Party, formed in 1999 by long time activist Anton Foljambe, have re-formed. www.nationaldemocrats.org P.O. Box 13-939, Christchurch 8141, New Zealand

27 FEB 10

Hail Clinton! Thanks for your interesting letter of 23 FEB 10. Aside from the normal spic gang shootings, things are all quiet here on the Western Front. Gentiles don't understand that more spicklettes + fewer jobs = More crime, 'cause Gentiles (Goyim) are so dumb, as jews say we are.

In regard to old books on "race," I have my doubts, for current science shows us how important genetics are in medicine & personal identification. As I recall, "races" were pretty much what any writer claimed them to be. Some 'racial scientists' thought that one's race depended on his head formation, so "the White Race" was "classified into "long heads" & "round heads." Then "race" became geography, as in "nordic," "alpine" or "mediterranean." As I've mentioned, who could be more "nordic" than Eskimos, who live in the Arctic Circle, unlike most Whites? During World War I, The National Geographic published an article entitled "The Races of Europe." The author assumed there was an English race, a French race, a German race, &c., but the poor Germans had been "infected with the Prussian virus." I believe its symptoms appeared in the ability to march in step, speak clearly & carry out orders, like the staff at a McDonald's restaurant. In other words, that version of "race" was just jew-bankster war propaganda. English, French & Germans are members of the White Race. As I deduce from my research, there are 3 races: White, Black & Yellow. Mixtures of races are mongrels with unstable genetic components, just as a mongrel dog is mixed up in terms of breed & behavior. Races are then divided into Nations (people with identifiable similarities) in looks & behavior. Once again, DNA research reveals our similarities & differences. One example I recall from the jewsmedia was that of a Lithuanian jew who needed an organ transplant. The donor HAD TO BE another Lithuanian jew! Oops, wha happen to "human equality?"

In medicine, different races have different, genetically-based diseases. Only a jew can get Tay-Sachs disease, for instance; only those with Black genes can have sickle cell anemia. Yellows & parts thereof are prone to obesity & diabetes. We can see this factor in the U.S. "White" population, who have lots of "Indian" (Amerasian) genes, as opposed to the White population of Britain, who live equally on junkfood, tobacco, alcohol & lack of exercise. According to a researcher in mental illness whom I interviewed, most mental illness, if not all is genetically inherited from one's parent or parents, so family histories are important. If we ignore them, mental illness will continue to become our growth industry. We need to get beyond the carelessness of 'finding a hole & filling it' or 'finding a pole & stuffing it.' Both parents are their children's future, in more ways than one, that of merely bringing them into the world. Brownest Yakima is swarming with mental patients, most of whom walk around talking to themselves, when they are not talking on cellphones. This was true of every U.S. town I've lived in, since the 1950s. The ancient Hindus warned that the confusion of races results in "the loss of understanding, & from this, all evil." Judeo-America behaves like a thoroughly mongrelized society, as we go down to extinction in our jewish wars for Israel & Rothschild banksters. If we don't know who we are, we cannot know what is good or bad for us. The theory of evolution & DNA research apparently shows that humans are related to other humans, who are most closely related to chimpanzees, who are also related to plants & other animals on this planet. What is important are not our similarities, but our differences, just as intelligence & strength are more important for our survival than are stupidity & weakness.

My racial awareness came from my exposure to large samples of my own race & those of others. I've thus noted that Whites invent & forget; Yellows copy & remember, & Blacks destroy. Jews are admitted mongrels, i.e. Afro-Eurasians, who usually combine the worst behavior of all 3 primary races. Jews rule over us, which explains the dire state of our world.

Hitler has been accused of many contradictory things by jew propagandists, so when we put their malicious accusations together, we have Hitler as a "jew-hating jew" & a "pro-White Rothschild agent." We do know that World War II was prepared at Versailles, following W.W.I, by the Rothschild banksters & their stooges (Freemasons). The script was to set up Germany for involvement in W.W.II, on behalf of Soviet Communist conquest of Europe. Hitler was supposed to invade Britain, which would have allowed the jew, Stalin alias Djugashvili, to invade all of Western Europe, to the Channel. But Hitler "broke the rules" by attacking the USSR before they did. The truth appears in "The Icebreaker" by former Soviet military intelligence officer Suvorov. Hitler did work with the Zionist founders of Israel to get jews out of Europe, before & during W.W.II, so The Holohoax is just a scam for imposing fake guilt on Germans & all Whites, as well as extorting money from us on behalf of the real criminals: The jews & their bandit state of Israel. That's why we live under ZOG, our Zionist Occupation Government. All the best. ORION!

Eric
