

3) The promises of the ANC in 1994 have come to very little. Every Black man was expected to get a 8 bedroom house with a swimming pool and a Mercedes Benz in front of the door. The previous regime left them 700 000 serviced plot, so it was easy to build houses at the beginning. Even so ¾ of those houses are so badly built that they fall apart and will have to be rebuilt. They gave running water to millions of rural people, but now the pumps are falling apart and there is nobody to repair them, the local people people being more interested in handing the begging bowl than making a plan to fix things. In any case what one got for nothing is never appreciated. We have regularly stories with photos on how those poor Black children must sit on broken benches. The question arises as to who broke the benches , or the windows or the doors or whatever is broken. Certainly not the apartheid regime or Whites. It is all self inflicted, so why should anybody worry is beyond my understanding. If the community wants better facilities, they just have to make an effort and repair them themselves. In the National Socialist Cuban system (it has long ceased to be communist), you can be sure that pupils breaking desks would soon find themselves cutting sugar cane. It is true that the Cuban system has produced health workers on a large scale, but of what quality? We have seen those here and they were not so qualified. The reason the state in Cuba could do that, was the fact that Cuban professionals were prevented from leaving their country and had to accept whatever the state was prepared to offer them. Most of the doctors who came to South Africa from Cuba never returned to Cuba as they could make a bigger buck elsewhere. The same goes with other professions. Free education does not exist, neither a free health system. Since money does not come from heaven, SOMEBODY HAS GOT TO PAY, either through low wages and low standard of living as in Cuba or through taxes as in South Africa. The problem here is that the tax base is so small that the productive element is unable to finance services to the useless eaters. In India the system works as the government does not tax the villages and does not spend any money on them either. With an intelligent population, Indian villages take care of their own needs. In South Africa, we are already overtaxed so there is little extra which can be used to save the "useless eaters".

As to employment, it is simple to understand. In the world there are CAN DOs and CANNOT DOs . Blacks, unfortunately for them ,are among the second group. An economy is like a train. You have a steam engine and you have wagons. The steam engine receives more coal (higher wages) as it is there to pull the wagons . The steam engine can pull so many wagons. If more are added to it, it will simply stop. In South Africa, the economic steam engine is largely White and Indian. The wagons are Black and every year more wagons are added to the train, so eventually it will stop. The regime solution was to redistribute the coal from the steam engine to the wagons. Since on a train , the majority is made of wagons it would be the democratic way to go. With little coal to burn, the steam engine stopped pulling. A solution was soon found . With the advent of democracy, the steam engine was discarded and the first wagon was promoted to the title of steam engine and a fire was made to prove that it could smoke as well. Of course it won't be long before the entire train burns down. Fortunately the regime seems to understand that it cannot carry on anymore, so we can expect that a lot of wagons will be dumped on the next siding to survive as they can. It is called getting rid of the non paying passengers.

Education is a trickier problem. What the regime has done is to level at the bottom. It just brought down the quality of education so that Black pupils would not feel so inferior. Unfortunately modern society requires more than pieces of paper. It requires genuinely qualified people with mathematic and science as subjects which only the Euro and Asian communities can provide. Blacks sadly do not fare well in mathematics and cannot fit in the high tech society of the future. And mathematics as the German philosopher Oswald Spengler noted, is the beginning of all civilisation. The problem is lateral thinking and black pupils do not understand abstract concepts. Unfortunately it is genetic. Like an author once said: WHITE GENES CREATE CIVILISATION, ASIAN GENES COPY CIVILISATION AND BLACK GENES DESTROY CIVILISATION . That is the reason why Africa is going down the dump. 90% of all useful things invented were done by Whites, 10% were invented by Asians. The book of Black inventions is the thinnest book in the world. The Internet mentions 142 "Black" inventors, most of them light skin coloureds . Nothing useful was ever invented by Black Africans. Inventions are a sign of genius and without genius there cannot be civilisation.

Indeed capitalism can be evil but no more evil than other system. The Communist system in China killed 60 million people. The National Socialist cum capitalist system increased the welfare of the population tremendously, even though it created different classes with very rich and very poor as in South Africa. They could go back to Mao's time if they wanted equality, but as Nietzsche once said INEQUALITY IS NOT A SIN. THE SIN IS TO PRETEND THAT THERE IS EQUALITY.

17)

South Africa will go its own merry way. Its economy seemingly strong at present cannot sustain its momentum. It simply cannot compete. What saves it is the demand for minerals mainly by China. However a crisis in the American economy would scuttle the Asian economy and our own as well. Without mineral export, there will not be enough currency to sustain imports and since our factories are now in China, the economy will be in dire straight with attendant unrests. In any case, mines are a depleting assets and will close down in maybe 10 to 20 years with nothing to replace them. Climatic changes will affect agriculture as well and the capacity to feed the masses. Unemployment will increase and demands to repatriate the estimated 12 million economic refugees who take jobs from the locals will get even more vocal. Civil war is on the map between various factions. The inactivity of the regime on the AIDS front is understandable. The death of "useless eaters" will relieve the demographic pressure, eventually bringing the population in line with the capacity of the land to carry it. But that will be the problem of the entire world. Let us all fasten our seatbelts ~~AS~~ there is a lot of turbulence ahead.

And Professor, if you feel so much about the underdog, the solution is at hand. As Jesus said to the rich man: "If you want to gain the kingdom of heaven, give all your money to the poor and follow me". Actions are always better than words, so if you want to do something, sell all your assets give 90% of your salary to the poor and live like a pauper. Only then will you be entitled to criticize and to accuse others. If you are not prepared to do that, forever keep your peace. It is always the same story: Whites must do this, capitalists must do that, imperialists must pay this and colonialists that, but Professor Kunnie want to enjoy the fruits of capitalism while berating the costs. As I told a church minister who was preaching on the same subject: "When you drink your cup of coffee in the morning, do you worry about the slave wages earned on the coffee plantations? Would you pay twice the amount so that those workers get a decent wage? Or would you switch to a cheaper brand? ". I never got an answer. What would you do, Professor? The poor will always be with us. The fault is not in the system. It is in their inability to be anything else. MAKING THE RICH POOR WILL NOT MAKE THE POOR RICH. You can hand over all your money to the poor. They will just have one big party and will be just as poor the next day. AND IF BLACK LEADERS ARE NOT PREPARED TO TAKE CARE OF THEIR OWN, WHY SHOULD EUROPEANS OR ASIANS GIVE A DAMN. ?

Anyway I wish you well and hope that you will lose your Marxist delusions in favour of REALITY.
Yours sincerely,

C.M.MATHEY

THE GENETICS OF THE JEWS: "Jews are not White," says Professor Leonard Fein, who teaches Politics & Social Policy at Brandeis University in the U.S.A. Fein was addressing the 17th biennial congress of the Jewish Board of Deputies in Johannesburg, South Africa in May, 1972. "You are not White, either symbolically or literally, as anyone knows who goes to Israel," he said. Professor Fein, besides being a specialist in jewish community problems in the U.S.A., is a specialist in Black-White relations in the cities. RAND DAILY MAIL, May 15, 1972.

"Jewish blood is different," says jew Dr. Michael Kaback of the John F. Kennedy Institute in Baltimore. Jewish blood lacks an enzyme called Hex A and often results in a condition called Tay-Sachs disease. Over 90% of the Tay-Sachs disease is found in jews. This disease causes convulsions, paralysis, idiocy and death."

A TV documentary featured the story of a jew who called himself "German". He mated with a Cajun woman. Their child was born with Tay-Sachs disease and died in infancy. Jews of all parts of the world have specific genetic similarities, even common fingerprint characteristics, according to Dr. Leo Sachs, who heads the genetics section of The Weizman Institute of Science in New York, in collaboration with Dr. M. Bat-Miriam.

"The Genetics of the Jews" by A.E. Mourant et al., Oxford University Press, 1978, reports the findings of jew hematologists, whose work was originally published in The Lancet, the journal of the British Medical Association. They report that "even the blondest jew has Negro marker genes... which are due to concubinage (prostitution) and slavery."
