

OF HOMELANDS LOST & FOUND by E. Thomson

White Americans have had the imperial experience, along with the judeo-capitalist experience, but only jews, Gypsies & American Indians have had the National Experience. Post-Soviet Russians wish to defend their homeland by recapturing the Russian National Experience. Without Russian Nationalism, they know they cannot defend the land they live on. Without Nationalism, peoples give up their homelands, as in Europe, Ireland, America, (Canada included), Australia & New Zealand. Multi-racial, multi-cultural entities can be empires, but never nations, so we should stop abusing language by referring to the USA as "a nation." It never was. Orwell warned that "Tyranny begins with the abuse of language."

In his speech, "Life in the Third Reich," Friedrich Kurreck showed us how a homeland is won or lost, depending how people see themselves as a Nation. When a people has a firm idea of who they are, they also know what's good or bad for them. Nations, like families, are collective, not individual, for they put the wellbeing of the Nation first, just as a parent should put the welfare of the family first, if he is to be a good parent. Teams are collective, as are crews, tribes & other human organizations, rather than impromptu gatherings of 'individual all-stars.' The credo is WE, not ME, but, as The Law of the Contrary dictates: The individual can only realize his full potential in collaboration with his Nation. Otherwise he would be like Beethoven confined to an African village or Dr. Diesel in the stone age. Jeffersonian cults of individualism take a White social context for granted, even if they offer no support for the community required to sustain them. This is like driving on roads with no intention of maintaining them, but taking them as 'given,' much like the 'consumers' who plunged into the river when the bridge collapsed.

Nation is not location. It is a deeply-held concept of identity & team spirit, the outward manifestation of biopolitics. Hence, a Nation would survive, even if its 'homeland' sank beneath the sea. Without the Nation, as a concept & code of behavior, there can be no homeland. Kurreck describes how the German Nation gained their homeland & are now losing it to aliens because their idea of Nation is subverted by their Zionist occupiers.

A Russian writer observes that the current task of Russians is to define themselves as a Nation, for when a people's identity is uncertain, so is their claim to the land they live on. The Zionist founders of Israel had the same task: To define who is a jew & therefore an Israeli. In contradiction to the tenets of Zionism, there are Israeli Arabs in present day Israel! If there were sufficient Arab Israelis, then Israel would not be a jewish homeland, but the jewish Nation would be as lively as ever, since they don't require a homeland. Jewish identity is sufficient. As Dr. Shahak said, two thirds of the Israeli jews are not religious, for they recognize their Nation as biological, not theological. Some of us Goyim also recognize Judaism as usury, rather than theology, but who cares what Goyim believe?

National survival requires more than a homeland. It first requires self-government & economic independence, otherwise it cannot live within its chosen homeland. National existence is not merely definition, however, it is doing that which is necessary to sustain the Nation. Nationhood is not easy, for it requires eternal vigilance, diligence & wisdom on the part of its members. A 'homeland' is not a place where alleged members of a Nation can go to mooch off the productive members & indulge in selfish pastimes. Nationalists must be workers for the common good.

Nations exist because they include certain people & exclude others. If they are all-inclusive, they destroy themselves & have no homeland, just as a house without an owner-occupant is home to no one.

The current state of Covingtonia or The NW Great White Hopeland is a clear example of land without Nation. Ostensible Whites are flocking, that is, fleeing into the northwest, & so are the non-Whites whom the Whites employ in preference to "more expensive Whites." The non-Whites flow in as long as the Whites pay them to come, in wages & welfare. Less prosperous Whites, under ZOG, face not only job-losses, but higher housing costs because of this simultaneous White/non-White influx. This is what we can expect when we put land above Nation & our individual incomes over biopolitics; for the non-Whites who occupy the land also want to run it, on behalf of their Nations! Whitey only wants to consume ad infinitum, ad nauseam: Cink! Burp.

No change of place can save Our Race. Only change of mind can save Our Kind.

ORION!
