

# **MOVEMENT TO SAVE IRELAND**

**PO BOX 455, LIMERICK, EIRE**

*Greetings Comrades,*

My name is Veronica Kavanagh and I am honoured to have been appointed England Branch organiser of the Movement to Save Ireland [MSI].

There are many Irish folk living across England with large Irish communities in many inner-city areas, including my home city of Wakefield and neighbouring West Yorkshire towns and cities such as Leeds. Irish people living and working in England have witnessed the effects of large-scale immigration into the areas where they lived and have seen the catastrophic effects that these people with their alien cultures and customs have brought into this land. Many of the Irish folk have believed that their home country, Ireland, was untouched by the immigrant hordes and Eire was, until recently, the only White country in the Western World with a growing indigenous population. This is no longer the case with treacherous politicians and civil servants keen on making that once proud and independent nation into a satellite of the European Union and a dumping ground for those non-Whites that even England doesn't want.

Once we had conflict in our beautiful land: our grandparents, aunts, uncles and parents fought idealistic wars over the type of church we went to or whichever government we believed we should be ruled by. But now a greater danger lurks...non-White immigration! As we have seen in the areas of England in which we live, mass non-White immigration has created division and unrest as the immigrants impose THEIR way of life on the native people with the compliance of traitors in government.

If we do not now make a stand for our RACE as a whole, our history, heritage, religion and heroes will cease to exist. The likes of Collins, Pearse and O'Ri will be forgotten and all they fought to achieve will be lost. Our past struggles will count for nothing and we will be controlled by a power much greater than England. We'll be enslaved by ZOG - the Zionist Occupied Government. Maybe then Catholic and Protestant will look at each other wonder what the hell have we been wasting our time for?

Brothers and Sisters of Ireland let us unite and Keep Ireland White. We must keep the memories of our heroes alive! Join the MSI today!

*In good faith and TAL*

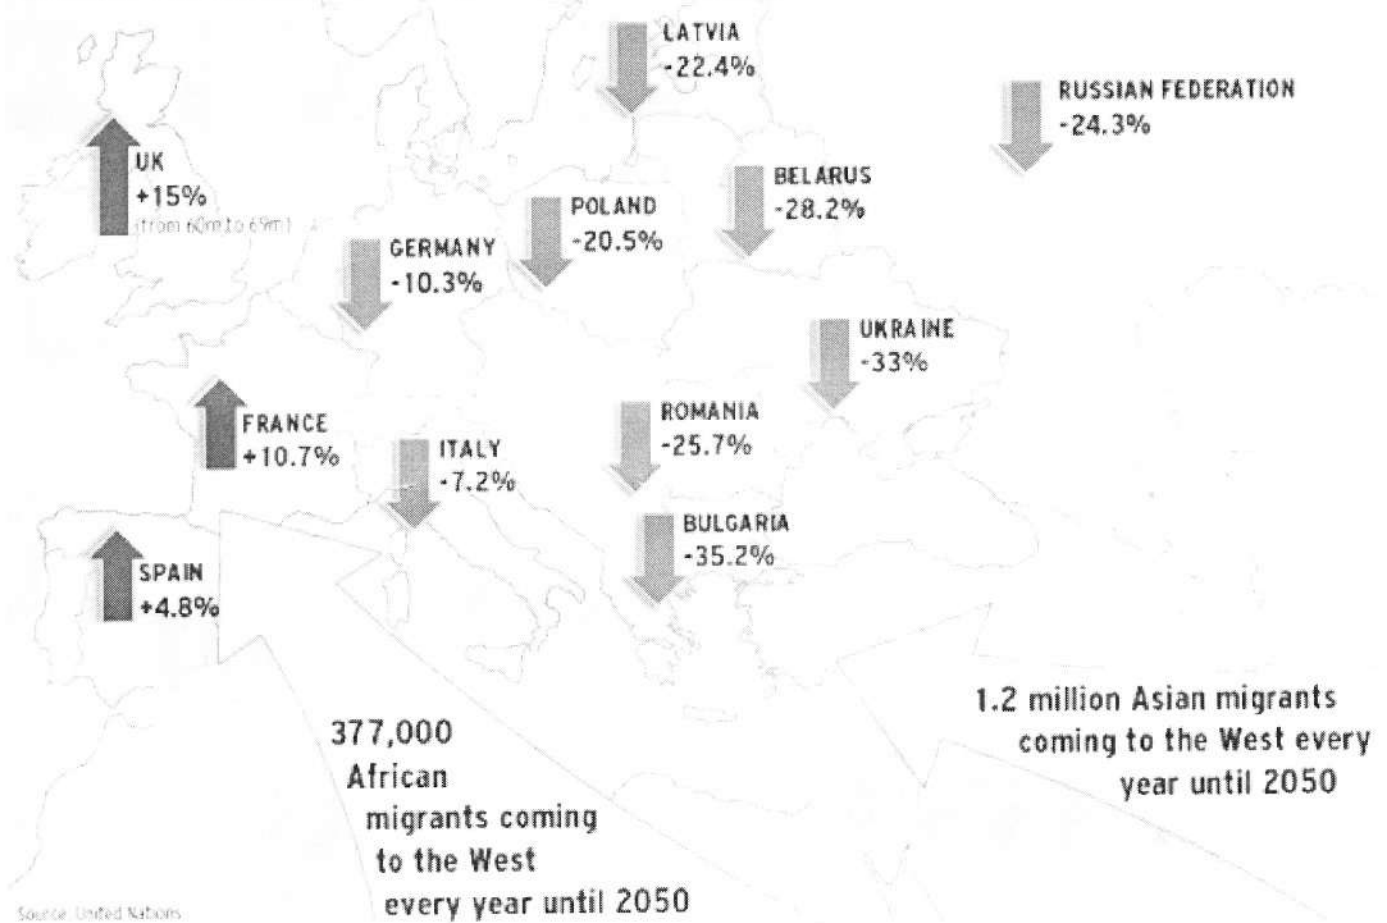

*Veronica Kavanagh*

## Europe's population change 2007-2050

Even the Pope is saying:

"One must unfortunately note that Europe seems to be going down a road which could lead it to take its leave from history,"

"You could almost think that the European continent is in fact losing faith in its own future," Pope Benedict said.
