

## PUBLIC INFORMATION BULLETIN OF NATIONAL ACTION

NA accept no liability for information provided/inferred. STORM is an information source only.

Quantum Leap Weapon Research by Hitler's Germany Now Benefit USA: A Review of *German & Allied Secret Weapons of WWII*:

1. SONAR BLINDERS: "To defy detection by Allied naval vessels [German] U-boats used *Pillenwerfer* a perforated canister containing chemicals. When released into the water from the torpedo tubes it reacted to create a gas. This turned into a thick cloud of fine bubbles a dense screen which could not be penetrated, effectively blinding ASDIC or Sonar equipment on Allied sub-hunters" (p. 52 'Sea war: Blue print for wild blue yonder' in Ian V. Hogg & J.B. King *German & Allied Secret Weapons of WWII* London: Phoebus Publishing Co. 1976).
2. U-BOAT HELICOPTER: "For warning of the approach of Allied vessels U-Boats were issued with the Focke-Achgelis FA-330 *Bachstelze*. Resembling a helicopter it was an un-powered 'rotor-kite' which was towed on a line behind the U-Boat at 400 feet above the sea whenever the U-Boat surfaced for battery charging. 200 of these kites were built and used very effectively and remained a secret from the Allies until almost the end of the war though they were little used after 1944" (p. 52 *ibid*).
3. MIDGET SUBMARINES: "While Royal Navy midget submarines were used during war it is less well known that Germans had midget submarines in service before war broke out. First German project was *Hecht* (Pike) little more than a piloted torpedo. Fifty of these were built. An improved model, *Neger*, was replaced by *Molch*, several of which were used in late 1944 and early 1945 against Allied shipping in the approaches to Antwerp. *Molch* was superseded by *Marder*. From manned torpedoes the designers progressed to midget submarines having a fully enclosed crew, rather than have them riding on top. The first of these was *Hai* (Shark) with a remarkable underwater speed of 20 knots. It was capable of staying submerged for up to sixty hours. The next model was *Biber* (Beaver) at 19 feet long and three tons. These were used with success in the Scheldt estuary and against Russian coastal shipping off Murmansk. Finally came the *Seehund* a 15 tonner with a range of 500 miles. These were completed in 1944 and went into action in January 1945 in the Scheldt estuary and against shipping in the Thames Estuary and off Margate" (pp. 55-57 *ibid*).
4. GUIDED BOMBS: "The Luftwaffe was attracted to the possibility of controlling a bomb after it was released. The most successful was the *Fritz X*, basically a 1400 kg bomb fitted with four wings and a tail unit. Radio equipment in the tail picked up signals from a parent aircraft. Development for the bomb was begun by Doctor Kramer in 1939. In early 1943 it was issued for operational service. On 9 September 1943 its most spectacular success came east of Sardinia where it sunk the Italian battleship *Roma*. This led to further developments the 2,500 kg *Fritz X-5* and *Fritz X-6*. Another successful controlled bomb was the rocket-boosted *Hs 293*. 12,000 of which were built. Dropped from Do-217's they were used often in 1942-43 against shipping in Bay of Biscay and the Mediterranean" (pp. 96-97 *ibid*).
5. ANTI-RADAR GLIDE-BOMBS: "Germany was keen to counter Allied long-range navigation system which allowed bombers to attack Germany with a high degree of accuracy. Luftwaffe soon located *Loran* transmitters in the South of England but attacks on them proved too costly. Dr. Vogt of Blohm und Voss produced a solution: a gliding bomb with a radio control system actuated by the radar stations own transmissions. A bomber pilot needed only to get within 200 km of target and let the *Bv 246 Hagelkorn* bomb go" (p. 99-100 *ibid*).
6. AIR-TO-AIR MISSILES: "The Germans developed three air-to-air missiles for use by aircraft against other aircraft. The *R4M* was designed for use by the *He 162* jet fighter. The *Hs 298* was to be carried by the Dornier Do 217 or Focke-Wulf 190 with guidance by radio command from the parent aircraft. The *X4* air-to-air missile was developed by Dr Kramer in June 1943 for Ruhrstahl AG. Designed for use on the Me 262 and Fw 190 the first test flights in September 1944 were very successful" (p. 100 *ibid*).
7. ANTI-AIRCRAFT ROCKETS: "As need for anti-aircraft defenses grew...Germans saw advantages of the simple rocket. First of these was 7.3cm *Fohn*, a 35 barrel launcher mounted on a trailer or set in a concrete bed for static sites and fired in salvos. More ambitious was the 'Typhoon', a 46-lb rocket with a liquid-fuel motor. Traveling at 3,000 feet per second it reached an altitude of nine miles. These did not enter production till January 1945 with only 600 rockets being produced before the war ended. Amazingly the per unit cost price was estimated at only 25 marks - 80 pence by today's standards. A parallel design was the 'Tornado' which used a solid fuel motor. All these weapons were large and crew-served (p. 105 *ibid*).
8. ONE-MAN A.A. ROCKETS: But with introduction of one-man anti-tank weapons similar designs soon appeared for anti-aircraft weapons. First of these was *Fleigerfaust* a little known development which, had it come earlier in the war, would have made life very unhealthy for low-flying aviators. Consisted of nine 20-mm tubes in a simple frame with a shoulder rest and a pistol grip. *Fleigerfaust* was a highly effective to a range of 2,000 metres. But time was against it. Production was not approved till January 1945" (p. 105 *ibid*).
9. ANTI-AIRCRAFT MISSILES "Whereas little effort was put into unguided anti-aircraft rockets, the amount of research the Germans put into guided anti-aircraft missiles was tremendous. First of these was the Henschel *Hs 297 Schmetterling* (Butterfly) begun by Professor Wagner in 1941. At 980lbs it had a speed of 535mph and a range of ten miles. It was controlled by radio command from an operator. Next came *Wasserfall* (Waterfall) a 26 foot long liquid-fueled rocket first proposed in 1942. It was very advanced for its day. Designed for the defence of cities, six seconds after launch it was gathered into the beam of a radar. From then it was controlled by radio while the radar tracked both it and its target. At 4 km from the target an infrared homing system would detect the heat from the bomber's engines and take over guidance to the target. To ensure success even from a near-miss a proximity fuse, working on infra-red principles, would detonate the warhead within 10 metres of the target. First test firing took place at Griefswalder Oie in 28 February 1944. Eventually over fifty missiles were made and fired. Other anti-aircraft missiles designed built and tested were the Messerschmitt *Enzian* (Gentian) developed by Doktor Wurster of Holzbach-Kissing AG of which 60 specimens were actually built. *Rheintochter* I, II and III developed by Rheinmetall-Borsig with an altitude of 12,000 metres saw 80-odd fired" (pp.107-108 *ibid*).

"After the war Allied technical investigators descended on Germany. They found so much that it was six years before they were finished assessing their results and over fifteen thousand reports were issued some of which are STILL CLASSIFIED TODAY (our emphasis). The German secret weapons of yesterday became the American secret weapons of today" (pp. 55-57 *ibid*).

[In closing days of WWII German scientists were able choose who they would be captured by, capitalist Americans or Bolshevik Russians, simply by heading West or East. After WWII Soviets 'developed' a series of crew-serviced anti-aircraft rockets and single-soldier use missiles, the SAM series, which the Americans were never able to match. However, the Americans showed strength in large, long-range rockets such as got them to the Moon. We now know ALL this technology had one source: Hitler's Germany. RE].

## OPEN WOUND OF QUEENSLAND HEALTH

Channel Ten (Brisbane) *Ten TV News* 5pm Thursday 25 August 2005: Reporter Danielle Isdale, Brisbane: "Former ALP Health Minister Wendy Edmonds admitted today she first heard of a 'secret' public hospital waiting list of 100,000 patients in need of surgery 'seven years ago' when she first became minister. In fact, at the time she made the issue public, voicing her 'concern'. When asked by Health Inquiry chair Tony Morris QC: 'why then did you attack Opposition claims of such a list 12 months later, denying their existence?' she could not explain".

**WAITING LISTS, DEATH LISTS:** Explanation is simple: under anti-white racist junta of Ultra socialist Pete 'Bleating' Beattie Qld Health has become a killing machine, a vehicle for shortening life expectancies of whites while artificially prolonging lives of useless blacks. How? Several methods are applied. Common trick used by QH doctors is, after an initial consultation to assess a patient's risk of death, to put them on an excessive waiting list. If a patient needs urgent surgery within 30 days then they are put on a 60-day list. If they need it within 60 days they are put on a 90-day list. If 90 days, then onto a 120 day list. Explains QH's statistically 'excellent' record for patient survival: those in most urgent need of surgery DIE whilst waiting but BEFORE entering hospital and therefore are never recorded as 'patients'. QH's statistics look good while their death-rates are notoriously high. Who decides who gets surgery and who goes on what, in effect, a 'death-list'?

**JEW RULE:** Soon after 9-11 in New York QH began receiving a flood of job applications from US Jew doctors and senior medical administrators. Were readily accepted by Leftist ALP government, always eager to hire any alien. But on arrival these Jews were appalled to find Australia still so 'white'. After working in mulatto America with its teeming masses of negroids and Hispanics they loathed having to care exclusively for white patients. A 'solution' was soon found: 'waiting lists'. Looked fair and equitable.

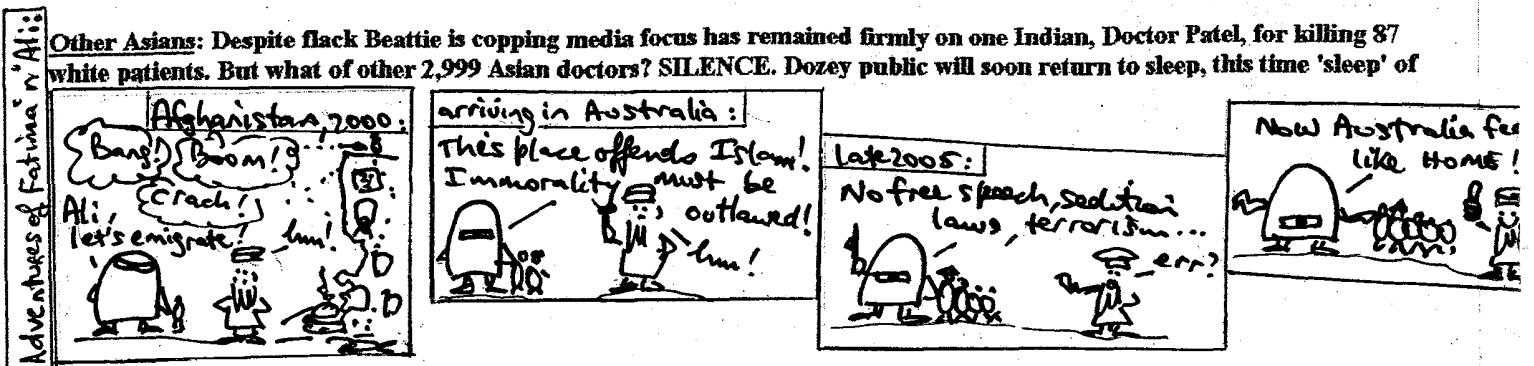

**MEMORANDUM OF UNDERSTANDING:** Next 'trick' was Beattie's MOU with the three black racial groups in Qld: so-called Aborigines, Torres Strait Islanders (TSI) and 'South Seas Islanders' (SSI). SSI were previously known as 'Kanakas' but were recently re-labeled by Leftist ALP bureaucracy as SSI was thought more politically correct. SSI MOU was publicly signed by Beattie on lawn at Parliament House, Brisbane shortly before 2001 State election. Days later notorious footballer Mal Meninga, brother of racist rapist-murderer Bevan, 'came out' as SSI. Till then had always boasted of being 'Aboriginal' and received much public funding as 'role model'. Now being SSI was 'flavour of the month' this Uncle Tom decided he was SSI instead. Why was he not charged with fraud? Instead 'Big Mal' became instant 'role model' for young black SSI's, as he had been for young Abo's. Yeah, like his brother!

**DEATH SENTENCE:** MOU was a death for any critically ill whites. Replicates situation in New Zealand where, under iron rule of Labour Party femo-Nazi Janet Clarke, so-called 'indigenous' Maoris receive preference in health treatment. Now if elderly white taxpayer and a young black drug addict social parasite both need hospital care in either Qld or NZ who gets 'preference'? That's right, long-suffering white taxpayer dies, parasite lives. Foolish whites retain 'faith' in ALP's cradle-to-grave 'social welfare' system as blacks become hospital regulars, some staying up to six months.

**THE 'LATIONS':** One Mt Isa black did this in Brisbane hospital. For 'cultural reasons' during its stay the entire extended family, or 'lations', from Mt Isa were accommodated at vast public expense close. Why? So it wouldn't be lonely. Reports from within QH tell us is now 'standard practice' for non-urban blacks to 'assist their recovery'. QH, like all Qld government departments under ALP, is currently over-run with 'Indigenous Liaison Officers' a cute way to get un-educated blacks into high-paying public service jobs. Wonder where the money went? Your taxes fund deliberate inefficiencies. Jews decide who enters hospital and give blacks preference. But what of few whites who manage to sneak into Qld hospitals? Something has to be done to prevent them leaving. Jews and ALP lackeys implemented a massive influx of un-qualified 'Asian doctors'. When finally exposed by sole Qld National Party back-bench MP in early 2005, the Asians subsequently got full public blame, via pro-ALP/alien media, not ALP or their Jew masters.

**ASIAN STAFF:** Across Australian 3,000 foreign 'doctors' work in public hospital, 1700 in Qld alone. Many of these, as seen in Victor Berg (Russian JEW) and Dr Patel (India-US) cases before Morris Inquiry, had no formal qualifications beyond forgeries they themselves crudely manufactured. QH officials now admit they knew both were frauds but did not sack them. When fraud became public knowledge QH officials paid their air-fare so they could escape Australian justice. Those same 'public health' officials remain in power. Unrepentant they then had Morris Inquiry closed down in late July 2005 alleging Inquiry Chairman Tony Morris QC had "made them appear incompetent". Why so arrogant when exposed? They know they have full support of Beattie himself. Beattie also has his orders: delete aging white population. Inrush of US Jews and alien blacks refuse to pay taxes to fund longevity of whites. So they must die. Australia is to be a black republic under JEW rule. Is no place here for whites just as is none in Rhodesia or South Africa. But as whites are still in the majority here it would be rash to attempt an 'armed struggle' just yet.

**Other Asians:** Despite flack Beattie is coping media focus has remained firmly on one Indian, Doctor Patel, for killing 87 white patients. But what of other 2,999 Asian doctors? SILENCE. Dozey public will soon return to sleep, this time 'sleep' of

death. Any soul unfortunate enough to enter a Qld Public Hospital soon notices how few whites work there. Nurses, 'doctors', physios, technicians, ancillary staff - all are Asian. One patient from Victoria said on arrival: "I'm glad to be in a Qld hospital - in Melbourne hospitals you'd think you were in Peking!" Then she looked around. Her eyes widened as she realised she was now in 'Little Bombay'. Eyewitness told us how an 86 year old Russian patient was being readied for a dangerous procedure. Asian doctor lent close to her as she was hard of hearing. As he was explaining risks of death her aged arm shot out and grabbed him by the neck-tie: "where are you from?" the old crone gasped. "Iran" he spluttered, choking. She slowly released her grip. Nurses nearby were aghast at old woman's blatant 'racism'. Not only usual Indian and Chinese doctors now flock to Qld. Filipina, African, even PNG 'doctors', too, come to see how many whites they can kill while Mr Beattie pays them and smiles. Don't expect to see any of these up before Tony Morris, QC.

**Night-Prowlers:** Results of this Asian Invasion of our white, taxpayer-funded hospitals? Many whites die 'unexplained' deaths. Night-staff at most hospitals are now 100% Asian. White staff explain this as Asian greed for higher pay from after-hours 'penalty rates'. Yet most patient deaths occur between 1-3am, when ONLY Asians are on duty. One Brisbane hospital reports two white deaths each night, every night, with seven per weekend. When quizzed night staff simply replied: "everyone knows people die between 1-3am. It's a natural phenomena". No, an Asian-induced phenomenon. Staff member told us how they overheard two Asians discussing a 'demanding' elderly, white, female patient. One Asian laughingly suggested: "give her a mild dose of [X drug], turn off her O2 (oxygen) then go on tea break. When you get back switch on her O2 again and call the charge nurse who'll report her deceased". Both laughed. Why did no hospital staff report suspicions to government officials before Patel case?

**'Code of Silence':** Just like Sicilian Mafia QH operate under a 'code of silence', so-called Privacy Act 1999. All QH staff are forced to attend annual 'Code of Conduct' lectures warning of dire consequences for any staff who 'squeal' e.g. up to two year gaol for contacting your own MP. Staff are told of infamous 'glass of milk' case to intimidate them into submission. "A staff member was drinking milk for morning tea instead of tea or coffee. A fellow staff member denounced him for this, anonymously, to Human Resources. Milk-drinker was sacked for 'theft'. Why? Under QH regulations milk is an 'additive' to tea or coffee. Must not be drunk alone. As such he was 'stealing' it". Such petty obscurantism rules minds of staff. 'Anonymous tip-offs' means HR staff now employ five staff just pursuing other staff. Why drink milk straight? Tea or coffee aggravated his ulcer. But they sacked him anyway.

**'Time Sheet Fraud':** One QH/HR favourite is 'time sheet fraud' where staff member reports another for being late or too early to leave work. In one case a worker was asked by his unit manager to start work 30 minutes earlier than the rostered time for his shift each day. In return was allowed to leave 30 minutes early each day. Suited both parties but not his operational manager who threatened the sack. His defence: "I work the set hours but unit manager requested I start and finish when they do". Operational manager: "When you start is your affair. But when you finish is mine". Needless to say he did not work the unit's required hours from then on. Such petty mindedness obsesses QH officials. Incompetent doctors murdering patients is just a minor inconvenience.

**Abortion:** We cannot end without reflecting on hidden element in this equation: abortion. Mass murder of children and attendant 'culture of death' permeates 'health' system as it does whole society. When a doctor or nurse delivers a healthy baby in one theatre then go next door and slice another equally healthy baby to ribbons a certain psycho-pathology is created that cannot be submerged forever. After 30 years of child-murder hardened medical staff now view all patients as 'potential corpses'. US medical TV shows like *Grey Anatomy* (Channel Seven 7.30pm Monday 22.8.05), which talk of comatose patients as 'suitable for harvesting', i.e. for organ transplantation, foreshadows how all this will end. Kill one, save one is justified as 'kill one to save one'. If the life to be saved is so valuable then what value the life sacrificed? This issue is one foolish star of *Superman* Christopher Reeves never contemplated while touring the world preaching on the worth of 'embryo stem cell' harvesting. Foolish, useless creature is now dead but the harm he did remains. May Hell be hot for him.

Awake! January 2006  
**Increasing Violence Against Clergymen?**  
 "Being a priest is one of the most dangerous professions in [Britain]," reported London's *Daily Telegraph* in 2005. A 2001 government survey revealed that almost three quarters of clergymen interviewed had suffered abuse or assault in the preceding two years. Since 1996 at least seven clergymen have been murdered. One urban area, Merseyside, has had "an average of an assault, robbery or arson attack carried out in one of its 1,400 places of worship every day."

is just  
 ah!  
 Art!

## NINS ANALYSIS: Media Bimbos

**Who are 'the media'?** Self-seeking sybarites denounced several years ago by a senior Australian male editor on his retirement as "these new reporters who refuse to leave the office. They get all their information over the Internet or via e-mails. They won't do the hard slog. They simply want to be seen in the best restaurants, drive the best cars and live in the best suburbs". Who are these 'new reporters'? Blonde bimbo females.

**Feminist Professions:** All non-technical professions in Australia are now bimbo-only zones. Friend of ANA did Qld University of Technology first year Journalism course. Of 27 students 23 were female, three 'gay' and one Asian. No white males are allowed. 87% of Qld teachers are female. Qld Teachers Union does not see this as bias but "to make up for past inequities". Shows difference between 'equity' and 'equality'.

**Equity Versus Equality:** 'Equality' is clear to anyone but 'equity' requires a Leftist bias to see it. Any injustice is acceptable when done in the name of 'equity'. Ban white men from medicine and media? That's 'equity'. Have you seen the 'girls can do anything' stickers put out by the ALP's education department since 1995? Is not a wish but a command: 'girls WILL do everything'. By latest estimate 70% of Australian women are 'in the paid workforce'. Federal and States governments are desperate to make that 100%. Why?

**Dearth of Babies a Government Plot:** Only people capable of producing next generation of white soldiers to defend us in the Race-war are women yet these are busy forging 'careers' at Uni. These then incur a \$30,000 HECS debt each meaning they have to work till they're 35 years old to pay it off. Then they want an overseas trip, and only then maybe they'll marry have one child. If they can. Many by then find, after 20 years on 'the pill', the supposedly temporary sterilisation is permanent. Once young women decide to have their one child they usually cease taking the pill but its effects continue. Oops! Another issue science didn't predict and the media don't report. For post-pill women pregnancies are often ectopic and mis-carriages are the norm. We know of one white girl who lost ten still-borns in a row before her husband finally gave up and left her.

**'Girls Can Do It All?'** 'Girls' have been promised they can "have it all" but obviously they can't and who is game enough to tell them? That would oh so 'sexist' and so the charade continues. As of September 2005 Australian Defence Forces say they will recruit women to combat roles due to a 'shortage of men'. Ex-ADF men we contacted refused to remain in the armed forces due to it 'touchy-feely' approach to war, with an emphasis on 'peace-keeping' instead of war-fighting. Another government ploy: force men out by making ADF too 'girly' then recruit girls claiming insufficient men. We all know UN Covenant on Rights of Women (1986) is behind world-wide push for universal disarmament. Now comes the stinger: soon only women will have guns.

**Race-Mixing is 'OK':** A number of fecund white girls are opting out of the whole 'full-time education/career/sterility' circus to become full-time breeders. This would be welcome except they seem only interested in race-mixing. After 20 years of MTV-style inter-racial music via government-owned ABCTV the message is clear. White girls may mate but only with non-whites.

**Money and Fun But No Work, Please:** Regarding 'female penetration' of professions a nurse contacted us to complain "only girls and gooks" doing medicine in most State hospitals. No white males. Yet these unfit 'replacements' recently objected to the long hours seen as standard in medical practice. Why? It "interfered with their social lives". Same conclusion was reached by Pharmacy Guild several years ago when its female quota reached 'critical mass'. An informal ban on male entry to chemist's courses meant only girls were graduating. But most then refused to set up their own pharmacies, preferring to be employees, not bosses. Same dilemma now faces medicine and media. Females seem allergic to hard work preferring an easy, Monday-to-Friday, 9-5 life-style.

**When Also-Rans Rule:** Sounds similar to problems now facing Southern Africa. Envious aliens coveted what white men build but now refuse the hard work required to maintain white civilization, let alone replace or advance it. 'Female dominance' of the Western work force has many negative consequences neither government or girl-run media seem willing to acknowledge. If they don't report a problem it doesn't exist. Is how USSR collapsed. Real issues were denied by apparatchiks and their tame media minions till the wheels fell off in 1989. Same will happen in the West. A controlled media, used only to silence opponents, will cut the System's own throat. Instead of a guard dog sending out warnings they have a lapdog, afraid to upset its own cushy position.

**Some results of 'Female Rule' since the 1960's:** No white children, accidental self-sterilisation, poor work attitudes and refusal to join unions for collective bargaining as unions are seen as 'too conflictual'. Feminists boast women's natural method of decision-making is 'consensual thereby avoiding hierarchy'. Another lie? Future bodes ill for the West: 'workers' who won't work, breeders who refuse to breed. Time for a Revolution, a revolt by white Ubermen to regain control before we all perish from the folly of a few.

Once a white state  
is founded what'll  
happen to the wogs  
& nags?

Knowing they're  
unwelcome most  
will LEAVE.  
Foolish states  
will accept  
them as  
"refugees."

Those who've sinned  
against the  
white race  
may NEVER  
leave.

... and what of  
the mulattos  
& whiggers?

For some -  
restitution;  
for others -  
RETRIBUTION.
