STORM

PUBLIC INFORMATION BULLETIN OF NATIONAL ACTION

NA accept no liability for information provided/inferred. STORM is an information source only.

A Flood of Information: Some readers of *STORM* complain our material is 'old' and 'out-of-date'. Is true sometimes we send you material up to 18 months old. But for good reason. We began life as a newsletter for a Branch of a Nation-wide political organisation, running out a copy once a month. As we become better known around the world other groups began corresponding with us. Much of their material was new to us and of great interest to you, sometimes from defunct newsletters, like one US mag that ceased in 1991 with death of its editor. Man who inherited it from editor's widow reprints back issues. Another is put out by an unemployed Rightist journalist who recently sent us 280 pages, close typed. All brilliant stuff. Another supporter sent us 120 pages of cutting from overseas newspapers, newsletters, secret files, etc. Problem: we only put out five A4 sheets per month. Australia Post charge a higher rate for sixth page. As South African Rightist magazine put it: "challenge each month is not what to put in but what to leave out". Inevitably some material sits on the shelf for years before we find an opening.

Samizdat: Another idea from embattled South African friends was to see current multitude of Rightist, nationalist & conservative newsletters and magazines as 'Samizdat'. In dying days of Soviet Empire, 1917-1989, it was plagued by *Samizdat*, unofficial newsletters roneo-copied in people's lounge-rooms and delivered from hand-to-hand to avoid secret police in postal service (sounds familiar). Thought they tried to prevent it and gaoled many editors and distributors Red State never managed to quash underground writings of people like Solzenitsyn. This press was life-line of anti-State elements which eventually brought about downfall of USSR and its Eastern Europe empire. Many Reds in the West now claim the USSR 'just collapsed' under its own weight. Rubbish. They deny truth, as usual. Fact is USSR was thoroughly white-anted and its prisons, notorious Gulag, was filled to overflowing with those, like us, who say: NO!" to a ruthless, totalitarian dictatorship.

Consumerism: Hope this explains why our material seems old or 'out of date'. This evil SYSTEM uses slogans to brainwash the shackled, zombified masses. Gives a fascination with 'new'. Fads are pushed so public rush, like mindless lemmings, after latest product they 'simply must buy', whether they need it or not. Novelty is all that matters. SYSTEM then replaces it so mindless consumer has to buy that, too, regardless of price. Childish consumer mentality is all that keeps Western economy going. When governments lament 'high levels of credit card debt', currently running at AUD\$22 billion for Australia's 20 million people, don't believe them. They know 'easy credit' is what allows mindless to spend without thinking. If they had to go to the bank & apply for a loan for the junk they buy - they wouldn't. Would displease the Corporations who really run this country and they'd have to replace 'little Johnny' Howard with someone else via their media monopoly. So one slogan you won't hear used is "Live -Consume -Die".

Childless Future: Is why women must not have children. It diverts their income away from mindless consumerism and into something worthwhile - producing the future. Beyond the hue and cry about 'a woman's right to choose', etc it boils down to this: children don't buy make-up, expensive dresses or sports cars, take holidays abroad or drink café latte. High-income career women do. So children must be avoided or destroyed. And the future? Capitalists are just as happy to sell to mestizos & Asian as to whites. Only colour they recognise is that of money. Is why a nationalist struggle MUST be anti-capitalist. These are so greedy, to quote V.I.Lenin: "they'd sell you the rope you were going to hang them with".

Old & Out of Date: What has all this to do with *STORM*? Simple: another SYSTEM slogan is: "nothing is as old as yesterdays news". WRONG. 'Yesterdays news' is HISTORY, something the SYSTEM does not want studied as it would quickly reveal the tricks they've used over and over to enslave peoples. Is why only 20% of Australian High Schools students now learn any modern or ancient history: youth are trapped in today. Lack reflection on past events, so repeat them. As Santayana said: "those who forget their past are doomed to repeat it". Educated to ignore the past and deny the future they have only one time - the present. Is horrible capitalist nightmare many youth struggle to escape through drugs, reckless behaviour and early death. Suicide is leading cause of death in Australian males 18-24 years old. Second worst in world, after Estonia. *STORM* 'outdated'? No. We put out history so our Volk don't become HISTORY.

Brisbane? Brisbane was chosen over Sydney for initial landfall in Australia of new *Airbus 380* on its world trip in late 2005. Why?

USS Ronald Reagan: In mid-February 2006 unprecedented visit to Brisbane by a full aircraft carrier battle group from US Pacific Fleet headed by 6,000 men *USS Ronald Reagan*. Visit lasted one week. No negative publicity was allowed in local Murdoch monopoly newspaper, *Courier-Mail*. *Courier-Mail* went so far as to pre-denounce anyone who might even think of opposing the visit on grounds such as opposition to war in Iraq, presence of nuclear powered vessels, etc. Cajoled into silence by monopoly media the visit was, by official accounts, a great p.r. success. But why visit? Brisbane has not seen a major US warship visit since it was General Douglas MacArthur's Pacific HQ 1942-43 for the New Guinea and Guadalcanal campaigns. *USS Ronald Reagan* later stopped at a spot on coast north of Brisbane. A local called ANA: "no one and no thing is allowed within 50 miles of the spot". We can only conclude they were off-loading men &/or equipment at Shoalwater Bay RAA Training Area.

Singaporean Air & Army: Shoalwater Bay is where Singaporean Army is pre-positioned. Shoalwater is also where US-robot aircraft, 'Global Hawk II', landed in 2002 after its maiden voyage across Pacific Ocean. Was guided solely by GPS satellite. Its 'pilot' was in the US. As for the Singaporeans, their Air Force helicopters are pre-positioned at Oakey Air Base, West of Toowoomba with their fighter bombers based at Amberley, West of Ipswich. Why 'pre-position' in Australia? Singaporean AF and Army both say their country is "too small" to train in so need bases in other countries. As an ally we lease them our bases. What few know is SAF & SA ran 'exercise' in 1996 designed to see how rapidly they activate and man this 'pre-positioned' equipment: took only 24 hours to land 10,000 troops. A success - for them. And for us? The dozey public sleeps on....

Ethnic Outlaws? An ANA member told of Serbian work-mate. "He refuses to speak Serb to him mother". "Why?" "He says: 'all my friends are Australians'. So I asked: 'what - Greeks, Italians?' 'No! Aussies!'" "Ethnics don't see themselves as dinky-di Aussies, only Anglos. Why should we? Turns out the boy's Mum is Serb but his Dad is Croat. Another Serb at same work-site is married to an Muslim. His previous wife was also a Muslim. A pattern emerged. Multiculturalists only import mongrels, not pure-bloods. Some wondered why no conflict arose among Australia's thousands of refugees from 'Former Yugoslavia' during civil war, 1989-99. Easy: none were pure bloods. All had fled to Australia knowing they were in danger from both sides. Is this same for all ethnic groups we import? No loyalty to a homeland because they are racial outlaws.

Ross River Fever: Qld currently has 80,000 trans-migrants arriving from interstate each year, trying to escape Cronulla-style racial conflicts now sweeping our two largest cities & ethnic ghettos, Sydney and Melbourne. Many flee violence but are running straight into slow death: Ross River Fever and Dengue Fever. Both mosquito-borne viruses for which there is no cure. A hospital contact of ANA told us: "A patient in mid-50's was wheel-chair bound. Did not have arthritis but RRF. Asked: 'are you from Nth Qld?' where the disease is in epidemic proportions. No, I got it standing in my back yard in BANYO [a North Brisbane suburb]". Second 'patient' was seen roaming hallways. Emaciated, with deathly stare and Mummy-like shuffle, when asked what ailed him replied: 'Ross River Fever'. 'Are you from Nth Qld?' 'No, I was bitten by a mosquito in my front yard in SANDGATE [another Nth Brisbane suburb]'. First victim told us: 'my doctor said the media report 200 new cases of RRF in Brisbane each year when the real figure is closer to 2,000 p.a.'

You've never heard of this disease, which mimics arthritis and heart disease with bouts recurring every six months for life? And why no cure? Why no media coverage? Simple. Their focus is elsewhere: on New York, Jerusalem anywhere but here. Things happening, literally, in our own front yard are of no concern to these alien-lovers. As for a cure. Media whine about curing AIDS, as many of them, and their masters, are queers. When late, unlamented Mayor of Brisbane, ALP Ultra-Left queer & defrocked RC priest, 'Father' Jim Soorley, ran Brisbane for twelve years (1992-2004) his first act was to halt annual aerial spraying of vast mangrove swamps surrounding sub-tropical Brisbane and neighbouring cities of Redcliffe, Logan, Redlands and Pine Rivers. Why?

Green Killers: His Greenie friends complained the annual plagues of mosquitoes from the swamps were 'natural' and so should be suffered. These gained credibility from local commercial fishermen who claimed annual spraying cost them money by killing mosquito larvae that fish feed off. After 1992 all spraying ceased. When asked why by ANA in 2004 Pine Shire Council claimed was a 'jurisdictional' issues: "we want State government to pay for it. They want us to pay for it". Cute argument and one never resolved but a false one. Both State and local governments are ruled by pro-Greenie factions. In 1995 Goss ALP government lost power due to 'the Koala Bypass' protest vote. Since then all parties listen when Greens complain. Greens are only party never smeared in media so dozey public believe them honest and support whatever hair-brained schemes.

Koalas: Koalas are a good example. Ex-Greenie at Inverell Forum told ANA in 2003: "entire nation-wide 'Save the Koala' campaign is a fraud. "Koalas are not in danger! Those creatures that are, are all rat-like species that look hideous. No one in their right mind would give money to save those. So the Green lobby got a brilliant idea: promote 'Save the Koalas' instead. All money collected goes to saving ugly native rats". And the media? "They are aware of the fraud but they say nothing". That figures.

Fraser Island: Was revealed by police in late 2005 that a camera belonging to one of the increasing number of 'missing' tourists was found in bush on Fraser Island. Fraser is world's largest sand island. Lies off Maryborough and Rainbow Beach, famous for multi-coloured mineral sands. Camera had canine bite marks all over large lens. Police speculate these came from dingoes. Say it looks like British male victim, whose body has never been found, was attempting to fight off a pack of attacking dingoes with only weapon available, his heavy camera, when he was killed and eaten. Tourist 'went missing' only two months after a nine year old Brisbane boy, a good Baptist, was killed by a dingo pack in same area while defending six year old brother. Media at that time praised dingoes, saying children had "invaded their natural environment" same argument used by media in three fatal shark attacks off Perth and Adelaide in late 2005. False argument but media had quotes from victim's friends and families agreeing.

Dingoes: Why the Fraser Island attacks? Several years ago there were commercial farms on Fraser. The Abos came along, led by notorious white 'Abo', part-time Uni lecturer & poet, Kath Walker AKA Oogadoogoo Noonukal. Led by this fake other Abos laid 'claim' to Fraser as their 'ancestral' home, saying native had been driven off it to make way for the farms. As this was the height of Greenie-Abo land rights hysteria and we had Ultra-Left ALP rule at Federal and State level the framers soon found themselves evicted and the farms destroyed. As you can imagine, urbanite Abos like KW/ON never set foot on the place, unless a media circus was in tow, so the whole purpose seemed simply to serve the Greens who got another area of Australia 'returned to its pristine state'. Unfortunately 'pristine' included re-introducing dingoes which white farmers had eradicated. When the farms were destroyed these had let lose their horses. Local, media, all foreign-owned, soon christened these 'The Fraser Island Brumbies'. Brumby is not a local word but one imported from the US, like most of the media's ideas.

Brumby 'Genocide': The Greenies knew better. They soon complained the 150-odd Brumbies were denuding the famous Sand hills by eating all the sparse vegetation. Cut no ice with public so tried another tack: ponies were starving due to overpopulation and eating all the vegetation. This struck a nerve: starving ponies?! Apart from cats and dogs is one thing our feminised public adore and that's ponies. "Something must be done!" demanded fake 'letters to the editor', mostly written by the editorial staff. Government responded. A crack team of Wildlife Officers were dispatched to FI with an aerial shooter, a professional, helicopter-borne hunter as used by the Feds to eradicate wild buffalo, camels and donkeys from NT in 1990's. Soon all 150 ponies were dead. Not the outcome the dozey's had imagined but then the media didn't report it so no one was worried. Except the newly re-introduced dingoes, who had been feeding off them and whose numbers had also grown. Without ponies to hunt dingoes became a problem around tourist camp sites, whose numbers

were also growing. Same problem exists with bears in US and Canada. None in media made connection, so neither did the public. Attacks increased & deaths began soon after. But media never called for a 'solution' to dingo problem as they had for the ponies. So attacks continue till today.

Southern Brisbane Nationalists Gathering: Brisbane is Australia's largest city, covering 95 sq. miles. Is difficult to get Nationalists together in one place so was a pleasure for ANA to meet on Sunday 12 March 2006 12 noon - 3pm with 15 representatives of eight other groups for a BBQ in public park on city's Southside to discuss future plans. A further meeting on North Coast was planned for a week later but did not eventuate. ANA were able to distribute copies of *Australian Resurgence* newsletter to those not currently on the mailing list.

'ANA doesn't exist': Another reason to meet face-to-face is to dispel the continued libel against ANA by another group that "ANA doesn't exist anymore". Here are facts: ANA was founded by an individual in 1982 who in 1992 was 'put away' by the System courts and secret police for seven years leaving ANA in disarray. ANA SA State Chair took over, at request of imprisoned National Chair. When NC was later released from custody, after five years, he incorrectly assumed he would return to running ANA. Many saw his arrest as merely culmination of a period of chaos. These much preferred steady hand of the new Leader. This was not to the liking of the ex-Leader.

'Stay In NSW': To placate him, exNC was given NSW as his 'bailiwick'. Is Australia's largest state and where he lives, Sydney, is our largest city. "Stay in NSW and build the party there" he was told. But no. He couldn't restrict his ambitions to retake his National Chair, so after three years of internal undermining was formally expelled. He then took over a defunct group, AFP. We saw no use in a vendetta so continued previous arrangement: stay in NSW but do not go inter-state or there would be trouble. "Build AFP (Sydney)" we advised. But no. He travelled to every capital city in the Federation. Where ever he went in the past three years the tale monotonously spun has been the same: "join AFP, successor to ANA as ANA is defunct". Many ANA members believed this man, a good speaker with lots of charisma, especially as they knew him to be ANA founder and few had met the existing NC. Reminds us of PNG where Founder Prime Minister in 1975 was Michael Somare. After many years he retired from politics. But in 2000 the country was in crisis, so Somare was persuaded to return from retirement saying 'the country needs me'. During the 2000 election campaign he travelled to many villages in the interior, bereft of TV or radio. Many only knew him as PM from 1975 and were unaware he had ever left office. The4y said: "why have you let the country run down so bad?" Likewise in ANA many only know the media-savvy exNC and fail to recognise the great work done by the current NC, 1992-2006.

Role Models: Not a few young recruits to nationalist organisations, including ANA, are children of single mothers, either whores or divorcees. These come to us seeking 'male bonding'. Is normal. Surrounded by females, forced into co-ed schools, with 87% female teachers is natural they seek out all-male political associations. Oppression of males under this corrupt femocracy means one of the few places they can be a 'proud male' is among Rightist groups. Answers question we've been asked for some time: 'why do no young women join our groups?' Also another question: 'why is it when we talk politics with youth they blankly stare & their eyes glaze over?' They are not with us for 'politics' but seek a white, male role-model in a society where there are none. It is for us to 'model' life in a future National State. Talk is cheap: they get plenty of that from their mothers & female teachers. What they want from us is truth, not more female lies. So they watch and copy. This puts a huge responsibility on Right leaders but explains why youths don't listen: they're too busy watching.

Lament from local Kiwi (expat white New Zealander). "I left there over 20 years ago. That Waitangi Treaty - it was the worst thing 'they' ever signed. Those Maoris put a few crosses on a page and now the government pays them billions! It drives the Pakeha (whites) mad. My sister still lives there. She's a teacher in a Maori area. They only speak Maori there. When I ring her up from here she answers in Maori. I say "cut that out! It's me!"
['Hello' in Maori is 'Ki Ora'. Maoris are only 10% of NZ population yet white Labour Party handed all power to them. South Africa's whites are not alone. Same happens in Australia where Abo is only 1%. 'Indigenisation' means 'take economic power off those who deserve it (whites); give it to those who don't (local blacks); so they can give it to others (foreign aliens). RE].

Diseases Multiply? ANA's contacts in medical field told us of several recent cases un-reported by monopoly Murdoch media: Some related to use of potting mix. One woman contracted lung cancer from vapour droplets after opening a bag of mix purchased from local Woolworths store. Is now terminal. Two other cases, also in Brisbane, involved men & potting mix. First woman's advice: "don't go near potting mix without gloves and a mask on". Two other cases suffered from Ross River Fever. Man from Banyo is trapped in wheelchair for life. Only 55 years old, was bitten by mosquito in his backyard. Within six months all his joints had swollen, causing crippling pain. Then chest pains began. RRF mimics both arthritis & cardiac (heart) disease but has no cure. Man told contact "official figures say there are 200 new cases of RRF each year. Wrong! My doctor tells me it is more like 2,000 per year!" Yet from controlled media, not a word. Is time we re-named 'media' 'the filter' as they censor out anything that makes current regime look bad.

Second man, in his 60's, now walks about like a Mummy from an old horror movie. Shuffles at snail's pace, blank expression on face, arms outstretched: RRF. Was bitten in yard at Sandgate. Why so many cases, so many mosquitoes? May explain media silence. For years radical Greenie activists denounced annual spraying of 'mangroves' (swamps) encircling sub-tropical Brisbane as they claim 'mosquitoes' are "part of the natural environment". Now these radical members of ruling party, ALP, rule us. So mosquitoes have rights, not people. Typical end result of evolutionary teachings.

Next case a mystery. Woman transferred from Mater Hospital ER (Brisbane) due to chronic overcrowding told horror tale. Another woman was wheeled in during her stay with a 'flesh-eating' disease. Woman had reportedly been digging in her garden [yes, most here have gardens. In sub-tropics anything grows with good soil, humidity and plenty of sun. Most grow their own fruits. One fellow now has a large veggie garden simply from tipping his kitchen waste out in rear of his yard over past six months. Veggies grew themselves]. Woman got 'a thorn' under her nail. Thought nothing of it till a couple of days later hand became infected. Went to local GP only after eczema enveloped her entire arm. By then was too late. "GP sent her to Mater ER. Doctors there spoke of a total skin graft for her entire body, but weren't sure how. All three layers of her skin had dissolved. While doctors puzzled she died, only 42 years old".

Final case, less dramatic but yet another garden at Sandgate. Man kneeling in his own compost heap said: "germs got in through my knees, into my bloodstream, spread throughout my body. I now have lung cancer, brain damage, heart disease & skin ailments. I had to quit work due to chronic fatigue and constant head aches." The message? Don't garden!

Fluoride? Rumour 'doing rounds' after 12.12.05 Cronulla white riots in Sydney: "Cronulla was last suburb in Sydney not to have fluoridated drinking water. Plans are afoot to change this - rapidly - to prevent any further outbreaks of 'ugly racism'".

Educated Unemployed: In early 2005 media reported 1/3 of Australian school-leavers eligible for University entry were denied, despite having applied. Reason given: 'insufficient places'. That's means after 13 years of compulsory education (12 at school and one year compulsory kindergarten or 'preps') aimed not at something useful, like a trade, but solely at obtaining entry to Uni, they were turned away. The vast majority of those denied entry were white males, wimmin and blacks having 'quota entry' set by the Federal and State governments. No such 'quota' exists for white males. Female and alien entry 'quotas' operate at cost of white male entry. For every black or wimmin with a 'reserved' spot, one white male is denied entry. At the same time 100,000 fees-paying students gained entry to Australian universities. All these were 'overseas students', p.c. speech code for 'Asians'.

While white males, despite having spent 13 year training for nothing else but uni. entry, were effectively barred, aliens, wimmin and 'blacks' walked into their places. Federal government, having focused all education for past 20 years solely on uni. entry, then in mid-2005 announced a 'skills shortage' in trades and a lack of apprentices. Rather than train the 1/3 of uni level entry students denied entry, the white males, for these lowly paid apprenticeships, the Feds announced overnight a plan to allow 97,000 aliens in per year as 'skilled migrants'. Some ask: who rioted at Cronulla on 12.12.2005 and at Sydney's Macquarie Fields, another all white suburb in late 2004? Are young white males racist? No, they're finally waking up to the rank corruption this SYSTEM calls 'business as usual'.

DVD Reviews: *Curse of the Ring* (2004) running time three hours. Written & directed by Uli Edel. Producer Rola Bauer. Associate producer Carla Thoren. Co-producers Brigid Olen & Volker Engel. Stars Kristanna Loken, Alicia Witt, Benno Furrmann and Julian Sands. A German-UK-South African-Italian co-production of SAT1 (SATV), Channel Four (UK) and Bavarian Film Fund. Cover notes have rarely been so true: "based on the ancient Nordic legend 'the Ring of the Nibelungs' is a saga of Siegfried the dragon-slayer..." *Curse* has all the 'racial mixture' a good nationalist would want: there are red-heads, blondes and brunettes. No aliens. How this ever got funding from Nelson Mandela's SAT1 is a miracle. Along with the *Lord of the Rings* trilogy and *Kingdom of Heaven* we are adding this to our permanent collection. Local Video 2000 is sold all three for \$16.95 - \$19.95 each, ex-rental. Also *Enemy at the Gates*, good war tale, of alien NKVD the Stalingrad blood-fest, whose sole purpose seemed to be to kill as many Slavs as possible. To make this clear, director cast real aliens in key roles. Bruder-wars: NEVER AGAIN. One warning with *KOH*: battles are great, as is amount of historical research done, but personal details of real figures are swapped. Is freely admitted in 'Pilgrims Guide' commentary that accompanies 'feature' on DVD. A good corrective is *Saladin In His Time* by P.H.Newby (London: Faber 1983 ISBN 0-571-13044-5).
