Public Information Bulletin of National Action

October 2008

ANA accept no responsibility for information provided/inferred. STORM is an information source only.

Channel Nine 'Sunday' programme Solday 830am 29 Juno 2008 (30 minutes):

Reporter Adam Shand, Sydney: "Dr Kinnimot is a climate denier, he does not accept the current debates pushed by former US Presidential candidate Al Gore in his controversial film 'An Inconvenient Truth'. Mr Gore has trained up many trained 'disciples' to 'spread the word' worldwide that global warming is 'man-made'. For opposing this new orthodoxy Dr Kinnimot has been banned from the airwaves by ABC Science Show 'gatekeeper' Robyn Williams. Why?" RW: "We checked out some of his claims and they were incorrect". Thus 40 years of academic research are brushed aside.

Dr Kinnimot is not alone. Jennifer Maroshy is a biologist employed by Right-wing think-tank the Institute of Public Affairs. She rejects the 'Al Gore' conclusions saying "there is no proof global warming is man-made. Only five years ago we placed deep-sea buoys at sea and found NO rise in sea temperatures, the opposite of what Al Gore says must happen. His group know this but ignore these actual 'inconvenient truths' in favour of their flawed computer-based 'climate models'".

Prof Don Aitkin a historian says "the Thames river froze over in 1815. Even now, 200 years later we do not know why. To say we can predict the weather next year or even next week is false". Dr Kinnimot: "20,000 years ago the seas levels were 120 metres lower than now. There was an ice sheet covering North America one kilometre deep. That changed suddenly. we still don't know why". Nothing is certain in science yet former Australian of the Year and paleontologist Dr Tim Flannery says "99% of scientists agree global warming is man-made. The 1% who don't are all paid by big oil". Tim is neither a climatologist nor a historian but he holds his views with great passion. When asked if she works for 'big oil' Dr Marohasy laughs: 'No! the oil companies love Al Gore. They see lots of money to be made in this whole 'man-made warming' argument'.

BBC World Service c/- SBS Radio 93.3FM 5.30am Tuisday 1 Juli 2008:

Reporter Steven Eicke, Moscow: "Russian authorities have arrested nine members of a skinhead gang in connection with 20 racially motivated murders & 12 attempted murders. Is claimed the group sought out Central Asians for attack especially Uzbeks. The group was lead by two students, one of whom boasted he had committed 40 murders. Police believe there are over 60,000 skinheads in Russia, responsible for the 69 racially-motivated murders in Moscow so far this year. Many see the Russian police as 'racist' and the general public as disliking 'dark-skinned peoples'. Russia skinhead groups are among the largest in the world. Through the Internet they now have links with German, Serb and US racist groups".

Channel Nine News 6pm Solday 6 Juli 2008:

Reporter Kathryn Brown, Goleta CA: "Firefighters from 41 States are fighting brushfires in California. This latest fire has forced 5,000 homes to be evacuated and destroyed 69,000 hectares of forest. Governor of California complained: 'there used to be brush-fire season. Now it goes all year round'. There has been no rain in the State for two months. So far this year fires have destroyed 590,000 hectares of forest".

[In the eye of the beholder? 'The Governor' legalised same-sex marriage 'two months ago' so GOD cut off the rain. But Arnie doesn't see it that way: sees it as proof of 'global warming'. Same event but the sinner and the righteous see it differently. Is why some are damned - no matter how much GOD forewarns them. Others are <sup>ALLAH?</sup> saved: through 'discernment'. Depends on whether your eyes are clouded with doubt or 'open to wisdom'. RE].

## ESTIMATED RESIDENT POPULATION OF AUSTRALIA AS AT END MARCH 2006

New South Wales	.....6,817,142	Tasmania	.....488,698

Queensland	.....4,035,707	A.C.T.	.....328,146
South Australia	.....1,552,324	Total of Australia	.....20,551,865
Western Australia	.....2,042,781		

Source: Australian Bureau of Statistics

'MUSLIM BRIDGES': We've begun receiving glossy, expensive newsletter from US group 'Muslim Bridges'. Very intelligent & unbigoted, is designed to appeal to Westerners. Exudes tolerance. But recent issue called for 'gifted writers' to 'attack Islamophobia' in media & for 'civil rights lawyers' to 'make cases against Islamophobes'. In other words, any who oppose insidious infiltration of the West and its suborning by Muslims is to be silenced. ~~Made us think~~ who else uses this approach? Who do US Muslims model themselves on?

THREE GROUPS: Three groups occurred to us: feminists, homosexuals and The Chosen. All constantly hunt for enemies to attack in the media, through the media and then in the courts. Occurred to us: do you ever wonder why TV evening News is so dull, crammed with celebrity and sports stories? These are 'approved' stories i.e. a p.r. firm has asked for them to be run to get free publicity. But any real news may involve reporters in threats of law suits and prosecution s before the Human Rights courts. If you were a reporter what story would you run?

REPORTERS: Given 'equal opportunity' laws most reporters are now female. These normally run from 'conflict' to 'human interest' stories hence the number of 'animal' and 'female' tales which are not news at all but at least are not a blank screen. We believe the level of censorship is now so high and the quality of reporters so low that News cannot exist as a medium for information. Is why so many rely on Internet Samizdat (home made newsletters) & informal publications like ours.

Deutsch Welle Radio 'Newslink' c/- SBS Radio 93.3FM 4.30am Frigaday 13 Juno 2008:

"La Chamorra, the Naples-based Mafia, now earns US\$23 billion annually - equal to the annual GDP of Lebanon. It has made links with other organized crime groups from Russia, Colombia, the US and Mexico".

ABC News Radio 936AM 1.30pm Solsday 15 Juno 2008: "Many countries facing energy shortages are turning to 'alternative fuels'. One is solar power. A draw back of solar is its inability to operate at night and to store energy. This has now been overcome. 'Concentrated solar power' (CSP) uses molted salt as storage batteries overnight. Arrays of solar mirrors are circled around a tower filled with liquid. The heat warms the liquid which turns a turbines producing electricity. Such arrays are now being tested in Morocco, Algeria, Egypt and Southern Spain. The technology is particularly attractive to any country with large expanses of desert [like Australia]".

ABC News Radio 936AM 5.30am Wodensday 18 Juno 2008: Dr Kent Anderson, Dept of Asian Studies, ANU: "Japan faces prospect of losing 70% of its workforce within next 40 years. Ruling LDP officials in Japan have raised question of immigration as a way of coping with Japan's low birth rate. Propose bringing in 10% of population through migration or 12 million people. One way to overcome resistance from Japanese, who pride themselves on homogeneity [undiluted race] is to have first migrants be 'health care professionals brought in to deal with the aging population'. Japan recently began issuing visa for nurses from Indonesian & the Philippines". [Getting public to agree to their own demise is simple: appeal to their selfishness. This poisoned pill is killing the US and Europe where 'cheap labour' is used. 'Aging population' is used elsewhere but treatment remains same: more lethal injections of non-assimilating, Third World sludge. RE].

BBC World Service c/- SBS Radio 933FM Frigaday 20 Juno 2008:

"Rebels from Nigeria's MEND ('Movement for Emancipation of Niger Delta' - ex. Biafra) have attacked a Shell oil platform 100 km offshore. Shell has relocated much work to these off-shores to avoid MEND's regular attacks onshore. MEND say they took US citizen Capt Jack Stone captive. Will exchange for many MEND POW's held by Nigerian armed forces. MEND say they failed to destroy the central computer room but will return again to do so. Alan Goldman, author of book 'Poisoned Well' on MEND, says 'this is a surprisingly sophisticated operation for MEND. This platform was not for oil production. Was the main control centre for all oil production in this region. SHELL put it here to escape the regular attacks on the mainland. France's TOTAL oil has already quit the country in response to these attacks".

["Too sophisticated for MEND?" Then by who: A rival oil company? Al Qaeda? Mossad? Cui bono. Who gains from yet another spike in the price of fuel? Looks like someone wants petrol to hit US\$200 per barrel. RE].

SBS Radio 93.3FM 'Portuguese Hour' 11am Saturdaysday 21 Juno 2008:

Interview with 'Mr. Atakari, Ambassador of the Community of Portuguese-Language Countries (CPLC): "CPLC were meeting in Dili on 2<sup>nd</sup> February 2008 when 'the events' [attempted assassination of both Timor Leste's

President Ramos Horta and Prime Minister Xanana Gusmao] took place. Is still no idea who the assassins were. We're awaiting an investigation by the Prosecutor General's Office. He is waiting investigations into the responses by the LTTE [Timorese Army] and into the police. Also into the UNIPOL. All this will take time. In the meantime, following the visit to Brazil of President Ramos Horta, the Brazilian President Lula De Silva plans a visit to Timor Leste. President Ramos Horta plans to establish a National Petroleum Company by Presidential Decree".

NBCTV(US) 'Meet the Press' c/- Channel Seven 4.30am Moonday 23 Juno 2008: Interview with US Senator Jo Biden. JB: "Iraq war costs [the US] three billion dollars per week (sic), we suffer 250 casualties per month and on average 45 deaths per month. We should defeat Al Qaeda in Afghanistan. That's where they live".

Channel Seven News Monday 6pm 23 Juno 2008: "Premier Anna Bligh today announced retirement of Qld Transport Minister Rob Welford. He's 'copping the blame' for Brisbane's transport woes. Independent MP Peter Wellington says Anna Bligh's government is 'on the nose' with many voters and 'if the Opposition get their act together they could be the next government'".

[Two days before this we received a report of ANA supporters illegally distributing ANA's 'Tired of Standing on Buses & Trains?' flyer at Central Rail. ALP put their rabidly antifascist militia, 'fightdemback', onto us. ALP are more paranoid than we realized. Why? Voters listen to us. Encouraged us to accelerate our 'issues' campaign. Fightdemback looked pretty stupid denouncing calls for improved public transport as 'racist'.]

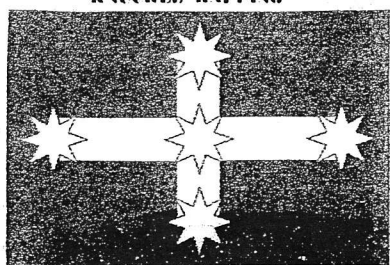

'Focus on the Family' Vision FM/87.8FM 4am Thursday 26 Juno 2008:

Dr James Dobson interviews John Ramsay author of NY Times bestseller 'Financial Peace'.

JD: "a recent survey has shown that when asked what their retirements plans were many poorer Americans replied: 'I'll win the Lottery!' How realistic is that view?"

JR: "Statistics show that 65% of lottery winners in the US are bankrupt within ten years. Their divorce rate is four times the national average. Given the tough financial times at the moment the divorce rate is soaring, with 'money trouble' given as the chief reason. Credit card delinquencies are at an all time high. The chances of winning the lottery are very small. If you want to be rich do what rich people do to get rich. Do you see anyone standing in line to buy lottery tickets driving a Mercedes or wearing a Rolex watch? No, they're all poor people. When you go to a casino and you're in a \$50 million building - look around. Realise 'somebody paid for this' - people like you. Irony is if those who gamble on a weekly basis opened a bank account at age 21 and deposited that money into the account every week instead by the time they retired they WOULD be millionaires".

[Why mention this in STORM? To explain the enclosed anti-gambling stickers from our associates at CFPA].

THE widespread murder of whites by blacks is being portrayed as "merely crime-related". Were the mass murders in Bosnia "merely crime related"? Are the daily murders of various tribe members in Kenya "merely crime related"?

In any other country the mass murder of any black tribe on such a scale would be considered genocide, and an international outcry would follow. Hundreds of peace-keepers would be sent to SA. The UN would hold a special sitting. Headlines in the mass media would be screaming blue murder. TV channels would be filled with scenes of the dead bodies and their grieving families.

Yet in SA, the murder of the white tribe is reduced to a statistic and labelled "crime". The police refuse to release up-to-date statistics on the extent of the murders.

A book I happened upon, published in Germany in 1993 by Ewertverlag was subsequently confiscated (amongst some 200 other titles) by the German Secret Police (they don't call it Gestapo any more). However it has been translated into English, with the title "Secret Societies and their Power in the 20th Century" ISBN 3-89478-654-X and published in 1995 by Ewertverlag S.L., PO Box 35290 Playa del Inglés, Gran Canaria, Spain. The author is Jn van Helsing (a nom-de-plume). This book and Part 2 is a good introduction to what really goes on in the world. Of course, one cannot check what is written, but I find the puzzle continually growing.

- S R (Cape)

We have been using the name of "It's Time!" since 1984, but recently we were contacted by the Dept of Fair Trading, which informed us that someone had objected to our use of that name. This meant we had to change and so we have chosen the name above.
