

P.S.: I'm glad to learn from Brian that he is working on his home turf, in Limerick, Ireland. I think that is his best field for action, since he cannot be deported, I would hope. I have read your excellent selection of news articles. Some of the more important ones touch on population, disease & economics. China looms large in economics & politics, with extensions of its global influence, while the USA Empire is getting battered on all fronts, as it so richly deserves. As one writer in your SA Business Report wrote: Madman Bush should be watched, but by whom? Other madmen? He is surrounded by kosher "neo-con" Zionist armageddonists who would applaud him as he pressed the lethal buttons to start World War III or IV, depending upon one's viewpoint. I appreciate hearing about the Bric Bloc for the first time: Brazil, Russia, India & China. The kaleidoscope of power is shifting rapidly, & the U.S. label of "super-power" is becoming tattered & threadbare. "Usrael's" version of the Roman Empire is even recruiting foreign mercenaries in exchange for Roman, er, U.S. citizenship, as one of your articles reveals. The demographic themes of your mailing are schizophrenic: on the one hand, the unmentioned, but obvious pollution & depletion of this planet by over-population, & on the other hand, cries for subsidizing births in Turd World countries to 'improve' their market potential. On one hand, we see the proliferation of Sasol's Nazi technology to convert coal into liquid, including oil & its derivatives, but this will increase CO<sub>2</sub> emissions, hence global-warming. It sounds like the "good news, bad news" jokes. My jovial landmine & boobytrap instructor told us that there was good news & bad news about explosives: the bad news was that explosives don't miss; everyone gets a share, if only concussion. The good news was that explosives are non-habit-forming. What a relief that was! What China & India seem to be doing is to invest in their human capital by training & educating their youth for employment in advanced industries, rather than coolie jobs. The North American educators are doing the same, for Asian students, as Whitey falls behind by learning how to behave like niggers. No wonder I saw White rickshaw-pullers in downtown Toronto! The Jewnited States should print "In ZOG we trust" on its currency. But ZOG betrays all who trust it, including our former stooges like Saddam & the Taliban, The Shah, Somoza, Batista ad infinitum. The increasing murmurs of civil unrest in Mexico could signal civil war in Mexico, fuelled by narco-dollars. A Mexican civil war could set the stage for Bush & Co. who want to establish the "North American Union," with its new currency, the "amero." Meanwhile, construction of the CANUSMEX highway goes on & the border stays open to illegal alien invaders. As one of my professors said: "There are no big secrets." They are 'hidden' in plain sight. The Goyim are blind because they will not see, meaning: they do not want to see. Even when I say: Borders open; army overseas: who protects us from alien invasion? The Goyim just shake their heads in cow-like fashion. Stupid is as stupid does. I love them, not for what they are, but for what they can be, if they want to. ORION! E.T.
