

05. Dear Michael: It was great, as always, to receive your letter (7 NOV 05) & the  
ding enclosure, which I shall copy & return the original to you, as you request. The  
w cited would have applications outside the prison system, & since parts of the for-  
tish Empire, including the U.K., Canada, Australia & the USA recognize one another's  
w, to some extent, these citations seem relevant to ongoing Canadian persecution of  
t-criminals" & Whites who desire freedom of expression & association which non-Whites  
n "Soviet Canuckistan" alias "China-duh".

Sorry, but I did not keep your envelopes with the Lincoln flier enclosed. Karl Hand's  
had nothing except the flier. It had no return address, but it had been opened by some  
esealed with Scotch tape. I have written Karl to send you items with his return address  
, from now on, since a previous flier from him had been returned the same way, in an  
e prepared by you, as the writing appears, with his envelope inside. The day I  
d yours of 7 NOV, I sent off my request to Karl, that he send you another Lincoln  
with his return address on the envelope! I send fliers off to other correspondents  
, so yours went out after I received it. Sorry! I'll hang onto any further items I  
from Karl, which are addressed to you. The case law citations are very informative,  
my correspondents will receive complete copies for worldwide dissemination. That is  
geration. I have one typewriter, but I have correspondents on various continents who  
mputers, websites & translation capabilities, as I do, in Spanish & German. I do much  
e work here as I did for Reuters wire service in Lima, Peru, when I also worked free-  
or OIGA magazine, the Peruvian equivalent of TIME. Imagine how dated that sounds:  
ters & teletypes! Ships were still using Morse Code, back in 1969, & shortwave was  
y wireless means of sending voice or Morse transmissions. Now, it's all digital sat-  
& usually clear as a bell. What will these White people think of next? as Blacks  
say in Africa. I couldn't believe such racism! No one ever said, "What will those  
people think of next?" There was one potential James Watt, a Black preteen who stood  
s mother on the platform of the Bulawayo Railway Station, beside me, as I waited for  
ival of the passenger train from Salisbury, now Harare. Right on time the big Beyer-  
locomotive appeared, puffing & hissing, as it slowed beside the platform & stopped.  
d water was treated with tannic acid to reducing scaling, so all Rhodesia Railways  
ocomotives did smell like tea. That is possibly why the Black boy asked his mother  
power could some day be used to make tea. "What a good idea!" I said. It was the  
ames Watt who reputedly asked his mother, while watching the lid of the tea kettle  
fall with the steam pressure, if this power could one day be used to make wheels turn.  
know her reply, & neither did I hear the Black mother's reply to the Black version of  
att, for the engine-driver blew the whistle. Rhodesia Railways tea was good, but their  
of "coffee" would make any coffee-drinker switch to tea. It had a unique flavor, but  
taste a bit like coffee!

Always, I'm concerned about your eye problem, & I hope you are finally able to see as  
I do, since my lens replacement procedure. These operations have a very high percent-  
success, so the probabilities are in your favor. I told my surgeon that if one eye  
bt be corrected, I could wear a black eyepatch over it & learn to talk like a pirate,  
e refused to get a parrot! You may recall the patient of a Belfast optometrist who'd  
his glasses. The optometrist apologized: "Sorry, we're temporarily out of glass, but  
ave your spectacles boarded up for you in the meantime."  
ricans forget that Europe is very small, compared to the USA, so there is less 'space'  
around in, psychologically, demographically, economically & politically. Europe is  
nsely populated than China in terms of person per acre, therefore a country like France  
as been invaded & colonized by hostile Afro-Moslems faces some immediate hard choices:  
the wogs have occupied French turf at French expense via welfare. Next, the wogs want  
jobs, amid increasing unemployment. The Dutch are idiots to allow aliens into their  
ard-won living space. I recommend the French horror fable: "Camp of the Saints", which  
ed just what is happening to Europe under Third World imperialism.

local agricultural museum is a vital store of knowledge for survival without electri-  
worked their coal forge when I last visited the place. Although I am not skilled, I  
l by its color when steel is malleable, so I can hammer it into different shapes. When  
n high school, I worked in a blacksmith shop after classes, for \$1 an hour, in 1954.  
ut for the horses! All the best, as always & ORION!

*Eric*
